

# Contents

<b>1</b>	<b>Introduction . . . . .</b>	<b>1</b>
<b>2</b>	<b>The Ultimate Objective of Climate Response Strategies, and a Desirable and Feasible International Framework . . . . .</b>	<b>7</b>
2.1	The Ultimate Objective (Article 2 of the UNFCCC), and the 2 Degree Target . . . . .	7
2.1.1	Brief History of Article 2 . . . . .	8
2.1.2	Interpretation of Article 2 . . . . .	10
2.1.3	2 Degree Target at the G8 Summit and International Negotiations . . . . .	16
2.2	2 Degree Target from the Viewpoint of Vertical Balance: What Does It Mean? . . . . .	19
2.2.1	Is a 2 Degree Increase Dangerous? . . . . .	19
2.2.2	No Adaptation Is Unrealistic . . . . .	20
2.2.3	Catastrophe and 2 Degree Target . . . . .	20
2.2.4	Feasibility of 2 Degree Target . . . . .	21
2.2.5	Uncertainty and 2 Degree Target . . . . .	25
2.2.6	2 Degree Target from a Cost and Benefit Perspective . . .	26
2.3	2 Degree Target from the Viewpoint of Horizontal Balance: Efficient Allocation of Scarce Resources . . . . .	30
2.4	What Kind of International Framework Will Be Desirable and Feasible? . . . . .	33
2.4.1	Current Situation . . . . .	33
2.4.2	Does a Legally Binding Treaty Work Well? . . . . .	34
2.4.3	Pledge and Review Is the Best Way for the First Step . . .	35
2.4.4	Common but Differentiated Responsibilities . . . . .	36
2.4.5	Taking Various Factors—Adaptation, Technology Innovation and Diffusion, and Funding—into Account . .	37
2.4.6	Geo-engineering as an Insurance . . . . .	38
2.5	Concluding Remarks . . . . .	39
	References . . . . .	39

<b>3 Mitigation Targets and Effort-Sharing Among Regions and Countries . . . . .</b>	<b>43</b>
3.1 Climate Change Mitigation Targets in the Context of Mitigation and Damage Costs, and Sustainable Development . . . . .	43
3.1.1 Climate Change Mitigation Targets in the Context of Balancing Climate Change Mitigation and Damages . . . .	44
3.1.2 Climate Change Mitigation in the Context of Sustainable Development . . . . .	48
3.2 Analysis of Major Economies' Mid- and Long-Term Mitigation Targets . . . . .	50
3.2.1 Methodology for Sharing GHG Emission Reduction Efforts . . . . .	52
3.2.2 Analysis of Mid-Term Mitigation Targets for Reasonable and Appropriate Effort-Sharing in Emission Reductions Among Regions and Countries . . . . .	54
3.2.3 Analysis of Long-Term Mitigation Targets for Reasonable and Appropriate Effort-Sharing in Emission Reductions Among Regions and Countries . . . . .	57
3.2.4 Policy Implications of Emission Allocations . . . . .	59
3.3 Concluding Remarks . . . . .	60
References . . . . .	61
<b>4 Balance Between Energy Security and Mitigation Responses . . . . .</b>	<b>63</b>
4.1 How to Accomplish the Three Targets of Economic Development, Energy Security, and Climate Protection . . . . .	63
4.1.1 Global Trend of Energy-Related CO <sub>2</sub> Emissions . . . . .	64
4.1.2 Energy Policy and Its Impacts on Energy Mix . . . . .	66
4.1.3 Energy Poverty . . . . .	68
4.2 Merits and Demerits of Each Energy Source . . . . .	68
4.2.1 Oil . . . . .	69
4.2.2 Natural Gas . . . . .	70
4.2.3 Coal . . . . .	71
4.2.4 Nuclear Energy . . . . .	72
4.2.5 Hydroelectricity . . . . .	75
4.2.6 Biofuels . . . . .	76
4.2.7 Other Renewable Energy . . . . .	77
4.3 Energy Mix in Major Consuming Countries . . . . .	79
4.4 World Energy Outlook and Its Implications for Climate Protection . . . . .	81
4.4.1 Two Scenarios of the World Energy Demand and CO <sub>2</sub> Emissions . . . . .	82
4.4.2 Asian Factor for the Global Energy Security and Climate Protection . . . . .	84
4.5 Concluding Remarks . . . . .	86
References . . . . .	86

