<b>1</b>	<b>Thermodynamic Fundamentals .....</b>	<b>1</b>
1.1	Introduction.....	1
1.2	Primary Notions in Thermodynamics.....	2
1.3	Kinetic-Molecular Theory and Temperature.....	9
1.4	Thermodynamic Equilibrium: The Zeroth Law of Thermodynamics.....	18
1.5	Energy Conservation: The First Law of Thermodynamics .....	19
1.6	Equations of State .....	21
1.7	The Carnot Cycle and Carnot Efficiency .....	28
1.8	The Second Law of Thermodynamics .....	31
1.9	Exergy .....	39
1.10	Example: Solar Exergy and the Earth.....	44
1.11	Concluding Remarks .....	46
	References.....	48
	Study Questions/Problems .....	49
<b>2</b>	<b>Energy and Environment Perspectives .....</b>	<b>51</b>
2.1	Introduction.....	51
2.2	What Is Sustainable Energy Engineering?.....	52
2.3	Fundamental Energy Sources on the Earth .....	53
	2.3.1 Solar Energy.....	54
	2.3.2 Geothermal Energy.....	58
	2.3.3 Tidal Energy.....	58
2.4	Biomass Energy .....	59
2.5	Fossil Fuels .....	60
	2.5.1 Coal.....	60
	2.5.2 Petroleum.....	60
	2.5.3 Natural Gas .....	62

2.6	Nuclear Energy .....	62
2.7	Proven Fuel Reserves .....	63
2.8	Historical Trends and World Energy Prospects.....	66
2.9	Environmental Impact of Energy Generation and Utilization.....	76
2.9.1	Global Warming (Greenhouse Gas) Effect .....	78
2.9.2	Acid Precipitation .....	81
2.9.3	Impact of Energy Efficiency .....	83
2.9.4	Other Environmental Impact Aspects.....	84
2.10	Case Study .....	86
2.11	Concluding Remarks .....	89
	References.....	90
	Study Questions/Problems .....	91
<b>3</b>	<b>Global Warming and Climate Change .....</b>	<b>93</b>
3.1	Introduction.....	93
3.2	Analysis and Modeling of the Earth's Climate .....	94
3.2.1	Radiation Balance of the Earth Planet.....	94
3.2.2	Greenhouse Gases .....	98
3.2.3	Radiative Forcing Concept.....	101
3.2.4	Global Warming Potential .....	104
3.3	Anthropogenic Effect on Climate .....	105
3.4	Controlling the Anthropogenic Effects on Climate.....	107
3.5	Concluding Remarks .....	115
	References .....	116
	Study Questions/Problems.....	117
<b>4</b>	<b>Energy Conservation .....</b>	<b>119</b>
4.1	Introduction.....	119
4.2	Energy Conservation and Sustainable Development .....	121
4.3	Energy Conservation Measures .....	124
4.4	Energy Conservation Policies: Illustrative Examples.....	131
4.5	Energy Management and Audit .....	136
4.6	Selection of More Efficient Energy Options.....	138
4.7	Concluding Remarks .....	142
	References .....	144
	Study Questions/Problems .....	144
<b>5</b>	<b>Sustainable Development and Energy Policies.....</b>	<b>147</b>
5.1	Introduction.....	147
5.2	Sustainable Energy Strategies and Policies .....	148
5.3	Modeling Instruments for Sustainable Energy Development and Policies .....	154

