
Contents

1	Numbers and Sets	1
1.1	Numbers	1
1.2	Equations and Inequalities	10
1.3	Sums	17
1.4	Elements of Set Theory	25
1.5	Venn Diagrams	34
1.6	Averages	43
2	Counting	53
2.1	Basic Counting Principles	53
2.2	Arrangements	60
2.3	Selections	67
2.4	More About Selections	74
3	Probability	81
3.1	Events	81
3.2	Probability Measures	89
3.3	Non-uniform Probabilities	97
3.4	Counting and Probability	109
3.5	Stochastic Processes	116
3.6	More About Conditional Probability	125
3.7	Bayes' Formula and Applications	135

3.8	Further Examples of Bayes' Formula	143
3.9	Expected Values	149
4	Graph Theory	157
4.1	Relations	157
4.2	Graphs	165
4.3	Some Properties of Graphs	171
4.4	Euler's Theorem and Eulerizations	179
4.5	Types of Graphs	188
4.6	Hamiltonian Cycles	194
4.7	Graph Representations and Colorings	202
5	Linear Equations and Matrices	211
5.1	Coordinates and Lines	211
5.2	Systems of Linear Equations	219
5.3	Formal Solution of Systems of Equations	229
5.4	Pivoting	237
5.5	Matrices and Vectors	243
5.6	Vector and Matrix Products	252
5.7	Inverses	263
5.8	More About Inverses	270
6	Linear Programming	281
6.1	Linear Programming Problems	281
6.2	The Geometric Method	291
6.3	Linear Programming in Higher Dimensions	302
6.4	Pivoting in Linear Programming	309
6.5	The Simplex Method	322
6.6	The Two Phase Simplex Method	343
7	Theory of Games	359
7.1	Fully-Determined Games	359
7.2	2×2 Games	367

7.3	$2 \times n$ Games	374
7.4	General Matrix Games	380
8	Financial Mathematics	389
8.1	Simple Interest	389
8.2	Compound Interest	396
8.3	Regular Deposits	401
8.4	Exponential Growth	409
	Your Turn Solutions	417
	Answers to Exercises A	451
	Index	479
