## Part I Inspiring Applications

|          |  |            |
|----------|--|------------|
| <b>1</b> | <b>Converter Topologies</b> . . . . .                                | <b>3</b>   |
|          | Siew-Chong Tan and Chi Kong Tse                                      |            |
| <b>2</b> | <b>Pulse-Width Modulation</b> . . . . .                              | <b>25</b>  |
|          | Jian Sun   |            |
| <b>3</b> | <b>Commercial Power Electronics Controllers</b> . . . . .            | <b>63</b>  |
|          | Chin Chang   |            |
| <b>4</b> | <b>Grid Synchronisation Based on Frequency-Locked Loop Schemes</b> . | <b>133</b> |
|          | Gerardo Escobar, Ngai-Man Ho, and Sami Pettersson                    |            |

## Part II Mathematical Modelling Perspectives

|          |   |            |
|----------|---|------------|
| <b>5</b> | <b>Averaging for Power Converters</b> . . . . .   | <b>163</b> |
|          | Carmen Pedicini, Luigi Iannelli, Francesco Vasca, and Ulf Jönsson   |            |
| <b>6</b> | <b>Switched Differential Algebraic Equations</b> . . . . .  | <b>189</b> |
|          | Stephan Trenn   |            |
| <b>7</b> | <b>Dynamic and Steady-State Analysis of Switching Power Converters Made Easy: Complementarity Formalism</b> . . . . . | <b>217</b> |
|          | Gianluca Angelone, Francesco Vasca, Luigi Iannelli, and Kanat Camlibel  |            |
| <b>8</b> | <b>Power-Based Modelling</b> . . . . .  | <b>245</b> |
|          | Dimitri Jeltsema and Jacquélien M.A. Scherpen   |            |

## Part III Advanced Control Strategies for Power Converters

|          |  |            |
|----------|--|------------|
| <b>9</b> | <b>Averaging Results Pertaining to the Implementation of Hybrid Feedback via PWM Control</b> . . . . . | <b>275</b> |
|          | Wei Wang, Andrew R. Teel, and Dragan Nešić   |            |

|  |  |     |
|--|--|-----|
| <b>10</b>  | <b>Sliding Modes</b> . . . . .   | 299 |
|  | Domingo Biel and Enric Fossas  |     |
| <b>11</b>  | <b>Model Predictive Control</b> . . . . .  | 321 |
|  | Sébastien Mariéthoz and Stefan Almér   |     |
| <b>12</b>  | <b>Adaptive PI Stabilisation of Switched Power Converters Described<br/>by Port-Hamiltonian Models</b> . . . . . | 355 |
|  | Michael Hernandez-Gomez, Romeo Ortega, Françoise Lamnabhi-<br>Lagarigue, and Gerardo Escobar                     |     |
| <b>Part IV Simulating Controlled Converters: A Challenging Issue</b> |  |     |
| <b>13</b>  | <b>An Overview of Simulation Tools</b> . . . . .   | 391 |
|  | John Schönberger   |     |
| <b>14</b>  | <b>Time-Stepping via Complementarity</b> . . . . .   | 417 |
|  | Vincent Acary  |     |
| <b>15</b>  | <b>Real-Time Simulation of Power Electronic Systems and Devices</b> . . .  | 451 |
|  | Christian Dufour, Tarek Ould Bachir, Luc-André Grégoire, and Jean<br>Bélanger                                    |     |
|  | <b>Index</b> . . . . .   | 489 |

Dynamics and Control of Switched Electronic Systems  
Advanced Perspectives for Modeling, Simulation and  
Control of Power Converters

Vasca, F.; Iannelli, L. (Eds.)

2012, XIV, 494 p., Hardcover

ISBN: 978-1-4471-2884-7
