

# Contents

**Interdependence of Sections** . . . . . xv

**Suggested Course Outlines** . . . . . xvii

**Part I    Analysis on Riemann Surfaces**

**1    Complex Analysis in  $\mathbb{C}$**  . . . . . 3

    1.1   Holomorphic Functions . . . . . 3

    1.2   Local Solutions of the Cauchy–Riemann Equation . . . . . 6

    1.3   Power Series Representation . . . . . 12

    1.4   Complex Differentiability . . . . . 16

    1.5   The Holomorphic Inverse Function Theorem in  $\mathbb{C}$  . . . . . 18

    1.6   Examples of Holomorphic Functions . . . . . 21

**2    Riemann Surfaces and the  $L^2 \bar{\partial}$ -Method for Scalar-Valued Forms** . . 25

    2.1   Definitions and Examples . . . . . 26

    2.2   Holomorphic Functions and Mappings . . . . . 30

    2.3   Holomorphic Attachment . . . . . 35

    2.4   Holomorphic Tangent Bundle . . . . . 38

    2.5   Differential Forms on a Riemann Surface . . . . . 45

    2.6    $L^2$  Scalar-Valued Differential Forms on a Riemann Surface . . . . 53

    2.7   The Distributional  $\bar{\partial}$  Operator on Scalar-Valued Forms . . . . . 60

    2.8   Curvature and the Fundamental Estimate for Scalar-Valued Forms . 63

    2.9   The  $L^2 \bar{\partial}$ -Method for Scalar-Valued Forms of Type  $(1, 0)$  . . . . . 65

    2.10 Existence of Meromorphic 1-Forms and Meromorphic Functions . 67

    2.11 Radó’s Theorem on Second Countability . . . . . 71

    2.12 The  $L^2 \bar{\partial}$ -Method for Scalar-Valued Forms of Type  $(0, 0)$  . . . . . 73

    2.13 Topological Hulls and Chains to Infinity . . . . . 77

    2.14 Construction of a Subharmonic Exhaustion Function . . . . . 82

    2.15 The Mittag-Leffler Theorem . . . . . 88

    2.16 The Runge Approximation Theorem . . . . . 91

<b>3</b>	<b>The <math>L^2 \bar{\partial}</math>-Method in a Holomorphic Line Bundle</b>	101
3.1	Holomorphic Line Bundles	101
3.2	Sheaves Associated to a Holomorphic Line Bundle	115
3.3	Divisors	119
3.4	The $\bar{\partial}$ Operator and Dolbeault Cohomology	124
3.5	Hermitian Holomorphic Line Bundles	128
3.6	$L^2$ Forms with Values in a Hermitian Holomorphic Line Bundle	131
3.7	The Connection and Curvature in a Line Bundle	134
3.8	The Distributional $\bar{\partial}$ Operator in a Holomorphic Line Bundle	139
3.9	The $L^2 \bar{\partial}$ -Method for Line-Bundle-Valued Forms of Type $(1, 0)$	140
3.10	The $L^2 \bar{\partial}$ -Method for Line-Bundle-Valued Forms of Type $(0, 0)$	142
3.11	Positive Curvature on an Open Riemann Surface	146
3.12	The Weierstrass Theorem	151

## Part II Further Topics

<b>4</b>	<b>Compact Riemann Surfaces</b>	157
4.1	Existence of Holomorphic Sections on a Compact Riemann Surface	157
4.2	Positive Curvature on a Compact Riemann Surface	160
4.3	Equivalence of Positive Curvature and Positive Degree	162
4.4	A Finiteness Theorem	164
4.5	The Riemann–Roch Formula	165
4.6	Statement of the Serre Duality Theorem	167
4.7	Statement of the $\bar{\partial}$ -Hodge Decomposition Theorem	177
4.8	Proof of Serre Duality and $\bar{\partial}$ -Hodge Decomposition	181
4.9	Hodge Decomposition for Scalar-Valued Forms	185
<b>5</b>	<b>Uniformization and Embedding of Riemann Surfaces</b>	191
5.1	Holomorphic Covering Spaces	192
5.2	The Riemann Mapping Theorem in the Plane	204
5.3	Holomorphic Attachment of Caps	207
5.4	Exhaustion by Domains with Circular Boundary Components	209
5.5	Koebe Uniformization	211
5.6	Automorphisms and Quotients of $\mathbb{C}$	216
5.7	$\text{Aut}(\mathbb{P}^1)$ and Uniqueness of the Quotient	218
5.8	Automorphisms of the Disk	220
5.9	Classification of Riemann Surfaces as Quotient Spaces	224
5.10	Smooth Jordan Curves and Homology	228
5.11	Separating Smooth Jordan Curves	236
5.12	Holomorphic Attachment and Removal of Tubes	241
5.13	Tubes in a Compact Riemann Surface	249
5.14	Tubes in an Arbitrary Riemann Surface	254
5.15	Nonseparating Smooth Jordan Curves	264
5.16	Canonical Homology Bases in a Compact Riemann Surface	267
5.17	Complements of Connected Closed Subsets of $\mathbb{P}^1$	275
5.18	Embedding of an Open Riemann Surface into $\mathbb{C}^3$	279

