

Contents

1	The Renewable Energy Industry and the Need for a Multi-Criteria Analysis	1
1.1	Introduction	1
1.2	The Need for a Multi-Criteria Analysis.	2
	References	5
2	Multi-Criteria Analysis.	7
2.1	Introduction.	7
2.2	Model Building	8
	References	10
3	AHP	11
3.1	Introduction.	11
3.2	Application	14
3.3	Concluding Remarks.	16
	References	17
4	Weighted Sum Method and Weighted Product Method	19
4.1	Weighted Sum Method	19
4.2	Weighted Product Method.	19
4.3	Application	20
4.4	Concluding Remarks.	21
	References	21
5	PROMETHEE	23
5.1	PROMETHEE I and II	23
5.2	Application	28
5.3	Concluding Remarks.	31
	References	31

6	ELECTRE	33
6.1	ELECTRE III	33
6.2	ELECTRE IV	36
6.3	Application	37
6.4	Concluding Remarks.	40
	References	41
7	TOPSIS	43
7.1	TOPSIS.	43
7.2	Application	45
7.3	Concluding Remarks.	47
	References	47
8	VIKOR	49
8.1	VIKOR	49
8.2	Application	51
8.3	Concluding Remarks.	52
	References	53
9	A Multi-Criteria Data Envelopment Analysis	55
9.1	DEA	55
9.2	Application	58
9.3	Concluding Remarks.	60
	References	61
10	Multi-Attribute Utility Theory	63
10.1	The MAU Function	63
10.2	Application	67
10.3	Concluding Remarks.	72
	References	72
11	Fuzzy PROMETHEE	73
11.1	Fuzzy PROMETHEE	73
11.2	Application	74
11.3	Concluding remarks	76
	References	76
12	FAHP	77
12.1	FAHP	77
12.1.1	Application	82
12.2	FAHP Chang's Extent Analysis	88
12.2.1	Application	88
12.3	Concluding Remarks.	92
	References	92

Contents	ix
13 The Shapley Value	95
13.1 The Shapley Value.	95
13.2 Application	97
13.3 Concluding Remarks.	100
