Part I Problems

1	Algebra	3
1.1	An Algebraic Identity	3
1.2	Cauchy–Schwarz Revisited	7
1.3	Easy Ways Through Absolute Values	11
1.4	Parameters	14
1.5	Take the Conjugate!	17
1.6	Inequalities with Convex Functions	20
1.7	Induction at Work	24
1.8	Roots and Coefficients	27
1.9	The Rearrangements Inequality	31
2	Geometry and Trigonometry	37
2.1	Geometric Inequalities	37
2.2	An Interesting Locus	40
2.3	Cyclic Quads	45
2.4	Equiangular Polygons	50
2.5	More on Equilateral Triangles	54
2.6	The “Carpets” Theorem	58
2.7	Quadrilaterals with an Inscribed Circle	62
2.8	Dr. Trig Learns Complex Numbers	66
3	Number Theory and Combinatorics	71
3.1	Arrays of Numbers	71
3.2	Functions Defined on Sets of Points	74
3.3	Count Twice!	77
3.4	Sequences of Integers	81
3.5	Equations with Infinitely Many Solutions	85
3.6	Equations with No Solutions	88
3.7	Powers of 2	90
3.8	Progressions	93

3.9	The Marriage Lemma	96
Part II Solutions		
4	Algebra	101
4.1	An Algebraic Identity	101
4.2	Cauchy–Schwarz Revisited	109
4.3	Easy Ways Through Absolute Values	116
4.4	Parameters	120
4.5	Take the Conjugate!	124
4.6	Inequalities with Convex Functions	130
4.7	Induction at Work	134
4.8	Roots and Coefficients	138
4.9	The Rearrangements Inequality	144
5	Geometry and Trigonometry	149
5.1	Geometric Inequalities	149
5.2	An Interesting Locus	156
5.3	Cyclic Quads	163
5.4	Equiangular Polygons	171
5.5	More on Equilateral Triangles	176
5.6	The “Carpets” Theorem	181
5.7	Quadrilaterals with an Inscribed Circle	185
5.8	Dr. Trig Learns Complex Numbers	193
6	Number Theory and Combinatorics	197
6.1	Arrays of Numbers	197
6.2	Functions Defined on Sets of Points	201
6.3	Count Twice!	205
6.4	Sequences of Integers	213
6.5	Equations with Infinitely Many Solutions	219
6.6	Equations with No Solutions	224
6.7	Powers of 2	229
6.8	Progressions	237
6.9	The Marriage Lemma	244
	Glossary	249
	Index of Notations	251
	Index to the Problems	253

Mathematical Olympiad Treasures

Andreescu, T.; Enescu, B.

2012, VIII, 253 p., Hardcover

ISBN: 978-0-8176-8252-1

A product of Birkhäuser Basel
