1	Introduction	1
1.1	Introduction	1
1.2	Organization	5
1.3	Classroom Use	6
	References	7
2	Essentials of Probability Theory	9
2.1	Introduction	9
2.2	Probability Space	9
2.2.1	Sample Space	9
2.2.2	σ -Field	10
2.2.3	Probability Measure	11
2.2.4	Construction of Probability Spaces	14
2.3	Measurable Functions and Random Elements	16
2.4	Independence	18
2.5	Sequence of Events	21
2.6	Expectation	22
2.7	Convergence of Sequences of Random Variables	27
2.8	Radon–Nikodym Derivative	31
2.9	Distribution and Density Functions	32
2.10	Characteristic Function	36
2.11	Conditional Expectation	38
2.12	Discrete Time Martingales	42
2.13	Monte Carlo Simulation	47
2.13.1	Gaussian Variables	48
2.13.2	Non-Gaussian Variables	48
2.13.3	Estimators	50
2.14	Exercises	53
	References	57

3	Random Functions	59
3.1	Introduction	59
3.2	Finite Dimensional Distributions	62
3.3	Sample Properties	64
3.4	Second Moment Properties	67
3.5	Weakly Stationary Random Functions	70
3.5.1	\mathbb{R} -Valued Stochastic Processes	70
3.5.2	\mathbb{R}^d -Valued Stochastic Processes	72
3.5.3	\mathbb{R} -Valued Random Fields	73
3.6	Second Moment Calculus	76
3.6.1	Continuity	76
3.6.2	Differentiability	77
3.6.3	Integration	79
3.6.4	Spectral Representation	81
3.6.5	Karhunen-Loève Expansion	83
3.7	Classes of Stochastic Processes	85
3.7.1	Gaussian Random Functions	86
3.7.2	Translation Random Functions	86
3.7.3	Ergodic Random Functions	88
3.7.4	Markov Random Functions	90
3.7.5	Processes with Independent Increments	93
3.7.6	Continuous Time Martingales	95
3.8	Monte Carlo Simulation	109
3.8.1	Stationary Gaussian Random Functions	109
3.8.2	Translation Vector Processes	113
3.8.3	Non-Stationary Gaussian Processes	119
3.9	Exercises	124
	References	126
4	Stochastic Integrals	129
4.1	Introduction	129
4.2	Riemann-Stieltjes Integrals	130
4.3	Stochastic Integrals $\int BdB$ and $\int NdN$	131
4.4	Stochastic Integrals with Brownian Motion Integrators	136
4.4.1	Integrands in \mathcal{H}_0^2	137
4.4.2	Integrands in \mathcal{H}^2	138
4.4.3	Integrands in \mathcal{H}	141
4.5	Stochastic Integrals with Martingale Integrators	142
4.6	Stochastic Integrals with Semimartingale Integrators	146
4.7	Quadratic Variation and Covariation Processes	148
4.8	Exercises	152
