Preface V

Preliminaries on Ellipticity XIII

1 Notions from Topology and Functional Analysis 1

1.1 Topological Vector Spaces 1

1.2 Linear Functionals, Topological Dual, Weak Topology 8

1.3 The Space of Continuous Functions on an Open Subset
of \mathbb{R}^N 20

1.4 Distributions on an Open Subset of \mathbb{R}^N 23

1.5 The Spaces L^p for $p \in [1, +\infty]$ 34

1.6 Exercises for Chapter 1 44

2 Sobolev Spaces and Embedding Theorems 57

2.1 Definitions and First Properties 57

2.2 Sobolev Embeddings for $W^{m,p}(\mathbb{R}^N)$ 69

2.3 Generalization to Other Open Sets 84

2.4 Compact Embeddings in the Case of a Bounded Open Set .. 95

2.5 The Trace on the Boundary of a \mathcal{C}^1 Open Set 99

2.6 Exercises for Chapter 2 104

3 Traces of Functions on Sobolev Spaces 113

3.1 The Spaces $W^{1-1/p,p}(\mathbb{R}^{N-1})$ for $p > 1$ 114

3.2 The Case of an Open Boundary Other than $\mathbb{R}^{N-1} \times]0, \infty[$. 130

3.3 Traces of Functions in $W^{1,1}(\Omega)$ 131

3.4 Density of $\mathcal{C}^1(\partial\Omega)$ in $W^{1-1/p,p}(\partial\Omega)$ 133

3.5 Higher Order Traces 145

3.6	Embedding Theorems, Compact Injections	163
3.7	Exercises for Chapter 3	168
4	Fractional Sobolev Spaces	179
4.1	Tempered Distributions and Fourier Transforms	179
4.2	The Sobolev Spaces $H^s(\mathbb{R}^N)$	181
4.3	The Spaces $W^{s,p}(\Omega)$ for $0 < s < 1$	189
4.4	Embeddings of the $W^{s,p}(\Omega)$	210
4.5	Compact Embeddings of the $W^{s,p}(\Omega)$ with Bounded Ω	216
4.6	The Spaces $W^{s,p}(\Omega)$ with $s \in]0, +\infty[$	219
4.7	Appendix: The Riesz–Thorin Convexity Theorem	220
4.8	Exercises for Chapter 4	224
5	Elliptic PDE: Variational Techniques	229
5.1	Some Useful Results	229
5.2	Notions from Convex Analysis	230
5.3	Solving Elliptic Linear PDE with Dirichlet Boundary Conditions	236
5.4	Regularity of the Given Solutions	243
5.5	Neumann Problems	250
5.6	Nonhomogeneous Dirichlet and Neumann Problems	257
5.7	Elasticity Problem	259
5.8	The Equation of the p -Laplacian	261
5.9	Maximum Principles for Elliptic PDE	265
5.10	Coercive Problems on Nonreflexive Spaces	280
5.11	Minimal Surfaces	282
5.12	Exercises for Chapter 5	286
6	Distributions with Measures as Derivatives	299
6.1	Results on Measures, Convergence	300
6.2	Extension of a Positive Measure	307
6.3	The Space of Functions with Bounded Variation	314
6.4	Distributions with Gradient in L^p	323
6.5	Distributions with Gradient in M^1	326
6.6	Functions with Deformations in L^p for $1 < p < \infty$	326
6.7	Spaces of Functions with Deformations in L^1	328
6.8	The Space of Functions with a Measure as Deformation	339
6.9	Generalized Green’s Formulas	344
6.10	Functions of a Measure	348
6.11	Exercises for Chapter 6	360

7	Korn's Inequality in L^p	371
7.1	Harmonicity, Mean values, Hardy Maximal Functions	372
7.2	Hilbert Transform in \mathbb{R}	387
7.3	The Riesz Transforms on \mathbb{R}^N	399
7.4	Korn's Inequality in $W^{1,p}(\Omega)$ for Bounded Ω	409
7.5	Exercises for Chapter 7	420
	Appendix on Regularity	435
A.1	L^∞ Estimate	436
A.2	$W^{1,k}$ and $W^{1,\infty}$ Estimates When $p \geq 2$	441
	References	455
	Notation	459
	Index	461

Functional Spaces for the Theory of Elliptic Partial
Differential Equations

Demengel, F.; Demengel, G.
