

Contents

1	Background on VLSI Testing	1
	Junxia Ma and Mohammad Tehranipoor	
2	Hardware Implementation of Hash Functions	27
	Zhijie Shi, Chujiao Ma, Jordan Cote, and Bing Wang	
3	RSA: Implementation and Security	51
	Nicholas Tuzzio and Mohammad Tehranipoor	
4	Security Based on Physical Unclonability and Disorder	65
	Ulrich Rührmair, Srinivas Devadas, and Farinaz Koushanfar	
5	Hardware Metering: A Survey	103
	Farinaz Koushanfar	
6	Secure Hardware IPs by Digital Watermark	123
	Gang Qu and Lin Yuan	
7	Physical Attacks and Tamper Resistance	143
	Sergei Skorobogatov	
8	Side Channel Attacks and Countermeasures	175
	Ken Mai	
9	Trusted Design in FPGAs	195
	Mehrdad Majzoobi, Farinaz Koushanfar, and Miodrag Potkonjak	
10	Security in Embedded Systems	231
	Yunsi Fei and Juan Carlos Martinez Santos	
11	Side-Channel Attacks and Countermeasures for Embedded Microcontrollers	263
	Patrick Schaumont and Zhimin Chen	

12	Security for RFID Tags	283
	Jia Di and Dale R. Thompson	
13	Memory Integrity Protection	305
	Yin Hu and Berk Sunar	
14	Trojan Taxonomy	325
	Ramesh Karri, Jeyavijayan Rajendran, and Kurt Rosenfeld	
15	Hardware Trojan Detection	339
	Seetharam Narasimhan and Swarup Bhunia	
16	Design for Hardware Trust	365
	Yier Jin, Eric Love, and Yiorgos Makris	
17	Security and Testing	385
	Kurt Rosenfeld and Ramesh Karri	
18	Protecting IPs Against Scan-Based Side-Channel Attacks	411
	Mohammad Tehranipoor and Jeremy Lee
