Prologue	xix
P1 Overview	xix
P2 Numerical Analysis Software	xxi
P3 Textbooks and Monographs	xxi
P3.1 Selected Textbooks on Numerical Analysis	xxi
P3.2 Monographs and Books on Specialized Topics	xxiii
P4 Journals	xxvi
1 Machine Arithmetic and Related Matters	1
1.1 Real Numbers, Machine Numbers, and Rounding	2
1.1.1 Real Numbers	2
1.1.2 Machine Numbers	3
1.1.3 Rounding	5
1.2 Machine Arithmetic	7
1.2.1 A Model of Machine Arithmetic	7
1.2.2 Error Propagation in Arithmetic Operations: Cancellation Error	8
1.3 The Condition of a Problem	11
1.3.1 Condition Numbers	13
1.3.2 Examples	16
1.4 The Condition of an Algorithm	24
1.5 Computer Solution of a Problem; Overall Error	27
1.6 Notes to Chapter 1	28
Exercises and Machine Assignments to Chapter 1	31
Exercises	31
Machine Assignments	39
Selected Solutions to Exercises	44
Selected Solutions to Machine Assignments	48
2 Approximation and Interpolation	55
2.1 Least Squares Approximation	59
2.1.1 Inner Products	59
2.1.2 The Normal Equations	61

2.1.3	Least Squares Error; Convergence.....	64
2.1.4	Examples of Orthogonal Systems	67
2.2	Polynomial Interpolation	73
2.2.1	Lagrange Interpolation Formula: Interpolation Operator ...	74
2.2.2	Interpolation Error	77
2.2.3	Convergence	81
2.2.4	Chebyshev Polynomials and Nodes	86
2.2.5	Barycentric Formula	91
2.2.6	Newton's Formula	93
2.2.7	Hermite Interpolation	97
2.2.8	Inverse Interpolation	100
2.3	Approximation and Interpolation by Spline Functions	101
2.3.1	Interpolation by Piecewise Linear Functions	102
2.3.2	A Basis for $\mathbb{S}_1^0(\Delta)$	104
2.3.3	Least Squares Approximation	106
2.3.4	Interpolation by Cubic Splines	107
2.3.5	Minimality Properties of Cubic Spline Interpolants	110
2.4	Notes to Chapter 2	112
	Exercises and Machine Assignments to Chapter 2	118
	Exercises	118
	Machine Assignments	134
	Selected Solutions to Exercises	138
	Selected Solutions to Machine Assignments	150
3	Numerical Differentiation and Integration	159
3.1	Numerical Differentiation	159
3.1.1	A General Differentiation Formula for Unequally Spaced Points	159
3.1.2	Examples	161
3.1.3	Numerical Differentiation with Perturbed Data	163
3.2	Numerical Integration	165
3.2.1	The Composite Trapezoidal and Simpson's Rules	165
3.2.2	(Weighted) Newton–Cotes and Gauss Formulae	169
3.2.3	Properties of Gaussian Quadrature Rules	175
3.2.4	Some Applications of the Gauss Quadrature Rule	178
3.2.5	Approximation of Linear Functionals: Method of Interpolation vs. Method of Undetermined Coefficients	182
3.2.6	Peano Representation of Linear Functionals	187
3.2.7	Extrapolation Methods	190
3.3	Notes to Chapter 3	195
	Exercises and Machine Assignments to Chapter 3	200
	Exercises	200
	Machine Assignments	214
	Selected Solutions to Exercises	219
	Selected Solutions to Machine Assignments	232

