1	Introduction	1
2	Dynamic Strategic Interactions in Economic Systems	7
2.1	Dynamic Interactive Economic System	7
2.1.1	Basic Formulation	7
2.1.2	Typical Dynamic Economic Game Paradigms	9
2.1.3	Market Equilibrium	18
2.2	Market Outcomes Under Open-Loop Nash Equilibria	19
2.2.1	Characterization of Open-Loop Equilibria	19
2.2.2	Open-Loop Solution in Competitive Advertising	21
2.3	Market Outcomes Under Feedback Equilibria	23
2.3.1	Characterization of Feedback Equilibria	23
2.3.2	Feedback Equilibria in Resource Extraction	28
2.3.3	Feedback Solution in Competitive Advertising	32
2.3.4	Duopolistic Competition in Infinite Horizon	34
2.4	Dynamic Stochastic Interactive Economic System	36
2.4.1	Game Formulation and Solution Characterization	36
2.4.2	An Application of Stochastic Differential Games in Resource Extraction	39
2.4.3	Infinite-Horizon Resource Extraction	41
2.5	Exercises	43
3	Dynamic Economic Optimization: Group Optimality and Individual Rationality	47
3.1	Group Optimality	48
3.1.1	Optimal Strategies and Cooperative State Trajectories	48
3.1.2	Group Optimality in Resource Extraction	51
3.1.3	Group Optimality in Infinite-Horizon Problems	53
3.2	Individual Rationality	57
3.2.1	Lump-Sum and Continuous Transfer Payments	57
3.2.2	Individually Rational Imputation in Cooperative Resource Extraction	59

3.3	Individual Rationality Under Infinite Horizon	62
3.3.1	Individually Rational at the Outset	62
3.3.2	Individually Rational Throughout the Cooperative Duration	64
3.3.3	Individually Rationality in Resource Extraction	65
3.4	Cooperative Economic Games Satisfying Individual Rationality and Group Optimality	69
3.4.1	Cooperative Resource Extraction Game	69
3.4.2	Fully Coordinated Pollution Control	72
3.5	Exercises	75
4	Time Consistency and Optimal-Trajectory-Subgame Consistent Economic Optimization	77
4.1	Solution in Dynamic Economic Optimization	77
4.2	Principle of Time Consistency	80
4.2.1	Characterization of Time Consistent Solution	81
4.2.2	Time Consistent Cooperative Strategies	81
4.2.3	Time Consistency in Imputation and Payoff Distribution Procedure	82
4.3	Payoff Distribution Procedure Derivation and Time (Optimal- Trajectory-Subgame) Consistent Solutions	84
4.3.1	Derivation of Payoff Distribution Procedures	84
4.3.2	Time (Optimal-Trajectory-Subgame) Consistent Solution	86
4.4	Solutions from Specific Optimality Principle	89
4.5	An Illustration in Cooperative Fishery	93
4.6	Consistent Economic Optimization Under Infinite Horizon	98
4.6.1	Group Optimal Cooperative Strategies	100
4.6.2	Consistent Imputation and Payoff Distribution Procedure	101
4.6.3	Derivation of Consistent Payoff Distribution Procedure	102
4.6.4	Time (Optimal-Trajectory-Subgame) Consistent Solution	105
4.7	Infinite-Horizon Resource Extraction Optimization	106
4.8	Exercises	109
5	Dynamically Stable Cost-Saving Joint Venture	111
5.1	A Dynamic Model of Corporate Joint Venture	112
5.2	Time (Optimal-Trajectory-Subgame) Consistent Solution in Joint Venture	114
5.2.1	Imputation Scheme	115
5.2.2	Time (Optimal-Trajectory-Subgame) Consistent Venture Profit Distribution	116
5.3	A Cost-Saving Joint Venture	117
5.3.1	Joint Venture Profit and Cost Saving	119
5.3.2	Time (Optimal-Trajectory-Subgame) Consistent Venture Profit Sharing	121
5.4	A Shapley Value Solution to Joint Venture	124
5.4.1	Dynamic Shapley Value Imputation	126
5.4.2	The PDP for Shapley Value	127