5.4	Case Studies .....	158
5.4.1	Sustainability Assessment of Solar Energy .....	158
5.4.2	Sustainability Assessment of Fossil Fuel Combustion ....	158
5.4.3	Assessment of Green Energy Strategies and Policies .....	158
5.5	Concluding Remarks .....	165
	References .....	166
	Study Questions/Problems .....	167
<b>6</b>	<b>Fossil Fuels and Alternative Fuels .....</b>	<b>169</b>
6.1	Introduction .....	169
6.2	Fossil Fuels .....	169
6.2.1	Coal .....	170
6.2.2	Petroleum .....	174
6.2.3	Natural Gas .....	177
6.3	Alternative Fuels .....	178
6.3.1	Biofuels .....	178
6.3.2	Other Synthetic Fuels and Fuel Blends .....	185
6.4	Case Study: Urea for Cofueling Vehicles .....	186
6.4.1	Analysis .....	186
6.4.2	Results .....	192
6.5	Concluding Remarks .....	198
	References .....	200
	Study Questions/Problems .....	200
<b>7</b>	<b>Ammonia as a Potential Substance .....</b>	<b>203</b>
7.1	Introduction .....	203
7.2	Ammonia Synthesis .....	204
7.3	Ammonia Storage .....	207
7.4	Ammonia Use in Power Generation Systems .....	209
7.5	Hydrogen from Ammonia Route .....	211
7.6	Thermo-Catalytic $\text{NH}_3$ Decomposition and Hydrogen Separation .....	216
7.7	Simultaneous Ammonia Use as Fuel and Working Fluid .....	218
7.8	Simultaneous Use of Ammonia as Fuel and Refrigerant .....	220
7.9	Performance Analysis of Ammonia-Fueled Systems .....	225
7.10	Concluding Remarks .....	229
	References .....	231
	Study Questions/Problems .....	232
<b>8</b>	<b>Nuclear Energy .....</b>	<b>233</b>
8.1	Introduction .....	233
8.2	Historical Perspective .....	233

8.3	Basic Elements of Nuclear Power.....	235
8.3.1	Atomic Structure .....	236
8.3.2	Nuclear Reactions: Fission and Fusion .....	238
8.3.3	Nuclear Radiations and Decay Reactions.....	243
8.3.4	Available Energy from Uranium Fuel .....	244
8.3.5	Available Energy from Nuclear Fusion.....	245
8.4	Controlled Generation of Nuclear Heat.....	247
8.5	Nuclear Power Reactors.....	253
8.6	Nuclear Fuels and Reserves .....	258
8.7	Nuclear Fuel Cycle and Enrichment Process .....	260
8.8	Nuclear Safety and Waste Disposal.....	260
8.9	Radiation Issues .....	263
8.10	Applications of Nuclear Energy .....	264
8.10.1	Nuclear Power Production.....	265
8.10.2	Nuclear Hydrogen Production.....	266
8.11	Case Studies .....	267
8.11.1	Upgrading Nuclear Heat from Current Reactors to Generate Hydrogen .....	267
8.11.2	Nuclear Heat for Desalination and Water Splitting.....	272
8.12	Concluding Remarks .....	279
	References.....	280
	Study Questions/Problems .....	281
<b>9</b>	<b>Renewable Energies .....</b>	<b>283</b>
9.1	Introduction.....	283
9.2	Solar Energy .....	284
9.2.1	Thermodynamic Limits of Solar Energy Conversion .....	286
9.2.2	Solar Thermal Energy.....	302
9.2.3	Solar Electricity .....	317
9.2.4	Solar to Biochemical Energy Conversion .....	324
9.2.5	Solar Multigeneration Systems .....	325
9.3	Wind Energy.....	333
9.3.1	Thermodynamic Limits of Wind Energy Conversion .....	335
9.3.2	Types of Wind Turbines .....	344
9.3.3	Wind Power Plants .....	346
9.3.4	Hydrogen Production from Wind Electricity .....	348
9.4	Geothermal Energy .....	348
9.4.1	Thermodynamic Limits of Geothermal Energy Conversion .....	349
9.4.2	Geothermal Power Plants .....	352
9.4.3	Thermal Applications .....	359
9.4.4	Geothermal-Based Hydrogen Production.....	360
9.4.5	District Energy .....	360

