1	Introduction	1
1.1	Visual Information Media Technologies	1
1.2	What Is and Is Not 3D Video?	3
1.3	Processing Scheme of 3D Video Production and Applications	5
	References	12
 Part I Multi-view Video Capture		
2	Multi-camera Systems for 3D Video Production	17
2.1	Introduction	17
2.1.1	Single-Camera Requirements	18
2.1.2	Multi-camera Requirements	19
2.2	Studio Design	20
2.2.1	Camera Arrangement	20
2.2.2	Camera	22
2.2.3	Lens	23
2.2.4	Shutter	24
2.2.5	Lighting	25
2.2.6	Background	26
2.2.7	Studio Implementations	27
2.3	Camera Calibration	29
2.3.1	Geometric Calibration	29
2.3.2	Photometric Calibration	36
2.4	Performance Evaluation of 3D Video Studios	41
2.5	Conclusion	42
	References	43
3	Active Camera System for Object Tracking and Multi-view Observation	45
3.1	Introduction	45
3.1.1	Fundamental Requirements for Multi-view Object Observation for 3D Video Production	45

3.1.2	Multi-view Video Capture for a Wide Area	46
3.2	Cell-Based Object Tracking and Multi-view Observation	50
3.2.1	Problem Specifications and Assumptions	50
3.2.2	Basic Scheme of the Cell-Based Object Tracking and Multi-view Observation	51
3.2.3	Design Factors for Implementation	52
3.2.4	Cell-Based Camera Control Scheme	54
3.3	Algorithm Implementation	55
3.3.1	Constraints between Design Factors and Specifications . .	56
3.3.2	Studio Design Process	62
3.3.3	Cell-Based Camera Calibration	63
3.3.4	Real-Time Object Tracking Algorithm	65
3.4	Performance Evaluations	65
3.4.1	Quantitative Performance Evaluations with Synthesized Data	65
3.4.2	Quantitative Performance Evaluation with Real Active Cameras	74
3.5	Designing a System for Large Scale Sport Scenes	77
3.5.1	Problem Specifications	78
3.5.2	Camera and Cell Arrangements	80
3.6	Conclusion and Future Works	83
	References	84

Part II 3D Video Production

4	3D Shape Reconstruction from Multi-view Video Data	91
4.1	Introduction	91
4.2	Categorization of 3D Shape Reconstruction Methods for 3D Video Production	93
4.2.1	Visual Cues for Computing 3D Information from 2D Image(s)	93
4.2.2	Full 3D Shape Reconstruction	96
4.2.3	Dynamic Full 3D Shape Reconstruction for 3D Video Production	104
4.3	Design Factors of 3D Shape Reconstruction Algorithms	106
4.3.1	Photo-Consistency Evaluation	106
4.3.2	Visibility and Occlusion Handling	109
4.3.3	Shape Representation and Optimization	113
4.4	Implementations and Performance Evaluations of 3D Shape Reconstruction Algorithms	118
4.4.1	3D Shape from Multi-view Images	118
4.4.2	Simultaneous 3D Shape and Motion Estimation from Multi-view Video Data by a Heterogeneous Inter-frame Mesh Deformation	131
4.5	Conclusion	142
	References	146

5	3D Surface Texture Generation	151
5.1	Introduction	151
5.1.1	Texture Painting, Natural-Texture Mapping, and Texture Generation	153
5.1.2	Problems in Texture Generation	156
5.2	Geometric Transformation Between a 3D Mesh and a 2D Image	158
5.3	Appearance-Based View-Independent Texture Generation	159
5.3.1	Notation and Studio Configuration	160
5.3.2	Generating Partial Texture Images	162
5.3.3	Combining Partial Texture Images	164
5.3.4	Discussions	166
5.4	View-Dependent Vertex-Based Texture Generation	169
5.4.1	Algorithm	170
5.4.2	Discussions	172
5.5	Harmonized Texture Generation	173
5.5.1	Background	173
5.5.2	Algorithm Overview	174
5.5.3	Mesh Optimization	177
5.5.4	View-Dependent Texture Deformation	183
5.5.5	Experimental Results	186
5.6	Conclusions	192
	References	193
6	Estimation of 3D Dynamic Lighting Environment with Reference Objects	195
6.1	Introduction	195
6.2	Lighting Environment Estimation Methods	196
6.2.1	Direct Methods	196
6.2.2	Indirect Methods	197
6.3	Problem Specifications and Basic Ideas	198
6.3.1	Computational Model	198
6.3.2	3D Shape from Silhouette and 3D Light Source from Shadow	201
6.3.3	Basic Ideas	203
6.4	Algebraic Problem Formulation	205
6.5	Algorithm for Estimating the 3D Distribution of Point Light Sources with the Skeleton Cube	207
6.5.1	Technical Problem Specifications	207
6.5.2	Skeleton Cube	208
6.5.3	Lighting Environment Estimation Algorithm	213
6.6	Performance Evaluation	216
6.7	Surface Reflectance Estimation and Lighting Effects Rendering for 3D Video	220
6.7.1	Generic Texture Generation	221
6.7.2	Lighting Effects Rendering	225

6.8	Conclusions	226
	References	228

Part III 3D Video Applications

7	Visualization of 3D Video	233
7.1	Introduction	233
7.2	3D Video Visualization System	234
7.3	Subjective Visualization by Gaze Estimation from 3D Video	236
7.3.1	3D Face Surface Reconstruction Using Symmetry Prior . . .	238
7.3.2	Virtual Frontal Face Image Synthesis	245
7.3.3	Gaze Estimation Using a 3D Eyeball Model	246
7.3.4	Performance Evaluation	248
7.3.5	Subjective Visualization	252
7.4	Conclusion	252
	References	254
8	Behavior Unit Model for Content-Based Representation and Edition of 3D Video	255
8.1	Introduction	255
8.2	Topology Dictionary	257
8.2.1	Dataset Clustering	259
8.2.2	Markov Motion Graph	260
8.3	Topology Description Using Reeb Graph	264
8.3.1	Characterization of Surface Topology with Integrated Geodesic Distances	264
8.3.2	Construction of the Multi-resolution Reeb Graph	265
8.3.3	Robustness	267
8.3.4	Advantage	268
8.4	Behavior Unit Model	270
8.4.1	Feature Vector Representation	270
8.4.2	Feature Vector Similarity Computation	271
8.4.3	Performance Evaluation	276
8.4.4	Data Stream Encoding	278
8.4.5	Data Stream Decoding	278
8.5	Applications	280
8.5.1	Behavior Unit Edition	280
8.5.2	Semantic Description	282
8.6	Performance Evaluations	283
8.6.1	Topology Dictionary Stability	283
8.6.2	3D Video Progressive Summarization	286
8.6.3	Semantic Description	288
8.7	Conclusion	289

10	3D Video Encoding	315
10.1	Introduction	315
10.1.1	Encoding 3D Visual Media into 2D Video Data	316
10.1.2	Problem Specification for 3D Video Encoding	319
10.2	Geometry Images	321
10.2.1	Overview	321
10.2.2	Cut Graph Definition	322
10.2.3	Parameterization	324
10.2.4	Data Structure Constraints	328
10.3	3D Video Data Encoding	328
10.3.1	Resolution	329
10.3.2	Encoding and Decoding	329
10.4	Stable Surface-Based Shape Representation	330
10.4.1	Stable Feature Extraction	331
10.4.2	Temporal Geodesic Consistency	331
10.4.3	Stable Surface-Based Graph Construction	332
10.5	Performance Evaluations	335
10.6	Conclusion	336
