

# Contents

- 1 Introduction to Virtual Reality in Medicine . . . . . 1**
  - 1.1 What Is Virtual Reality? . . . . . 1
    - 1.1.1 Definition of Virtual Reality . . . . . 1
    - 1.1.2 Presence and Immersion . . . . . 2
  - 1.2 VR in Medicine . . . . . 2
    - 1.2.1 Need for Training in Medicine . . . . . 2
    - 1.2.2 VR for Medical Education and Training . . . . . 4
    - 1.2.3 VR in Rehabilitation, Psychotherapy, and Surgery . . . . . 5
    - 1.2.4 Benefits and Chances . . . . . 5
  - 1.3 Principles of Virtual Reality . . . . . 6
    - 1.3.1 Main Components . . . . . 6
    - 1.3.2 Importance of Multimodality . . . . . 7
    - 1.3.3 Early Steps in Multimodal Displays . . . . . 7
    - 1.3.4 Multimodal Training Simulation . . . . . 8
    - 1.3.5 Problems . . . . . 10
  - 1.4 Contents of the Book . . . . . 10
  - References . . . . . 11
- 2 Input Periphery . . . . . 13**
  - 2.1 Human Actuators, Input Modalities . . . . . 13
  - 2.2 Position and Movement Recording . . . . . 13
    - 2.2.1 Physical Measurement Principles . . . . . 13
    - 2.2.2 Position and Movement Measuring Systems . . . . . 15
    - 2.2.3 Eye-Tracking Systems . . . . . 19
  - 2.3 Force and Torque Recording . . . . . 20
    - 2.3.1 Resistive Methods . . . . . 21
    - 2.3.2 Piezoelectric Methods . . . . . 21
    - 2.3.3 Optical Systems . . . . . 22
    - 2.3.4 Capacitive Methods . . . . . 22
  - 2.4 Sound and Speech Recording . . . . . 23

2.5	Physiological Data Recording . . . . .	23
2.5.1	Electromyography (EMG) . . . . .	23
2.5.2	Electroencephalography (EEG) . . . . .	24
2.5.3	Electrocardiography (ECG) . . . . .	24
2.5.4	Blood Pressure Measurement . . . . .	24
2.5.5	Pulse Oximetry . . . . .	26
2.5.6	Respiratory Measurements . . . . .	27
2.5.7	Skin Conductance . . . . .	27
	References . . . . .	28
<b>3</b>	<b>Visual Aspects . . . . .</b>	<b>31</b>
3.1	What Is Computer Graphics? . . . . .	31
3.2	Visual Sense and Perception . . . . .	33
3.2.1	Structure of the Human Eye . . . . .	33
3.2.2	Photoreceptors in the Retina . . . . .	34
3.2.3	Electromagnetic Waves . . . . .	35
3.2.4	Color Vision . . . . .	37
3.2.5	RGB Color Space . . . . .	38
3.2.6	Liquid Crystal Display . . . . .	39
3.2.7	Further Colorspaces . . . . .	39
3.2.8	Depth Perception . . . . .	42
3.3	Visual Display Technology . . . . .	45
3.3.1	Stereoscopic Rendering . . . . .	45
3.3.2	Stereoscopic Display Hardware . . . . .	47
3.3.3	Virtual Reality Displays . . . . .	49
3.4	Rendering in Computer Graphics . . . . .	53
3.4.1	Object Representations . . . . .	53
3.4.2	Geometry Transformations . . . . .	56
3.4.3	Light Sources and Reflection . . . . .	59
3.4.4	Viewing Projections . . . . .	64
3.4.5	Surface Shading . . . . .	68
3.4.6	Advanced Rendering Techniques . . . . .	73
3.5	Applications of Visual Displays in Medical VR . . . . .	76
	References . . . . .	77
<b>4</b>	<b>Haptic Aspects . . . . .</b>	<b>79</b>
4.1	What Is Haptics? . . . . .	79
4.2	Haptic Sense and Perception . . . . .	80
4.2.1	Anatomy and Physiology . . . . .	81
4.2.2	Psychophysics . . . . .	84
4.2.3	Haptic Exploration . . . . .	85
4.3	Haptic Display Technology . . . . .	85
4.3.1	Kinematic Principles of Haptic Displays . . . . .	86
4.3.2	Actuation Principles of Haptic Displays . . . . .	89
4.3.3	Control Principles of Haptic Displays . . . . .	95
4.3.4	Examples of Haptic Displays . . . . .	99

