

Contents

Preface, vii

1 Preliminaries, 1

Multisets, 1
Words, 1
Partially Ordered Sets, 2
Chain Conditions and Finiteness, 5
Lattices, 8
Equivalence Relations, 10
Cardinality, 12
Miscellanea, 15

2 Groups and Subgroups, 19

Operations on Sets, 19
Groups, 19
The Order of a Product, 26
Orders and Exponents, 28
Conjugation, 29
The Set Product, 31
Subgroups, 32
Finitely-Generated Groups, 35
The Lattice of Subgroups of a Group, 37
Cosets and Lagrange's Theorem, 41
Euler's Formula, 43
Cyclic Groups, 44
Homomorphisms of Groups, 46
More Groups, 46
*An Historical Perspective: Galois-Style Groups, 56
Exercises, 58

3 Cosets, Index and Normal Subgroups, 61

Cosets and Index, 61
Quotient Groups and Normal Subgroups, 65
Internal Direct Products, 72
Chain Conditions and Subnormality, 76

Subgroups of Index 2, 78
 Cauchy's Theorem, 79
 The Center of a Group; Centralizers, 81
 The Normalizer of a Subgroup, 82
 Simple Groups, 84
 Commutators of Elements, 84
 Commutators of Subgroups, 93
 *Multivariable Commutators, 95
 Exercises, 98

4 Homomorphisms, Chain Conditions and Subnormality, 105

Homomorphisms, 105
 Kernels and the Natural Projection, 108
 Groups of Small Order, 108
 A Universal Property and the Isomorphism Theorems, 110
 The Correspondence Theorem, 113
 Group Extensions, 115
 Inner Automorphisms, 119
 Characteristic Subgroups, 120
 Elementary Abelian Groups, 121
 Multiplication as a Permutation, 123
 The Frattini Subgroup of a Group, 127
 Subnormal Subgroups, 128
 Chain Conditions, 136
 Automorphisms of Cyclic Groups, 141
 Exercises, 144

5 Direct and Semidirect Products, 149

Complements and Essentially Disjoint Products, 149
 Product Decompositions, 151
 Direct Sums and Direct Products, 152
 Cancellation in Direct Sums, 157
 The Classification of Finite Abelian Groups, 158
 Properties of Direct Summands, 161
 xY -Groups, 164
 Behavior Under Direct Sum, 167
 When All Subgroups Are Normal, 169
 Semidirect Products, 171
 The External Semidirect Product, 175
 *The Wreath Product, 180
 Exercises, 185

6 Permutation Groups, 191

The Definition and Cycle Representation, 191
 A Fundamental Formula Involving Conjugation, 193
 Parity, 194
 Generating Sets for S_n and A_n , 195

Subgroups of S_n and A_n , 197
 The Alternating Group Is Simple, 197
 Some Counting, 200
 Exercises, 202

7 Group Actions; The Structure of p -Groups, 207

Group Actions, 207
 Congruence Relations on a G -Set, 211
 Translation by G , 212
 Conjugation by G on the Conjugates of a Subgroup, 214
 Conjugation by G on a Normal Subgroup, 214
 The Structure of Finite p -Groups, 215
 Exercises, 229

8 Sylow Theory, 235

Sylow Subgroups, 235
 The Normalizer of a Sylow Subgroup, 235
 The Sylow Theorems, 236
 Sylow Subgroups of Subgroups, 238
 Some Consequences of the Sylow Theorems, 239
 When All Sylow Subgroups Are Normal, 240
 When a Subgroup Acts Transitively; The Frattini Argument, 243
 The Search for Simplicity, 244
 Groups of Small Order, 250
 On the Existence of Complements: The Schur–Zassenhaus Theorem, 252
 *Sylow Subgroups of S_n , 258
 Exercises, 261

9 The Classification Problem for Groups, 263

The Classification Problem for Groups, 263
 The Classification Problem for Finite Simple Groups, 263
 Exercises, 271

10 Finiteness Conditions, 273

Groups with Operators, 273
 Ω -Series and Ω -Subnormality, 276
 Composition Series, 278
 The Remak Decomposition, 282
 Exercises, 288

11 Solvable and Nilpotent Groups, 291

Classes of Groups, 291
 Operations on Series, 293
 Closure Properties of Groups Defined by Series, 295
 Nilpotent Groups, 297
 Solvability, 305
 Exercises, 313

12 Free Groups and Presentations, 319

Free Groups, 319

Relatively Free Groups, 326

Presentations of a Group, 336

Exercises, 350

13 Abelian Groups, 353

An Abelian Group as a \mathbb{Z} -Module, 355

The Classification of Finitely-Generated Abelian Groups, 355

Projectivity and the Right-Inverse Property, 357

Injectivity and the Left-Inverse Property, 359

Exercises, 363

References, 367

List of Symbols, 371

Index, 373