9.5	Hydro Energy.....	362
9.6	Biomass Energy .....	365
9.6.1	Thermodynamic Limits of Biomass Energy Conversion .....	366
9.6.2	Conversion of Biomass in Biofuels.....	370
9.6.3	Electricity Generation.....	372
9.7	Ocean Thermal Energy.....	377
9.8	Tidal and Wave Energy .....	379
9.9	Concluding Remarks .....	382
	References.....	384
	Study Questions/Problems .....	386
<b>10</b>	<b>District Energy Systems.....</b>	<b>389</b>
10.1	Introduction.....	389
10.2	Distributed Energy Systems Description.....	393
10.2.1	Historical Development and Perspectives of District Energy Systems .....	393
10.2.2	Cogeneration as a Key Part of District Energy Systems.....	394
10.2.3	Technological Aspects.....	396
10.3	Environmental Impact .....	400
10.4	Role in Sustainable Development .....	402
10.5	Thermodynamic Analysis .....	404
10.6	Economic Analysis .....	410
10.7	Case Studies .....	416
10.7.1	Case Study I .....	417
10.7.2	Case Study II .....	422
10.8	Concluding Remarks .....	425
	References.....	427
	Study Questions/Problems .....	428
<b>11</b>	<b>Energy Storage .....</b>	<b>431</b>
11.1	Introduction.....	431
11.2	Energy Demand.....	434
11.3	Storable Energies .....	435
11.4	Energy Storage Methods .....	436
11.4.1	Electrical Charge Storage in Capacitors .....	436
11.4.2	Electrochemical Energy Storage in Batteries .....	438
11.4.3	Kinetic Energy Storage in Flywheels .....	440
11.4.4	Storing Gravitational Potential Energy Through Pumped Hydrostorage .....	442
11.4.5	Thermomechanical Energy Storage in Compressed Air .....	443

11.4.6	Chemical Energy Storage in Synthetic Fuels .....	445
11.4.7	Thermochemical Energy Storage with Chemical Heat Pump Systems.....	446
11.4.8	Thermal Energy Storage.....	447
11.4.9	Comparison of Energy Storage Methods.....	447
11.5	Methods of Analysis of Energy Storage Systems.....	448
11.6	Thermal Energy.....	454
11.6.1	Thermal Energy Sources .....	454
11.6.2	TES for Cooling and Heating .....	455
11.6.3	Benefits of a TES System .....	456
11.6.4	Methods of Sensible and Latent TES .....	457
11.7	Case Studies: New Energy Storage Systems and Applications .....	460
11.7.1	Energy and Exergy Efficiencies of a Sensible Heat Thermal Storage System.....	461
11.7.2	Efficiency of a Cold Storage System .....	463
11.7.3	Fundamental Optimal Configuration for Underground Thermal Storage .....	465
11.7.4	Constructal Tree-Shaped Cold Storage Device .....	468
11.8	Concluding Remarks .....	474
	References.....	477
	Study Questions/Problems .....	477
<b>12</b>	<b>Integrated Multigeneration Energy Systems.....</b>	<b>479</b>
12.1	Introduction.....	479
12.2	System Integration.....	480
12.3	Multigeneration.....	485
12.4	Hybridization .....	495
12.5	Economic Aspects of Multigeneration Systems.....	499
12.6	Case Studies .....	502
12.6.1	Power, Hydrogen, and Oxygen Multigeneration Using Nuclear Energy .....	502
12.6.2	Integration of SOFC and Rankine Cycles for Tri-Generation .....	505
12.6.3	Tri-Generation System with Combined Brayton and Absorption Cycles .....	508
12.6.4	Integrated Rankine and Absorption Cycles for Power and Refrigeration.....	511
12.6.5	Tri-Generation with Integrated Absorption Refrigeration with Ammonia Turbine.....	512
12.7	Concluding Remarks .....	514
	References.....	516
	Study Questions/Problems .....	517