4.4	Haptic Rendering . . . . .	107
4.4.1	Penalty Method . . . . .	107
4.4.2	Vector Field Method . . . . .	110
4.4.3	God-Object Method . . . . .	112
4.4.4	Force Shading Method . . . . .	114
4.4.5	Two-Pass Force Shading Method . . . . .	115
4.4.6	Haptic Rendering of Implicit Surfaces . . . . .	117
4.4.7	Direct Haptic Rendering of NURBS Models . . . . .	117
4.4.8	Point-Shell Voxelmap Method . . . . .	121
4.4.9	Rendering of Deformable Objects . . . . .	122
4.5	Applications of Haptic Displays in Medical VR . . . . .	123
	References . . . . .	125
<b>5</b>	<b>Auditory Aspects . . . . .</b>	<b>131</b>
5.1	What Are Auditory Displays? . . . . .	131
5.2	Auditory Sense and Perception . . . . .	131
5.2.1	Anatomy and Physiology . . . . .	132
5.2.2	Perception . . . . .	132
5.3	Auditory Display Technology . . . . .	136
5.3.1	Challenges for the Design of Auditory Displays . . . . .	136
5.3.2	Examples of Auditory Displays . . . . .	137
5.4	Auditory Rendering . . . . .	142
5.4.1	Display of Pre-recorded Sound Samples . . . . .	143
5.4.2	Real-Time Synthesizing of Sound . . . . .	143
5.4.3	Sound Triggering . . . . .	144
5.5	Application of Auditory Displays in Medical VR . . . . .	145
	References . . . . .	145
<b>6</b>	<b>Olfactory and Gustatory Aspects . . . . .</b>	<b>149</b>
6.1	What Are Olfactory and Gustatory Displays? . . . . .	149
6.2	Olfactory Sense and Perception . . . . .	149
6.3	Olfactory Display Technology . . . . .	150
6.3.1	Design Principles . . . . .	150
6.3.2	Stationary Devices . . . . .	151
6.3.3	Wearable Devices . . . . .	153
6.4	Gustatory Sense and Perception . . . . .	155
6.5	Gustatory Display Technology . . . . .	156
6.5.1	Design Principles . . . . .	156
6.5.2	Taste Simulation . . . . .	157
6.5.3	Food Simulation . . . . .	157
6.5.4	Drinking Simulation . . . . .	157
6.6	Applications of Olfactory and Gustatory Displays in Medical VR . . . . .	158
	References . . . . .	158
<b>7</b>	<b>Virtual Reality for Rehabilitation . . . . .</b>	<b>161</b>
7.1	Rationale for the Use of Virtual Reality in Rehabilitation . . . . .	161