5.5	A Joint Venture with Shapley Value Profit Sharing	128
5.5.1	Coalition Payoffs	129
5.5.2	PDP for Shapley Value	130
5.6	Infinite-Horizon Analysis	132
5.6.1	Dynamic Joint Venture	133
5.6.2	Time (Optimal-Trajectory-Subgame) Consistent Venture Profit Sharing	134
5.6.3	Shapley Value Profit Sharing	135
5.7	An Infinite-Horizon Joint Venture	137
5.7.1	Joint Venture and Costs	138
5.7.2	Time (Optimal-Trajectory-Subgame) Consistent Venture Profit Sharing	139
5.7.3	Shapley Value Solution	141
5.8	Exercises	143
	Appendix Proof of Proposition 5.2	144
6	Collaborative Environmental Management	147
6.1	An Analytical Framework	148
6.1.1	The Industrial Sector	148
6.1.2	Impacts and Accumulation Dynamics of Pollutants	149
6.1.3	The Governments' Objectives	149
6.2	Noncooperative Outcomes	150
6.3	Cooperative Arrangement	152
6.3.1	Group Optimality and Cooperative State Trajectory	152
6.3.2	Individually Rational and Time (Optimal-Trajectory-Subgame) Consistent Imputation	154
6.4	Benefit Distribution in Collaborative Environmental Management	155
6.5	Policy Implications	157
6.6	A Model of Transboundary Industrial Pollution Management	158
6.6.1	A Multinational Economy with Industrial Pollution	158
6.6.2	Noncooperative Outcomes	161
6.7	Collaborative Scheme in Transboundary Industrial Pollution Management	164
6.7.1	Cooperative Optimization and State Trajectory	164
6.7.2	Consistent Imputation and Benefit Distribution	167
6.8	Exercises	170
	Appendix 1 Proof of Proposition 6.2	171
	Appendix 2 Proof of Proposition 6.3	173
7	Dynamically Stable Dormant Firm Cartel	177
7.1	A Dynamic Oligopoly	177
7.1.1	Basic Settings	177
7.1.2	Market Outcome	179
7.2	Time (Optimal-Trajectory-Subgame) Consistent Cartel	181
7.2.1	Pareto Optimal Output Path	182
7.2.2	Imputation Scheme and Cartel Profit Sharing	184

7.3	A Dormant-Firm Cartel	186
7.4	Infinite-Horizon Cartel	191
7.4.1	Pareto Optimal Trajectory	194
7.4.2	Imputation Scheme and Cartel Profit Sharing	196
7.5	An Infinite-Horizon Dormant-Firm Cartel	197
7.5.1	Cartel Output and Optimal Resource Path	199
7.5.2	Sharing of Cartel Profits	200
7.6	Exercises	201
8	Subgame Consistent Economic Optimization Under Uncertainty . .	203
8.1	Dynamic Economic Optimization Under Uncertainty	204
8.2	Principle of Subgame Consistency	208
8.2.1	Subgame Consistent Solution	209
8.2.2	Subgame Consistency in Imputation and Payoff Distribution Procedure	209
8.3	Payoff Distribution Procedure and Subgame Consistent Solutions .	211
8.3.1	Payoff Distribution Procedures Leading to Subgame Consistent Solutions	211
8.3.2	Subgame Consistent Solution	214
8.3.3	Instantaneous Transfer Payments	216
8.4	An Illustration in Cooperative Fishery Under Uncertainty	216
8.4.1	Cooperative Extraction Under Uncertainty	218
8.4.2	Subgame Consistent Cooperative Extraction	220
8.5	Infinite-Horizon Consistent Economic Optimization Under Uncertainty	222
8.5.1	Group Optimal Cooperative Strategies	224
8.5.2	Subgame Consistent Imputation and Payoff Distribution Procedure	225
8.5.3	Payoff Distribution Procedure Leading to Subgame Consistency	227
8.5.4	Subgame Consistent Solution	230
8.6	Infinite-Horizon Cooperative Fishery Under Uncertainty	232
8.6.1	Cooperative Extraction	233
8.6.2	Subgame Consistent Payoff Distribution	235
8.7	Exercises	236
9	Cost-Saving Joint Venture Under Uncertainty	239
9.1	Dynamic Corporate Joint Venture Under Uncertainty	239
9.1.1	Joint Venture and Expected Profit Maximization	240
9.1.2	Subgame Consistent Joint Venture	243
9.2	A Cost-Saving Joint Venture with Stochasticity	245
9.2.1	Expected Venture Profit and Cost Savings	246
9.2.2	Subgame Consistent Venture Profit Sharing	249
9.3	A Shapley Value Solution to a Joint Venture Under Uncertainty . .	250
9.3.1	Expected Joint Venture Profits and Optimal Trajectory . . .	251
9.3.2	The PDP for Shapley Value	252

