

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Objectives and Outlines of this Book	7
	References	9
<b>2</b>	<b>Integration of Design for Environmental Concepts in Product Life Cycle</b>	<b>11</b>
2.1	Environmental Aspects in Product Life Cycle	12
2.1.1	LCA and Product Development	16
2.2	Design for Environmental Concepts	20
2.2.1	Integration of LCA Technique and Design for Environmental Methods	27
	References	30
<b>3</b>	<b>LCA Process in the Eco-Design Process</b>	<b>33</b>
3.1	Life Cycle Assessment	33
3.1.1	Goal Definition and Scoping	35
3.1.2	Life Cycle Inventory	36
3.1.3	Life Cycle Impact Assessment	44
3.1.4	Life Cycle Interpretation	52
3.2	Case Study: LCA as a Tool in “Design for Environmental”: A Comparative Study Between Domestic Refrigerators	52
	References	60
<b>4</b>	<b>Sustainable Product Assessment Tools</b>	<b>61</b>
4.1	Matrix Assessment Tools	61
4.2	Checklists	62
4.3	Spiderweb Diagrams	63
4.4	Parametric Assessment	66
4.5	Summing up the Engineering Perspective	68
	References	72

<b>5</b>	<b>Case Study: The Domestic Cooker Hood “F77”</b>	<b>75</b>
5.1	Structure of the Analysis	75
5.1.1	Functional Units	75
5.1.2	System Boundaries	75
5.2	Life Cycle Inventory	76
5.2.1	Production–Use–End of Life	76
5.3	Data: Sources and Assumptions	78
5.4	Life Cycle Impact Assessment (LCIA)	78
5.5	Results and Discussion	80
5.6	Manufacturing	82
5.7	End of Life	89
5.8	Impact Improvement with LED Light	90
5.9	Use of Electro-Galvanized Stainless Steel	92
5.10	Modification of Distribution Modality	92
	References	95
<b>6</b>	<b>Designers’ Utilization of DfE and Requirements</b>	<b>97</b>
6.1	Integration of Environmental Management System and Design for Environmental	98
6.2	Design for Environmental and Product Life Cycle Cost	104
6.2.1	Related Research Works	106
	References	109
<b>7</b>	<b>Case Study: Development of a Sustainable Product</b>	
	<b>Life cycle in Manufacturing Firms</b>	<b>113</b>
7.1	Research Approach	114
7.2	Procedure Development	115
7.3	Approach and Parameters Used in the LCA Study	117
7.3.1	Product-Specific Requirements (PSR)	117
7.3.2	LCI: Life Cycle Inventory	120
7.3.3	LCIA: Life Cycle Impact Assessment	121
7.4	Application Example	121
7.4.1	Environmental Break Even Point	127
7.4.2	Economic/Environmental Break Even Point	129
7.5	Discussion and Conclusions	130
	Reference	132
<b>8</b>	<b>Design a Sustainable Supply Chain</b>	<b>133</b>
8.1	Environmental Pressures and Supply Chain Response	137
8.1.1	Regulations	137
8.1.2	Consumers and Ethical Responsibility	145
8.1.3	Resources	148
8.2	The Supply Chain Response	149

8.3	The Costs of a Sustainable Supply Chain . . . . .	156
	References . . . . .	165
<b>9</b>	<b>Environmental Aspects in Strategic Decisions . . . . .</b>	<b>169</b>
9.1	Sustainable Logistic Network . . . . .	173
9.2	Suppliers Management and Selection . . . . .	183
9.3	Environmental Material Management . . . . .	190
9.3.1	A Revised Economic Order Quantity: Improving the Inventory Management Model . . . . .	195
9.4	Closed-Loop Supply Chains and Reverse Logistics. . . . .	206
	References . . . . .	215
<b>10</b>	<b>Case Study: A Carbon Footprint Analysis in Textile Supply Chain . . . . .</b>	<b>219</b>
10.1	Carbon Footprints in the Supply Chain . . . . .	220
10.2	Materials and Methods . . . . .	220
10.2.1	Related Research Works . . . . .	221
10.3	Case Study . . . . .	224
10.3.1	System Boundaries . . . . .	224
10.3.2	Functional Unit . . . . .	224
10.3.3	LCIA . . . . .	226
10.4	The Production Process . . . . .	227
10.4.1	Impact Calculated by IPCC 2007 . . . . .	227
10.5	Uncertainty Assessment IPCC 2007 . . . . .	228
10.5.1	Life Cycle Interpretation . . . . .	229
10.6	Sensitivity Analysis . . . . .	231
10.6.1	Transport . . . . .	231
10.6.2	The Combination of Road Rail Transportation . . . . .	232
10.6.3	Suppliers Selection . . . . .	233
10.6.4	A Change in Consumer Behaviour . . . . .	234
10.7	Discussion and Conclusions . . . . .	234
10.8	Appendix . . . . .	238
	References . . . . .	238
<b>11</b>	<b>Optimizing Sustainability in Products and Services . . . . .</b>	<b>241</b>
11.1	Sustainability in Products and Services . . . . .	241
11.2	Three-Dimensional Concurrent Engineering (3DCE) to Integrate New Product Development (NPD) and Environmentally Responsible Manufacturing (ERM). . . . .	254
	References . . . . .	262
<b>12</b>	<b>DfE Procedures in the Development of a More Sustainable Supply Chain . . . . .</b>	<b>265</b>
12.1	Introduction . . . . .	265

12.2	Barriers in Implementation of DfE in the Supply Chain Management . . . . .	273
12.3	DfE and Supply Chain Stakeholders . . . . .	275
	References . . . . .	280
<b>13</b>	<b>Methods for Weighting DfE Choices in the Development of a More Sustainable Supply Chain . . . . .</b>	<b>283</b>
13.1	Introduction . . . . .	283
13.2	Development of a New Method . . . . .	287
13.3	Case Study: Packaging Systems for Liquid Food Substances . . . . .	291
13.4	Development of “Iterative QFD” . . . . .	294
13.5	Discussion . . . . .	299
13.6	Conclusions . . . . .	301
	References . . . . .	302
<b>14</b>	<b>Enviromental Marketing and New Product Development . . . . .</b>	<b>305</b>
14.1	Introduction . . . . .	305
14.2	Green Marketing . . . . .	314
14.3	Comparison Between Traditional and Green Marketing . . . . .	321
14.4	Environmental Marketing Claims . . . . .	325
	References . . . . .	335
<b>15</b>	<b>Supply Chain Environmental Policy . . . . .</b>	<b>339</b>
15.1	Introduction . . . . .	339
15.2	Ecological Reputation and Supply Chain Strategies . . . . .	340
15.3	Environmental Labels and Declarations . . . . .	344
15.3.1	Environmental Product Declaration (EPD). . . . .	347
15.4	Environmental Management Systems, ISO 14000 Standards . . . . .	355
15.5	Environmental Value Chain . . . . .	360
	References . . . . .	371

Design for Environment as a Tool for the Development  
of a Sustainable Supply Chain

Bevilacqua, M.; Ciarapica, F.E.; Giacchetta, G.

2012, X, 374 p., Hardcover

ISBN: 978-1-4471-2460-3
