

Contents

Part I Introduction

1	World Health Concerns	3
2	Metabolism and Epilepsy	15
3	Epidemiology of Epilepsy	29

Part II Generalized Seizures

4	Animal Models of Absence Seizures.....	43
5	Absence Seizures in Humans	57
6	Tonic Seizures in Animals	67
7	Human Tonic Epilepsy.....	75
8	Atonic Seizures	87
9	Tonic-Clonic Epilepsy in Animals	95
10	Tonic-Clonic Epilepsy in Humans	107
11	Juvenile Myoclonic Epilepsy in Animals.....	119
12	Juvenile Myoclonic Epilepsy in Humans	127

Part III Partial Epilepsies

13	Simple Partial Seizures.....	143
14	Models of Complex Partial Seizures: Animal Studies	153
15	Complex Partial Epilepsy in Humans	167

16	Nocturnal Epilepsy Animal Models	183
17	Human Nocturnal Epilepsy.....	193
Part IV Miscellaneous Epilepsies		
18	Febrile Seizures	209
19	Infantile Spasms.....	219
20	Gelastic Epilepsy	229
21	Landau–Kleffner Syndrome	239
22	Rasmussen’s Syndrome	251
23	Status Epilepticus.....	265
24	Epilepsy and Autism	277
25	Reactive Epilepsy: Phenylketonuria.....	289
Part V Medical Treatment		
26	Diagnostic Technology	299
27	Antiepileptic Drugs	309
28	Monotherapy and Polytherapy	319
29	Creatine Treatment.....	329
30	The Ketogenic Diet.....	337
31	Gene Therapy for Epilepsy	351
Part VI Surgical Epilepsy Treatment		
32	Neuroanesthesia in Epilepsy Patients	359
33	Vagus Nerve Stimulation	371
34	Deep Brain Stimulation	381
35	Surgical Resection.....	393
Part VII Other Aspects of Epilepsy		
36	Pediatric Concerns.....	411
37	Pseudoseizures.....	423

38 Psychosocial Aspects of Epilepsy	433
39 Quality of Life for Epileptics.....	445
40 Epilogue: Comments and Future Directions	457
References	465
Index.....	521

Epilepsy

Animal and Human Correlations

McCandless, D.W.

2012, XV, 532 p., Hardcover
