

Contents

1	Signature Representation and Preservation Results for Engineered Systems and Applications to Statistical Inference. . . .	1
	N. Balakrishnan, Jorge Navarro and Francisco J. Samaniego	
2	Using D-Spectra in Network Monte Carlo: Estimation of System Reliability and Component Importance	23
	Ilya B. Gertsbakh and Yoseph Shpungin	
3	Signatures and Symmetry Properties of Coherent Systems.	33
	Fabio Spizzichino and Jorge Navarro	
4	Multidimensional Spectra of Multistate Systems with Binary Components	49
	Ilya Gertsbakh and Yoseph Shpungin	
5	Applications of Samaniego Signatures to Bounds on Variances of Coherent and Mixed System Lifetimes	63
	Tomasz Rychlik	
6	L_z-Transform for a Discrete-State Continuous-Time Markov Process and its Applications to Multi-State System Reliability . . .	79
	Anatoly Lisnianski	
7	Reliability Decisions for Supermarket Refrigeration System by using Combined Stochastic Process and Universal Generating Function Method: Case Study.	97
	Ilia Frenkel and Lev Khvatskin	

8	Importance Analysis of a Multi-State System Based on Multiple-Valued Logic Methods	113
	Elena Zaitseva	
9	Optimal Replacement and Protection Strategy for Parallel Systems	135
	Rui Peng, Gregory Levitin, Min Xie and Szu Hui Ng	
10	Heuristic Optimization Techniques for Determining Optimal Reserve Structure of Power Generating Systems	145
	Yi Ding, Lalit Goel, Peng Wang, Yuanzhang Sun, Poh Chiang Loh and Qiuwei Wu	
11	Determination of Vital Activities in Reliability Program for Multi-State System by Using House of Reliability.	155
	Shuki Dror and Kobi Tsur	
12	Multi-State Availability Modeling in Practice	165
	Kishor S. Trivedi, Dong Seong Kim and Xiaoyan Yin	
13	Recent Results in the Analysis of Redundant Systems	181
	Mikhail Nikulin, Nouredine Saaidia and Ramzan Tahir	
14	Multiobjective Reliability Allocation in Multi-State Systems: Decision Making by Visualization and Analysis of Pareto Fronts and Sets	195
	Enrico Zio and Roberta Bazzo	
15	Optimal Incomplete Maintenance in Multi-State Systems.	209
	Waltraud Kahle	
16	Nonparametric Estimation of Marginal Temporal Functionals in a Multi-State Model	219
	Somnath Datta and A. Nicole Ferguson	
17	Frailty or Transformation Models in Survival Analysis and Reliability	237
	Filia Vonta	
18	Goodness-of-Fit Tests for Reliability Modeling	253
	Alex Karagrigoriou	

19	On the Markov Three-State Progressive Model	269
	Jacobo de Uña-Álvarez	
20	Multi-State Semi-Markov Model of the Operation Reliability. . . .	283
	Franciszek Grabski	
21	Reliability of Continuous-State Systems in View of Heavy-Tailed Distributed Performance Features	295
	Emil Bashkansky and Tamar Gadrich	
22	On Optimal Control of Systems on Their Life Time	307
	Vladimir Rykov and Dmitry Efrosinin	

Recent Advances in System Reliability
Signatures, Multi-state Systems and Statistical
Inference

Lisnianski, A.; Frenkel, I. (Eds.)

2012, XVI, 320 p., Hardcover

ISBN: 978-1-4471-2206-7