9.4	A Stochastic Joint Venture with Shapley Value Profit Sharing . . .	254
9.4.1	Expected Coalition Payoffs	254
9.4.2	Subgame Consistent Shapley Value Solution	256
9.5	Infinite-Horizon Analysis	257
9.5.1	Infinite-Horizon Dynamic Joint Venture	258
9.5.2	Subgame Consistent Venture Profit Sharing	259
9.5.3	Shapley Value Profit Sharing	261
9.6	An Infinite-Horizon Stochastic Joint Venture	262
9.6.1	Cost-Saving Joint Venture	263
9.6.2	Subgame Consistent Venture Profit Sharing	266
9.6.3	Shapley Value Solution	267
9.7	Exercises	268
10	Collaborative Environmental Management Under Uncertainty . . .	271
10.1	An Analytical Framework	272
10.1.1	The Industrial Sector	272
10.1.2	Impacts of Pollution and Stochastic Accumulation Dynamics	273
10.1.3	The Governments' Objectives	273
10.2	Noncooperative Outcomes	274
10.3	Cooperative Arrangement	276
10.3.1	Group Optimality and Cooperative State Trajectory	276
10.3.2	Imputation Scheme	279
10.4	Subgame Consistent Collaborative Environmental Management . .	279
10.5	A Model of Stochastic Industrial Pollution Management	280
10.5.1	A Multinational Economy with Industrial Pollution	280
10.5.2	Noncooperative Outcomes	283
10.6	Collaborative Scheme in Stochastic Industrial Pollution Management	286
10.6.1	Cooperative Optimization and State Trajectory	286
10.6.2	Subgame Consistent Solution and Benefit Distribution . . .	289
10.7	Exercises	291
11	Subgame Consistent Dormant Firm Cartel	295
11.1	A Stochastic Dynamic Oligopoly	295
11.1.1	Basic Settings	295
11.1.2	Market Outcome	297
11.2	Subgame Consistent Cartel	299
11.2.1	Pareto Optimal Output Path	300
11.2.2	Subgame Consistent Cartel Profit Sharing	302
11.3	A Dormant-Firm Cartel	304
11.4	Infinite-Horizon Cartel	309
11.4.1	Pareto Optimal Trajectory	312
11.4.2	Subgame Consistent Cartel Profit Sharing	314
11.5	An Infinite-Horizon Dormant-Firm Cartel	316
11.5.1	Cartel Output	317

11.5.2 Subgame Consistent Cartel Profits Sharing	319
11.6 Exercises	320
12 Dynamic Consistency in Discrete-Time Cooperative Games	323
12.1 Dynamic Games	323
12.1.1 Game Formulation	324
12.1.2 Noncooperative Outcome	324
12.2 Dynamic Cooperation	326
12.2.1 Group Optimality	327
12.2.2 Individual Rationality	328
12.3 Time Consistent Solutions and Payment Mechanism	329
12.3.1 Payoff Distribution Procedure	330
12.3.2 Time (Optimal-Trajectory-Subgame) Consistent Solution	331
12.4 An Illustration in Cooperative Resource Extraction	332
12.5 Exercises	335
Appendix 1 Proof of Proposition 12.1	336
Appendix 2 Proof of Proposition 12.2	339
13 Discrete-Time Cooperative Games Under Uncertainty	343
13.1 Stochastic Dynamic Games	344
13.1.1 Game Formulation	344
13.1.2 Noncooperative Solution	344
13.2 Dynamic Cooperation Under Uncertainty	345
13.2.1 Group Optimality	346
13.2.2 Individual Rationality	347
13.3 Subgame Consistent Solutions and Payment Mechanism	348
13.3.1 Payoff Distribution Procedure	349
13.3.2 Subgame Consistent Solution	350
13.4 Cooperative Resource Extraction Under Uncertainty	351
13.5 Exercises	355
Appendix 1 Proof of Theorem 13.1	356
Appendix 2 Proof of Proposition 13.1	359
Appendix 3 Proof of Proposition 13.2	362
Technical Appendixes: Dynamic Optimization Techniques	367
A.1 Dynamic Programming	367
A.2 Optimal Control	373
A.3 Stochastic Control	377