4 Nonlinear Equations	253
4.1 Examples	254
4.1.1 A Transcendental Equation	254
4.1.2 A Two-Point Boundary Value Problem	254
4.1.3 A Nonlinear Integral Equation	256
4.1.4 s -Orthogonal Polynomials	257
4.2 Iteration, Convergence, and Efficiency	258
4.3 The Methods of Bisection and Sturm Sequences	261
4.3.1 Bisection Method	261
4.3.2 Method of Sturm Sequences	264
4.4 Method of False Position	266
4.5 Secant Method	269
4.6 Newton's Method	274
4.7 Fixed Point Iteration	278
4.8 Algebraic Equations	280
4.8.1 Newton's Method Applied to an Algebraic Equation	280
4.8.2 An Accelerated Newton Method for Equations with Real Roots	282
4.9 Systems of Nonlinear Equations	284
4.9.1 Contraction Mapping Principle	284
4.9.2 Newton's Method for Systems of Equations	285
4.10 Notes to Chapter 4	287
Exercises and Machine Assignments to Chapter 4	292
Exercises	292
Machine Assignments	302
Selected Solutions to Exercises	306
Selected Solutions to Machine Assignments	318
5 Initial Value Problems for ODEs: One-Step Methods	325
5.1 Examples	326
5.2 Types of Differential Equations	328
5.3 Existence and Uniqueness	331
5.4 Numerical Methods	332
5.5 Local Description of One-Step Methods	333
5.6 Examples of One-Step Methods	335
5.6.1 Euler's Method	335
5.6.2 Method of Taylor Expansion	336
5.6.3 Improved Euler Methods	337
5.6.4 Second-Order Two-Stage Methods	339
5.6.5 Runge–Kutta Methods	341
5.7 Global Description of One-Step Methods	343
5.7.1 Stability	344
5.7.2 Convergence	347
5.7.3 Asymptotics of Global Error	348

5.8	Error Monitoring and Step Control	352
5.8.1	Estimation of Global Error	352
5.8.2	Truncation Error Estimates	354
5.8.3	Step Control	357
5.9	Stiff Problems	360
5.9.1	A-Stability	361
5.9.2	Padé Approximation	362
5.9.3	Examples of A-Stable One-Step Methods	367
5.9.4	Regions of Absolute Stability	370
5.10	Notes to Chapter 5	371
	Exercises and Machine Assignments to Chapter 5	378
	Exercises	378
	Machine Assignments	383
	Selected Solutions to Exercises	387
	Selected Solutions to Machine Assignments	392
6	Initial Value Problems for ODEs: Multistep Methods	399
6.1	Local Description of Multistep Methods	399
6.1.1	Explicit and Implicit Methods	399
6.1.2	Local Accuracy	401
6.1.3	Polynomial Degree vs. Order	405
6.2	Examples of Multistep Methods	408
6.2.1	Adams–Bashforth Method	409
6.2.2	Adams–Moulton Method	412
6.2.3	Predictor–Corrector Methods	413
6.3	Global Description of Multistep Methods	416
6.3.1	Linear Difference Equations	416
6.3.2	Stability and Root Condition	420
6.3.3	Convergence	424
6.3.4	Asymptotics of Global Error	426
6.3.5	Estimation of Global Error	430
6.4	Analytic Theory of Order and Stability	433
6.4.1	Analytic Characterization of Order	433
6.4.2	Stable Methods of Maximum Order	441
6.4.3	Applications	446
6.5	Stiff Problems	450
6.5.1	A-Stability	450
6.5.2	$A(\alpha)$ -Stability	452
6.6	Notes to Chapter 6	453
	Exercises and Machine Assignments to Chapter 6	456
	Exercises	456
	Machine Assignments	459
	Selected Solutions to Exercises	461
	Selected Solutions to Machine Assignments	466

7 Two-Point Boundary Value Problems for ODEs	471
7.1 Existence and Uniqueness	474
7.1.1 Examples	474
7.1.2 A Scalar Boundary Value Problem	476
7.1.3 General Linear and Nonlinear Systems	481
7.2 Initial Value Techniques	482
7.2.1 Shooting Method for a Scalar Boundary Value Problem	483
7.2.2 Linear and Nonlinear Systems	485
7.2.3 Parallel Shooting	490
7.3 Finite Difference Methods	494
7.3.1 Linear Second-Order Equations	494
7.3.2 Nonlinear Second-Order Equations	500
7.4 Variational Methods	503
7.4.1 Variational Formulation	503
7.4.2 The Extremal Problem	506
7.4.3 Approximate Solution of the Extremal Problem	507
7.5 Notes to Chapter 7	509
Exercises and Machine Assignments to Chapter 7	512
Exercises	512
Machine Assignments	518
Selected Solutions to Exercises	521
Selected Solutions to Machine Assignments	532
References	543
Index	571
