

Contents

1 Fredholm Integral Equations of the Second Kind (Separable Kernel)	1
1.1 Tools of the Trade	2
1.2 An Illustrative Example	4
1.3 The Fredholm Theorems	13
2 Fredholm Integral Equations of the Second Kind (General Kernel)	31
2.1 Tools of the Trade	31
2.2 The Method of Successive Substitution	33
2.3 The Method of Successive Approximation	37
2.4 The Fredholm Theorems	48
2.5 Constructing the Resolvent Kernel	60
2.6 Numerical Methods	69
2.6.1 The Method of Uniform Approximation	69
2.6.2 The Method of Collocation	72
2.6.3 Quadrature Methods	78
3 Fredholm Integral Equations of the Second Kind (Hermitian Kernel)	85
3.1 Tools of the Trade	85
3.2 Hermitian Kernels and Operators	95
3.2.1 Properties of Hermitian Kernels and Operators	97
3.2.2 The Eigenvalues of a Hermitian Kernel	98
3.2.3 The Eigenfunctions of a Hermitian Kernel	105
3.3 Finite Bilinear Expansions	110
3.4 The Hilbert–Schmidt Theorem	120
3.5 Numerical Methods	140
3.5.1 The Method of Traces	140
3.5.2 The Method of Rayleigh and Ritz	142
4 Volterra Integral Equations	151
4.1 Tools of the Trade	152

4.2	The Method of Successive Approximation	153
4.3	Convolution Kernels	166
4.4	Equations of the First Kind	172
4.5	Numerical Methods	180
5	Differential and Integro-differential Equations	183
5.1	Tools of the Trade	183
5.2	Boundary Value Problems	189
5.2.1	Conversion to a Fredholm Integral Equation	189
5.2.2	Conversion from a Fredholm Integral Equation	191
5.3	Initial Value Problems	197
5.3.1	Conversion to a Volterra Integral Equation	197
5.3.2	Conversion from a Volterra Integral Equation	198
5.4	Integro-differential Equations	205
6	Nonlinear Integral Equations	211
6.1	Tools of the Trade	213
6.2	Existence and Uniqueness Theorems	216
6.2.1	Nonlinear Fredholm Integral Equations	216
6.2.2	Nonlinear Volterra Integral Equations	217
6.2.3	Hammerstein's Equation	219
6.3	Illustrative Examples	221
7	Singular Integral Equations	243
7.1	Tools of the Trade	244
7.2	Equations with Continuous Kernels	251
7.2.1	Equations Solved with the Mellin Transform	253
7.2.2	Equations Solved with Fourier Transforms	256
7.2.3	Equations of Volterra Type	262
7.3	Equations with Singular Kernels	267
7.3.1	Abel's Equation	267
7.3.2	Equations with Cauchy and Hilbert Kernels	273
8	Linear Systems of Integral Equations	287
8.1	Tools of the Trade	288
8.2	Systems of Volterra Equations	290
8.3	Differential Equations	296
8.4	Systems of Fredholm Equations	300
8.5	Systems of Singular Equations	307
A	The 2010 Mathematics Subject Classification for Integral Equations .	311
B	Specialized Vocabularies and Sample Translations	315
B.1	French	316
B.1.1	Specialized French Vocabulary	316
B.1.2	Sample Translation from French into English	318

B.2	Italian	323
B.2.1	Specialized Italian Vocabulary	323
B.2.2	Sample Translation from Italian into English	326
B.3	German	330
B.3.1	Specialized German Vocabulary	330
B.3.2	Sample Translation from German into English.....	333

The Classical Theory of Integral Equations

A Concise Treatment

Zemyan, S.M.

2012, XIII, 344 p., Hardcover

ISBN: 978-0-8176-8348-1

A product of Birkhäuser Basel