<b>13</b>	<b>Hydrogen and Fuel Cell Systems.....</b>	<b>519</b>
13.1	Introduction.....	519
13.2	Hydrogen .....	520
13.3	Hydrogen Economy .....	521
13.4	Hydrogen Production Methods.....	522
13.4.1	Electricity-Driven Hydrogen Production Methods .....	525
13.4.2	Thermally-Driven Hydrogen Production Methods .....	537
13.4.3	Electrothermally-Driven Hybrid Hydrogen Production .....	555
13.4.4	Photonic Energy-Driven Hydrogen Production Methods.....	576
13.4.5	Biochemical Methods for Hydrogen Production .....	583
13.4.6	Hybrid Methods for Hydrogen Production .....	585
13.5	Hydrogen Storage .....	588
13.6	Hydrogen Transportation and Distribution .....	593
13.7	Hydrogen Utilization.....	594
13.8	Fuel Cells.....	595
13.9	Fuel Cell Types and Classification.....	596
13.10	Fuel Cell Systems and Applications .....	601
13.11	Integrated Fuel Cell Systems.....	607
13.12	Fuel Cells: Analysis and Modeling .....	610
13.12.1	Classification of Fuel Cell Models.....	610
13.12.2	Fundamental Equations and Definitions .....	612
13.12.3	Case Study: Design Optimization of a Fuel Cell System .....	615
13.13	Case Study: Environmental Impact, Efficiency, and Sustainability Assessment .....	622
13.14	Concluding Remarks .....	626
	References.....	629
	Study Questions/Problems .....	631
<b>14</b>	<b>Carbon Dioxide Technologies .....</b>	<b>633</b>
14.1	Introduction .....	633
14.2	Thermophysical Properties of Carbon Dioxide.....	633
14.3	Technologies Using CO <sub>2</sub> as Heat Transfer Medium, Refrigerant, or Working Fluid .....	638
14.4	Supercritical Carbon Dioxide Technologies in Process Industries.....	643
14.5	Technologies for Carbon Dioxide Capture from Flue Gas .....	646
14.6	Transportation and Sequestration Technologies for Carbon Dioxide.....	653
14.7	Case Study .....	657

14.8	Concluding Remarks .....	660
	References .....	661
	Study Questions/Problems .....	662
<b>15</b>	<b>Life-Cycle Assessment.....</b>	<b>663</b>
15.1	Introduction.....	663
15.2	General Description of LCA Methodology .....	665
15.3	Exergetic Life-Cycle Analysis .....	669
15.4	Case Studies .....	673
15.4.1	Comparative LCA of Hydrogen–Fuel Cell vs. Gasoline Vehicles .....	673
15.4.2	Comparative Life-Cycle Assessment of Conventional and Alternative Vehicles.....	678
15.4.3	Comparative LCA of Hydrogen Production from Renewable Sources.....	682
15.4.4	LCA of Nuclear-Based Hydrogen Production by Thermochemical Water Splitting.....	691
15.5	Concluding Remarks .....	697
	References .....	699
	Study Questions/Problems.....	700
<b>16</b>	<b>Industrial Ecology .....</b>	<b>701</b>
16.1	Introduction.....	701
16.2	Relevant Natural and Industrial Cycles .....	702
16.3	Methods of Analysis in Industrial Ecology .....	711
16.4	Case Study .....	715
16.5	Concluding Remarks .....	719
	References.....	720
	Study Questions/Problems .....	721
<b>17</b>	<b>Sectorial Energy and Exergy Utilization .....</b>	<b>723</b>
17.1	Introduction.....	723
17.2	Thermodynamic Modeling at the Sectorial Level .....	724
17.3	Residential, Commercial, and Public Sectors .....	727
17.4	Industrial Sector .....	733
17.5	Agricultural Sector.....	736
17.6	Transportation Sector.....	739
17.7	Electric Utility Sector .....	740
17.8	Case Study: Sectorial Exergy Utilization in Canada.....	742
17.9	Concluding Remarks .....	748
	References.....	750
	Study Questions/Problems .....	751

<b>18 Economic Analysis.....</b>	<b>753</b>
18.1 Introduction.....	753
18.2 Elements of Financing and Engineering Economics.....	755
18.2.1 Rate of Discounting the Future.....	755
18.2.2 Inflation Rate .....	759
18.2.3 Real Rate.....	761
18.2.4 Price Escalation.....	763
18.2.5 Levelizing.....	767
18.2.6 Taxation.....	772
18.2.7 Loans.....	775
18.3 Technical and Economic Criteria for Sustainable Energy Systems.....	775
18.4 Concluding Remarks .....	778
References.....	779
Study Questions/Problems .....	780
 <b>Appendix A .....</b>	 <b>783</b>
 <b>Appendix B.....</b>	 <b>785</b>

Sustainable Energy Systems and Applications

Dincer, I.; Zamfirescu, C.

2012, XVII, 816 p., Hardcover

ISBN: 978-0-387-95860-6
