

Contents

1	Prologue: The Evolution of Computer Databases	1
1.1	The Evolution of Digital Computing	1
1.2	The Evolution of Data Input and Output Devices	9
1.3	The Evolution of Computer Communications	15
1.3.1	The Internet and World Wide Web	19
1.3.2	World Wide Web Databases	24
1.4	Summary and Commentary	26
	References	27
2	The Development of Medical Databases	33
2.1	The Origins of Medical Databases	33
2.2	Requirements and Structural Designs for Medical Databases	35
2.3	Databases and Communication Network	41
2.4	Classification of Medical Databases	45
2.5	Summary and Commentary	49
	References	50
3	Processing Text in Medical Databases	57
3.1	The Development of Standard Terminologies and Codes	60
3.2	Encoding Textual Medical Data	67
3.3	Querying Textual Medical Data	69
3.4	Summary and Commentary	96
	References	97
4	Primary Medical Record Databases	107
4.1	Requirements for Medical Record Databases	108
4.1.1	Data Security, Privacy and Confidentiality	111
4.1.2	Online Monitoring of Clinical Adverse Events	113
4.2	Examples of Early Medical Record Databases	128
4.3	Summary and Commentary	140
	References	141

5 Specialized Medical Databases	151
5.1 Cancer Databases	152
5.2 Cardiovascular Disease Databases	156
5.3 Chronic Diseases Databases	160
5.4 Genetics and Genomic Databases	162
5.5 Neuromental Disease Databases	168
5.6 Perinatal and Childhood Disease Databases	169
5.7 Other Specialized Medical Databases	171
5.8 Summary and Commentary	175
References	176
6 Secondary Medical Research Databases	183
6.1 Clinical Research Databases	183
6.1.1 Requirements for Clinical Research Databases	184
6.1.2 Examples of Early Clinical Research Databases	187
6.2 Summary and Commentary	190
References	191
7 Bio-Surveillance and Claims Databases	195
7.1 Surveillance Databases for Adverse Drug Events	195
7.2 Surveillance Databases for Epidemic Diseases	206
7.3 Medical Claims Databases	209
7.4 Summary and Commentary	211
References	212
8 Medical Knowledge Databases	217
8.1 Examples of Early Medical Knowledge Databases	217
8.2 Knowledge Discovery and Data Mining	220
8.3 Summary and Commentary	230
References	230
9 Medical Bibliographic Databases	233
9.1 National Library of Medicine (NLM) Databases	233
9.1.1 NLM Search and Retrieval Programs	237
9.1.2 NLM Specialized Databases	244
9.2 Examples of Other Early Bibliographic Medical Databases	252
9.3 Summary and Commentary	254
References	255
10 Epilogue	259
10.1 A Review of the First Six Decades	259
10.2 Some Projections for the Next Decade	262
References	264
Index	265
