

Contents

1	Biogas and Biogas Energy: An Introduction	1
1.1	What is Biogas?	1
1.2	How is Biogas Generated?.....	2
1.3	Factors Which Influence Anaerobic Digestion of an Organic Substrate	5
1.3.1	C/N Ratio	5
1.3.2	Dilution	6
1.3.3	pH.....	6
1.3.4	Temperature.....	7
1.3.5	Loading Rate	7
1.3.6	Retention Time.....	7
1.3.7	Toxicity.....	9
1.3.8	Mixing/Agitation.....	9
1.3.9	Pathogens	9
1.3.10	Solid Residue/Slurry	9
	References.....	10
2	A Brief History of Anaerobic Digestion and “Biogas”	11
2.1	Introduction: Discovery of Biogas.....	11
2.2	Development of Anaerobic Digestion as a Wastewater Treatment Process	12
2.3	Biogas and Developing Countries.....	12
2.3.1	India.....	12
2.3.2	China	14
2.3.3	Nepal	15
2.3.4	Vietnam	16
2.3.5	Bangladesh	16
2.3.6	Sri Lanka	16
2.3.7	Other Developing Countries.....	18
2.4	Use of Anaerobic Digestion Elsewhere	18
	References.....	22

3	Biogas and Global Warming	25
3.1	Introduction.....	25
3.2	Sources of Methane: General.....	27
3.2.1	Human-Related Sources.....	27
3.2.2	Natural Sources	29
3.3	Sources of Methane in the Form of Biogas Produced Due to Anthropogenic Causes.....	33
	References.....	33
4	Low-Rate and High-Rate Anaerobic Reactors/ Digesters/Fermenters	35
4.1	General.....	35
4.2	“Low-Rate” and “High-Rate” Anaerobic Reactors	36
	References.....	39
5	Biogas Capture from Animal Manure	41
5.1	Introduction.....	41
5.2	Some Well-Known Low-Rate Digesters	42
5.2.1	Floating-Dome Biogas Plant: The Khadi and Village Industry Commission Model	42
5.2.2	Floating-Dome Biogas Plant: The Indian Agricultural Research Institute Model	44
5.2.3	Fixed-Dome Biogas Plants: The “Chinese”/“Janata”/“Deenbandhu” Models.....	45
5.2.4	“Balloon Digester”	48
5.2.5	The Basic Limitation of the Low-Rate “Biogas Digesters” Described in the Preceding Sections	49
5.3	Large-Scale Manure Digesters Used in Developed Countries and, Now Increasingly, in Some Developing Countries Too	50
5.3.1	The Rising Trend of Methane Capture.....	50
5.3.2	Technology Employed.....	52
	References.....	62
6	Biogas Capture from Wastewaters: The High-Rate Anaerobic Digesters	63
6.1	Introduction.....	63
6.2	Emission of Methane from Wastewater as a Component of Biogas.....	64
6.3	The High-Rate Digesters.....	66
6.3.1	First Generation of High-Rate Digesters.....	67
6.3.2	Second Generation of High-Rate Digesters	72
6.3.3	Third Generation of High-Rate Digesters	81
	References.....	97

7 Biogas Capture from Solid Waste.....	105
7.1 Introduction.....	105
7.2 Multi-phase Digestion.....	107
7.3 Solid-Feed Anaerobic Digestion.....	110
7.4 High-Solids Anaerobic Digestion	113
7.5 Present Status of MSW Treatment by Anaerobic Digestion.....	115
7.5.1 Advantages and Challenges	115
7.5.2 Anaerobic Digestion of MSW in Europe	118
7.5.3 Anaerobic Digestion Systems for Treating MSW.....	122
7.5.4 Economics of MSW Digestion.....	136
References.....	142
8 Capture of Biogas from Landfills	145
8.1 Introduction.....	145
8.2 Landfill: Originated Methane Emissions	147
8.3 How Are Sanitary Landfills Laid Out.....	149
8.3.1 Making of Sanitary Landfills	150
8.3.2 Methane Biogas Capture	152
8.3.3 Utilization Options	158
8.4 LFG Capture in Developing Countries	160
8.5 Risks Associated with Landfills.....	161
8.5.1 Flammability	162
8.5.2 Toxicity.....	163
8.5.3 Reducing the Health Effects of Landfill Gas	165
8.5.4 Risk of Leachate Pollution	166
8.5.5 Methods of Leachate Disposal	166
8.6 “Bioreactor” Landfills.....	167
References.....	169

Biogas Energy

Abbasi, T.; Tauseef, S.M.; Abbasi, S.A.

2012, XIII, 169 p. 87 illus., 35 illus. in color., Softcover

ISBN: 978-1-4614-1039-3
