

Contents

- 1 Introduction 1**
 - 1.1 Classical and Behavioral Paradigms for Data Modeling 1
 - 1.2 Motivating Example for Low Rank Approximation 3
 - 1.3 Overview of Applications 7
 - 1.4 Overview of Algorithms 21
 - 1.5 Iterate Programming 24
 - 1.6 Notes 27
 - References 30
- Part I Linear Modeling Problems**
- 2 From Data to Models 35**
 - 2.1 Linear Static Model Representations 35
 - 2.2 Linear Time-Invariant Model Representations 45
 - 2.3 Exact and Approximate Data Modeling 52
 - 2.4 Unstructured Low Rank Approximation 60
 - 2.5 Structured Low Rank Approximation 67
 - 2.6 Notes 70
 - References 71
- 3 Algorithms 73**
 - 3.1 Subspace Methods 73
 - 3.2 Algorithms Based on Local Optimization 81
 - 3.3 Data Modeling Using the Nuclear Norm Heuristic 96
 - 3.4 Notes 104
 - References 105
- 4 Applications in System, Control, and Signal Processing 107**
 - 4.1 Introduction 107
 - 4.2 Model Reduction 108
 - 4.3 System Identification 115
 - 4.4 Analysis and Synthesis 122

| | | |
|-----|-------------------------------|-----|
| 4.5 | Simulation Examples | 125 |
| 4.6 | Notes | 128 |
| | References | 130 |

Part II Miscellaneous Generalizations

| | | |
|----------|--|------------|
| 5 | Missing Data, Centering, and Constraints | 135 |
| 5.1 | Weighted Low Rank Approximation with Missing Data | 135 |
| 5.2 | Affine Data Modeling | 147 |
| 5.3 | Complex Least Squares Problem with Constrained Phase | 156 |
| 5.4 | Approximate Low Rank Factorization with Structured Factors | 163 |
| 5.5 | Notes | 175 |
| | References | 177 |
| 6 | Nonlinear Static Data Modeling | 179 |
| 6.1 | A Framework for Nonlinear Static Data Modeling | 179 |
| 6.2 | Nonlinear Low Rank Approximation | 182 |
| 6.3 | Algorithms | 187 |
| 6.4 | Examples | 191 |
| 6.5 | Notes | 196 |
| | References | 197 |
| 7 | Fast Measurements of Slow Processes | 199 |
| 7.1 | Introduction | 199 |
| 7.2 | Estimation with Known Measurement Process Dynamics | 202 |
| 7.3 | Estimation with Unknown Measurement Process Dynamics | 204 |
| 7.4 | Examples and Real-Life Testing | 212 |
| 7.5 | Auxiliary Functions | 222 |
| 7.6 | Notes | 224 |
| | References | 225 |

| | | |
|-------------------|--|------------|
| Appendix A | Approximate Solution of an Overdetermined System of Equations | 227 |
| | References | 231 |

| | | |
|-------------------|-------------------------|------------|
| Appendix B | Proofs | 233 |
| | References | 237 |

| | | |
|-------------------|---------------------------|------------|
| Appendix P | Problems | 239 |
| | References | 244 |