<b>5</b>	<b>Cost of Mitigation</b>	89
5.1	Cost of Mitigation Technologies	89
5.1.1	Renewable Energies	90
5.1.2	Nuclear Power	92
5.1.3	Fossil Fuel Power with High Energy Efficiency	94
5.1.4	Carbon Dioxide Capture and Storage	95
5.1.5	Reforestation, Afforestation, Reduced Deforestation, and Forest Management	96
5.1.6	CO <sub>2</sub> Abatement Cost	97
5.2	Economic Impacts of Mitigation	99
5.2.1	Macroeconomic Costs	99
5.2.2	Analyses Using an Energy-Economy Model	101
5.3	Summary of Mitigation Cost and Implications	103
	References	103
<b>6</b>	<b>Balance Between Mitigation and Adaptation</b>	107
6.1	Impact of Climate Change	107
6.1.1	Future Estimate of Climate Change	108
6.1.2	Estimate of Global Impact	110
6.1.3	Detailed Estimate of Impact: The Case of Japan	112
6.2	Targets and Roles of Mitigation and Adaptation	117
6.2.1	Roles of Mitigation and Adaptation	117
6.2.2	Adaptation Options and Capacities	119
6.2.3	Costs of Adaptation	123
6.3	Mainstreaming Adaptation for Sustainable Development	125
	References	127
<b>7</b>	<b>Policies and Measures</b>	129
7.1	International Policies and Measures	129
7.1.1	Change of Circumstances	129
7.1.2	Price Approach vs. Quantity Approach Under Uncertainty	131
7.1.3	Macroeconomic Volatility (Uncertainty) and Robustness of Policies	135
7.1.4	Sectoral Approach	136
7.1.5	Lessons from the Montreal Protocol	138
7.1.6	Trade, Investment, and the Environment	139
7.1.7	Green Growth	140
7.1.8	Financial Assistance	141
7.2	Domestic Policies and Measures	142
7.2.1	Domestic Policies and Measures and Evaluation Criteria	142
7.2.2	Market-Based Instruments and Direct Regulations	144
7.2.3	Cap and Trade Focusing on the EU ETS	145
7.2.4	Cap and Trade, the Case in Japan	148
7.2.5	Voluntary Measures, Focusing on the Case in Japan	150

7.2.6	How to Promote Renewable Energy — on Feed in Tariff . . . . .	154
	References . . . . .	157
<b>8</b>	<b>Potential for Energy Efficiency Improvement and Barriers . . . . .</b>	<b>161</b>
8.1	Introduction . . . . .	161
8.2	Potential for Energy Efficiency Improvement . . . . .	162
8.2.1	Power Sector . . . . .	163
8.2.2	Iron and Steel Sector . . . . .	166
8.2.3	Cement Sector . . . . .	168
8.2.4	Transportation Sector . . . . .	170
8.2.5	Residential and Commercial Sectors . . . . .	170
8.3	Barriers to Technology Diffusion and Policy Implications . . . . .	172
8.3.1	Barriers to Technology Diffusion . . . . .	172
8.3.2	Numerical Analyses of Barriers to Technology Diffusion and Policy Implications . . . . .	174
	References . . . . .	176
<b>9</b>	<b>Technology Diffusion and Development . . . . .</b>	<b>179</b>
9.1	Diffusion and Development of Technology, and Experience in the Iron and Steel Sector . . . . .	180
9.1.1	Characteristics of the Iron and Steel Sector, and Efforts Toward Climate Change . . . . .	180
9.1.2	Current Situation of Technologies in the Japanese Iron and Steel Industry . . . . .	186
9.1.3	Actual Situation of Promotion of Technology Diffusion . . . . .	188
9.1.4	Further Development of the Public–Private Partnership . . . . .	191
9.2	Technological Development and Innovation of the Automobile and Our Automotive Society . . . . .	198
9.2.1	The Development of the Prius . . . . .	198
9.2.2	The Challenge to Mitigate Climate Change Illustrated by the Kaya Identity . . . . .	203
9.2.3	Climate Change Mitigation in the Transportation Sector . . . . .	205
9.2.4	Automotive Innovation . . . . .	214
9.2.5	Conclusion . . . . .	219
	References . . . . .	220
<b>10</b>	<b>Nuclear Accident at the Fukushima Daiichi Nuclear Power Plant, and Its Impact on Japanese Energy and Climate Policy . . . . .</b>	<b>223</b>
10.1	Impact on Japanese Energy Policies . . . . .	224
10.1.1	Effects from the Earthquake and Tsunami on the Energy System . . . . .	224
10.1.2	Strategy for Japan’s Sustainable Power Supply and Demand . . . . .	225

10.1.3	Options for Japanese Energy Policy . . . . .	228
10.1.4	Long-term Power Demand–Supply Analysis to 2030 . . . . .	232
10.1.5	Uncertainties and Best Demand–Supply Mix . . . . .	236
10.2	Impact on Japanese Climate Policies . . . . .	238
10.2.1	Impact on Implementing the Kyoto Protocol Target . . . . .	238
10.2.2	Impact on the Mid-term Target . . . . .	241
	References . . . . .	243
<b>11</b>	<b>Epilogue, IPCC and Communication . . . . .</b>	<b>245</b>
	References . . . . .	254

Climate Change Mitigation

A Balanced Approach to Climate Change

Yamaguchi, M. (Ed.)

2012, XX, 264 p., Hardcover

ISBN: 978-1-4471-4227-0
