

Contents

Part I Introduction

1 The Falcon Project: Model-Based Design of Automated Warehouses	3
Roelof Hamberg and Jacques Verriet	

Part II Decentralised Control Engineering

2 A Reference Architecture Capturing Structure and Behaviour of Warehouse Control	17
Jacques Verriet and Bruno van Wijngaarden	
3 Decentralised Warehouse Control through Agent Organisations	33
Huib Aldewereld, Frank Dignum, and Marcel Hiel	
4 Model-Driven Software Engineering	45
Marcel van Amstel, Mark van den Brand, Zvezdan Protić, and Tom Verhoeff	

Part III Models in System Design

5 Aggregate Models of Order-Picking Workstations	61
Ricky Andriansyah, Pascal Etman, and Jacobus Rooda	
6 Model Support for New Warehouse Concept Development.	75
Roelof Hamberg	

7	Warehouse System Configuration Support through Models	87
	Roelof Hamberg and Jacques Verriet	

Part IV Automated Item Handling

8	An Industrial Solution to Automated Item Picking	105
	Toine Ketelaars and Evert van de Plassche	
9	Underactuated Robotic Hands for Grasping in Warehouses.	117
	Gert Kragten, Frans van der Helm, and Just Herder	
10	Item Recognition, Learning, and Manipulation in a Warehouse Input Station	133
	Maja Rudinac, Berk Calli, and Pieter Jonker	
11	Object Recognition and Localisation for Item Picking	153
	Oytun Akman and Pieter Jonker	
12	Integration of an Automated Order-Picking System.	163
	Wouter Hakvoort and Jos Ansink	

Part V Transport by Roaming Vehicles

13	Self-localisation and Map Building for Collision-Free Robot Motion.	177
	Oytun Akman and Pieter Jonker	
14	Flexible Transportation in Warehouses	191
	Sisdarmanto Adinandra, Jurjen Caarls, Dragan Kostić, Jacques Verriet, and Henk Nijmeijer	

Part VI Conclusion

15	Reflections on the Falcon Project	211
	Roelof Hamberg, Jacques Verriet, and Jan Schuddemat	
	Appendix A: Falcon Project Partners.	223
	Appendix B: Falcon Project Publications	225
	Index	235