5.19	Embedding of a Compact Riemann Surface into $\mathbb{P}^n$	290
5.20	Finite Holomorphic Branched Coverings	294
5.21	Abel's Theorem	302
5.22	The Abel–Jacobi Embedding	306
<b>6</b>	<b>Holomorphic Structures on Topological Surfaces</b>	<b>311</b>
6.1	Almost Complex Structures on Smooth Surfaces	311
6.2	Construction of a Special Local Coordinate	320
6.3	Regularity of Solutions on an Almost Complex Surface	322
6.4	The Distributional $\bar{\partial}$ , Connection, and Curvature	326
6.5	$L^2$ Solutions on an Almost Complex Surface	328
6.6	Proof of Integrability	329
6.7	Statement of Schönflies' Theorem	332
6.8	Harmonic Functions and the Dirichlet Problem	338
6.9	Proof of Schönflies' Theorem	350
6.10	Orientable Topological Surfaces	356
6.11	Smooth Structures on Second Countable Topological Surfaces	364
<b>Part III Background Material</b>		
<b>7</b>	<b>Background Material on Analysis in <math>\mathbb{R}^n</math> and Hilbert Space Theory</b>	<b>375</b>
7.1	Measures and Integration	375
7.2	Differentiation and Integration in $\mathbb{R}^n$	382
7.3	$C^\infty$ Approximation	390
7.4	Differential Operators and Formal Adjoints	392
7.5	Hilbert Spaces	397
7.6	Weak Sequential Compactness	403
<b>8</b>	<b>Background Material on Linear Algebra</b>	<b>407</b>
8.1	Linear Maps, Linear Functionals, and Complexifications	407
8.2	Exterior Products	409
8.3	Tensor Products	412
<b>9</b>	<b>Background Material on Manifolds</b>	<b>415</b>
9.1	Topological Spaces	415
9.2	The Definition of a Manifold	419
9.3	The Topology of Manifolds	423
9.4	The Tangent and Cotangent Bundles	428
9.5	Differential Forms on Smooth Curves and Surfaces	437
9.6	Measurability in a Smooth Manifold	447
9.7	Lebesgue Integration on Curves and Surfaces	449
9.8	Linear Differential Operators on Manifolds	462
9.9	$C^\infty$ Embeddings	465
9.10	Classification of Second Countable 1-Dimensional Manifolds	469
9.11	Riemannian Metrics	475

<b>10</b>	<b>Background Material on Fundamental Groups, Covering Spaces, and (Co)homology</b>	477
10.1	The Fundamental Group	477
10.2	Elementary Properties of Covering Spaces	483
10.3	The Universal Covering	489
10.4	Deck Transformations	492
10.5	Line Integrals on $\mathcal{C}^\infty$ Surfaces	498
10.6	Homology and Cohomology of Second Countable $\mathcal{C}^\infty$ Surfaces	503
10.7	Homology and Cohomology of Second Countable $\mathcal{C}^0$ Surfaces	511
<b>11</b>	<b>Background Material on Sobolev Spaces and Regularity</b>	531
11.1	Sobolev Spaces	532
11.2	Uniform Convergence of Derivatives	534
11.3	The Strong Friedrichs Lemma	535
11.4	The Sobolev Lemma	541
11.5	Proof of the Regularity Theorem	542