7.2	Virtual Reality Supported Physiotherapy . . . . .	162
7.2.1	Ankle Rehabilitation . . . . .	162
7.2.2	Gait Rehabilitation . . . . .	163
7.2.3	Arm Rehabilitation . . . . .	167
7.2.4	Future Directions . . . . .	173
7.3	Wheelchair Mobility and Functional ADL Training . . . . .	175
7.4	Balance Training . . . . .	175
7.5	VR Supported Psychotherapy . . . . .	176
	References . . . . .	177
<b>8</b>	<b>VR for Medical Training . . . . .</b>	<b>181</b>
8.1	Introduction . . . . .	181
8.1.1	Traditional Training Options . . . . .	182
8.1.2	Advantages and Disadvantages of Surgical Simulation . . . . .	182
8.1.3	Surgical Simulator Components . . . . .	185
8.2	Tool-Based Applications . . . . .	187
8.2.1	Laparoscopy Training . . . . .	187
8.2.2	Basic and Advanced Skill Training . . . . .	188
8.2.3	Gynecological Procedures . . . . .	189
8.2.4	Arthroscopy and Sinuscopy Training . . . . .	189
8.2.5	Flexible Endoscopy Training . . . . .	191
8.2.6	Needle Insertion Training . . . . .	191
8.2.7	Open Surgery Training . . . . .	194
8.2.8	Palpation Training . . . . .	195
8.3	Phantom-Based Applications . . . . .	196
8.3.1	Principle of Phantom-Based Training Simulators . . . . .	196
8.3.2	The Munich Knee Joint Simulator . . . . .	198
8.3.3	Touch Simulators . . . . .	202
8.3.4	Delivery Simulators . . . . .	205
8.3.5	Anesthesia Simulators . . . . .	207
	References . . . . .	208
<b>9</b>	<b>VR for Planning and Intraoperative Support . . . . .</b>	<b>211</b>
9.1	Introduction . . . . .	211
9.2	VR for Surgical Planning . . . . .	211
9.2.1	Radiosurgery Planning . . . . .	211
9.2.2	Surgery Room Design . . . . .	213
9.2.3	Orthopedic Surgery Planning . . . . .	215
9.2.4	Virtual Endoscopy . . . . .	215
9.3	Augmented Reality in Surgery . . . . .	216
9.3.1	Definition and Historical Background . . . . .	216
9.3.2	Classes of Medical AR Applications . . . . .	216
9.4	Image Guided Surgery . . . . .	220
	References . . . . .	221

<b>10</b>	<b>Medical Model Generation</b>	225
10.1	Introduction	225
10.2	Medical Imaging	227
10.2.1	Overview	227
10.2.2	X-Ray Imaging	228
10.2.3	Computed Tomography	229
10.2.4	Magnetic Resonance Imaging	232
10.2.5	Ultrasound	233
10.2.6	Visible Human Project	234
10.3	Segmentation	235
10.3.1	Overview	235
10.3.2	Low-Level Methods	236
10.3.3	High-Level Methods	238
10.4	Model Conversion	238
10.4.1	Outline	238
10.4.2	Marching Cubes	239
10.5	Mesh Reduction and Smoothing	241
10.5.1	Outline	241
10.5.2	Polygon Reduction	241
10.5.3	Mesh Smoothing	243
10.6	Model Adaptation	245
10.7	Modelling Organ Variability	245
10.7.1	Outline	245
10.7.2	Medical Data Segmentation	246
10.7.3	Statistical Model	247
10.8	Integration of Pathologies	249
10.8.1	Outline	249
10.8.2	Cellular Automata Growth Model	250
10.9	Generation of Vascular Structures	252
10.9.1	Outline	252
10.9.2	Lindenmayer Systems	253
10.10	Biomechanical Parameters	254
10.10.1	Ex-vivo Measurements	255
10.10.2	In-vivo Measurements	255
10.11	Organ Texture Generation	256
	References	260
<b>11</b>	<b>Soft Tissue Deformation</b>	265
11.1	Introduction	265
11.2	Overview	266
11.3	Mass Spring Models	269
11.3.1	Model Formulation	269
11.3.2	Dynamic Simulation	272
11.3.3	Numerical Integration	272

11.4	Continuum Mechanics . . . . .	275
11.4.1	Concept of Strain . . . . .	275
11.4.2	Concept of Stress . . . . .	277
11.4.3	Constitutive Material Laws . . . . .	279
11.4.4	Linear Elasticity . . . . .	280
11.5	Finite Element Method . . . . .	282
11.6	Advantages and Disadvantages of MSM and FEM . . . . .	286
	References . . . . .	287
