

Contents

1	Basics of Radio Frequency Identification (RFID) Systems	1
1.1	Introduction.....	1
1.2	RFID Background.....	2
1.3	Evolution of RFID Systems	4
1.4	RFID Frequency Bands.....	5
1.4.1	Low Frequency (LF) Band.....	6
1.4.2	High Frequency (HF) Band.....	7
1.4.3	Ultra High Frequency (UHF) Band	7
1.4.4	Microwave (MW) Band	8
1.5	Overview of RFID Tags	9
1.5.1	Active Tags.....	10
1.5.2	Semi-active Tags	11
1.5.3	Passive Tags	12
1.5.4	Semi-passive Tags	12
1.5.5	Memory Components of RF Tags.....	14
1.5.6	Classification of RFID Tags by EPCglobal	14
1.6	Overview of RFID Readers.....	16
1.6.1	Magnetic Coupling: Near Field	17
1.6.2	Electric Coupling: Far Field.....	18
1.7	Middleware and Applications Software.....	19
1.8	RFID Applications	20
1.9	Summary	20
	References.....	21
	Bibliography	22
2	Characteristics and Limitations of Conventional RFIDs	25
2.1	Introduction.....	25
2.2	Physics of Narrowband Signaling.....	26
2.2.1	Performance Limitations Around Metallic Surfaces	26
2.2.2	Signal Detection and Jamming	30
2.2.3	Signal Fading and Blockage	32

2.2.4	High Power Used by Active Tags	33
2.2.5	Limited Range for Passive Tags	34
2.2.6	Limitations to Worldwide Operation	36
2.3	Performance Benchmark of UHF Passive Tags	37
2.3.1	Read Performance near Metal and Water	37
2.3.2	Frequency Dependent Performance	41
2.4	Overview of Ultra-Wideband Technology	44
2.5	Summary	48
	References	48
	Bibliography	49
3	Improvements in RFID Physical Layer Using	
	Ultra-wideband Signals	51
3.1	Introduction	51
3.2	UWB Signaling for RFID Systems	52
3.2.1	Improved Performance Around Metallic Surfaces	52
3.2.2	Immunity to Active and Passive Attacks	55
3.2.3	Encryption at Physical Layer Using Pulse Modulation Techniques	55
3.2.4	Capability to Detect Tags Behind Walls	57
3.2.5	Accurate Tag Positioning Capability	57
3.2.6	Longer Battery Life for Active UWB Tags	58
3.2.7	Extended Range for Passive Tags with UWB Remote Powering	59
3.2.8	Global Solution Due to Operation in Unlicensed Spectrum	62
3.2.9	Small Form Factor and Low Cost Tags	63
3.3	UWB Modulation Schemes for RFID	64
3.3.1	On-Off-Keying (OOK) : Pulse Presence or Absence	64
3.3.2	Pulse Amplitude Modulation (PAM) : Pulse Strength	66
3.3.3	Pulse Position Modulation (PPM) : Pulse Location	67
3.3.4	Bi-phase Modulation : Pulse Polarity	68
3.3.5	Transmitted-Reference Modulation : Pulse Delay	69
3.3.6	Time-Reversal Modulation : Pulse Matching	71
3.4	Performance Evaluation Of Commercial UWB RFID Systems	73
3.4.1	MSSI RTL System	74
3.4.2	Ubisense RTL System	75
3.4.3	Performance Benchmark Experiments	75
3.4.4	Concluding Remarks	82
3.5	Summary	83
	References	84
	Bibliography	85

- 4 Ultra-Wideband Technology for RF Tags: Concepts, Implementations, and Regulations 87**
 - 4.1 Introduction..... 87
 - 4.2 UWB Signals and Systems 88
 - 4.2.1 UWB Pulse Operations and Implementations 89
 - 4.2.2 Mathematical Representation of UWB Signals 90
 - 4.2.3 Pulse Repetition Frequency of UWB Signals..... 93
 - 4.2.4 UWB Pulse Generation..... 95
 - 4.2.5 Baseband Diode Sampling..... 97
 - 4.3 Communications, Radars, and Tags 97
 - 4.3.1 RF Tags: Remote Sensing of Modulation 97
 - 4.3.2 RF Tags from a UWB Perspective 100
 - 4.3.3 Use of Charge Pumps for Long-Range Remote Powering of Tags..... 102
 - 4.3.4 Tag Reader using the UWB Radar..... 103
 - 4.4 FCC Regulations for RFID Systems..... 104
 - 4.4.1 FCC Rules for Narrowband RFID Systems..... 105
 - 4.4.2 FCC Rules for Ultra-Wideband RFID Systems..... 106
 - 4.5 Summary 107
 - References..... 108
 - Bibliography 108
- 5 Antenna Design for Ultra-wideband Passive RFID Systems 111**
 - 5.1 Introduction..... 111
 - 5.2 Antenna Requirements for Passive UWB RFID Systems..... 112
 - 5.3 EM Field Radiation and Antennas for UWB RFID Readers..... 113
 - 5.3.1 Remote Powering of Passive Tags in the Far-Field with Propagating EM Waves..... 113
 - 5.3.2 Antenna Design and Reciprocity Theorems 114
 - 5.3.3 EM Radiation Occurs from Acceleration of Electrons 115
 - 5.3.4 Non-Resonant UWB Antennas 116
 - 5.3.5 Power Flow and Antenna Polarization..... 117
 - 5.3.6 Antenna Arrays and Beam Pattern..... 117
 - 5.3.7 UWB Spotforming for Remote Powering..... 119
 - 5.4 Antennas for UWB RFID Tags..... 121
 - 5.4.1 Overview of UWB Antennas 122
 - 5.4.2 Design Characteristics of the Planar Monopole/Dipole Antennas 124
 - 5.4.3 Patch Antennas..... 127
 - 5.5 Antennas for Wearable UWB RFID Tags..... 128
 - 5.5.1 Textile Antennas 128
 - 5.5.2 Textile UWB Antenna..... 130
 - 5.6 Impedance Matching and On-Chip Antennas..... 131
 - 5.6.1 UWB Antenna Feed Design: Key to Impedance Matching 132

5.6.2	On-Chip Antennas	133
5.6.3	Bulk Si Based On-Chip Antennas.....	133
5.6.4	Low Temperature Co-fired Ceramic (LTCC) Technology.....	134
5.7	Summary	136
	References.....	136
	Bibliography	138
6	RF Tags for Special Applications.....	139
6.1	Introduction.....	139
6.2	Monitoring of High Valued Items	139
6.3	Bio-Medical Sensor Systems	140
6.4	RF Tags for Ammunition Inventory.....	141
6.5	Unexploded Ordnance (UXO) Detection.....	143
6.6	Automotive Assembly.....	144
6.7	Indoor Personnel Location and Tracking for Emergency Responders	144
6.8	Summary	145
	Bibliography	146
	Glossary	147
	Index.....	157

Ultra-Wideband Radio Frequency Identification Systems

Nekoogar, F.; Dowla, F.

2012, XVI, 160 p., Hardcover

ISBN: 978-1-4419-9700-5
