

Contents

1 Overview	1
1.1 Defense Against Foreign Compounds	1
1.2 Activation Enzymes and Detoxification Enzymes	2
1.3 Metabolic Intermediates.....	3
1.4 Genetic Polymorphism and Inducibility of Enzymes	3
1.5 Enzyme Modulation for Health Benefits	4
1.6 Catalytic Reactions of Metabolic Enzymes	4
Bibliography	5
2 Lipophilic Foreign Compounds	7
2.1 Lipophiles	7
2.2 Transport Across Cell Membranes	8
2.2.1 Major Transport Mechanisms	9
2.2.2 Channels and Transporters	10
2.3 Sites of Action.....	10
2.4 Excretion of Foreign Compounds	11
2.4.1 Renal Excretion.....	12
2.4.2 Hepatic Excretion.....	12
2.4.3 Reabsorption in the Kidney.....	13
2.5 Major Metabolic Pathways	13
2.5.1 Phase I Metabolism and Phase II Metabolism	13
2.5.2 Phase III Metabolism	15
Bibliography	15
3 Metabolic Conversion of Lipophilic Compounds.....	17
3.1 Phase I Metabolism.....	17
3.2 Phase II Metabolism	19
3.2.1 Conjugation Reactions	19
3.2.2 Nonconjugation Reactions	21

3.3	Toxication Versus Detoxification	22
3.3.1	Activation	22
3.3.2	Deactivation	23
3.3.3	Activation Versus Deactivation	23
	Bibliography	24
4	Phase I Enzymes	25
4.1	Activators	26
4.2	Oxidative Enzymes	26
4.2.1	Cytochrome P450	27
4.2.2	Flavin-Containing Monooxygenase	28
4.2.3	Amine Oxidase	28
4.2.4	Lipoxygenase	29
4.2.5	Alcohol Dehydrogenase	29
4.2.6	Aldehyde Oxidase	30
4.2.7	Xanthine Oxidase	30
4.2.8	Peroxidase	30
4.3	Reductive Enzymes	30
4.3.1	Nitroreductase	31
4.3.2	Azoreductase	31
4.4	Hydrolytic Enzymes	31
4.4.1	Carboxylesterase	31
4.4.2	Epoxide Hydrolase	32
4.5	Catalytic Actions	32
4.5.1	Oxidative Reactions	32
4.5.2	Reductive Reactions	34
4.5.3	Hydrolytic Reactions	35
	Bibliography	36
5	Phase II Enzymes	37
5.1	Excretors	37
5.2	Conjugation Enzymes	38
5.2.1	Uridine-Diphosphate-Glucuronosyltransferase	38
5.2.2	Glutathione S-Transferase	39
5.2.3	Sulfotransferase	40
5.2.4	N-Acetyltransferase	41
5.2.5	Methyltransferase	42
5.2.6	Acyltransferase	42
5.3	Nonconjugation Enzymes	43
5.3.1	Quinone Reductase	43
5.3.2	Epoxide Hydrolase	43
5.4	Catalytic Actions	44
5.4.1	Conjugation at O Atom	44
5.4.2	Conjugation at N Atom	45
5.4.3	Conjugation at C Atom	46
5.4.4	Conjugation at S Atom	46

5.4.5	Conjugation of Carboxylic Acid	46
5.4.6	Nonconjugation Reactions	47
	Bibliography	47
6	Reactive Intermediate Formation.....	49
6.1	Reactive Intermediates	50
6.2	Reactive Oxygen Species.....	51
6.3	Enzyme-Catalyzed Reactive Intermediate Formation	51
6.3.1	Mediation by Phase I Enzymes.....	52
6.3.2	Mediation by Phase II Enzymes.....	52
6.4	Interactions with Cellular Components	52
6.4.1	Protein Adducts.....	54
6.4.2	DNA Adducts.....	54
6.4.3	Lipid Peroxidation.....	55
6.4.4	Toxic Effects	55
6.5	Defense Against Reactive Intermediates	56
6.5.1	Conjugation Reactions	56
6.5.2	Glutathione.....	56
6.5.3	Antioxidant Enzymes.....	57
6.6	Factors Affecting Xenobiotic Toxicity.....	57
	Bibliography	58
7	Biomedical and Biochemical Effects	61
7.1	Exhibition of Foreign Compound Toxicity	61
7.1.1	Intrinsic Toxicity	61
7.1.2	Toxic Reactive Metabolites.....	62
7.1.3	Induction of Toxicity.....	62
7.2	Oxidative Stress	62
7.3	Oxidative Protein Damage	63
7.4	Oxidative DNA Damage	64
7.5	Lipid Peroxidation	64
7.6	Intervention with Mitochondria Functions	65
7.7	Interaction with Ion Transporters.....	65
7.8	Interference with Enzymatic Functions	66
7.9	Immune Suppression and Stimulation Effects	67
7.10	Chemical Carcinogenesis.....	68
	Bibliography	68
8	Genetic Variations in Metabolizing Enzymes.....	71
8.1	Role of Enzyme Genetic Polymorphisms in Alcoholism	72
8.2	Genetic Polymorphisms of Cytochrome P450.....	72
8.2.1	CYP2A6 Polymorphisms Affecting Nicotine Metabolism.....	73
8.2.2	CYP1A1 Polymorphisms Affecting Polycyclic Aromatic Hydrocarbon Metabolism	74
8.2.3	CYP2E1 Polymorphisms Affecting Nitrosamine Metabolism.....	75

8.3	Genetic Polymorphisms of Glutathione-S-Transferase	76
8.4	Species Difference in Enzyme Activity	77
8.4.1	Susceptibility to Aflatoxin Toxicity in humans, But Not in Mice	77
8.4.2	Resistance to Tamoxifen Toxicity in Humans, But Not in Rats	78
8.4.3	4-Ipomeanol Toxicity Differs Between Humans and Rodents	79
	Bibliography	80
9	Inducibility of Metabolizing Enzymes	83
9.1	Modulation of Phase I Enzymes	84
9.2	Modulation of Phase II Enzymes.....	84
9.3	Life Style Modification.....	86
9.3.1	Alcohol.....	86
9.3.2	Cigarette Smoke.....	86
9.4	Monofunctional and Bifunctional Inducers	86
9.5	Balance Between Activation and Detoxification	87
9.6	Antioxidant Response Element.....	88
9.7	Enzyme Modulation Against Potential Toxic Effects.....	89
	Bibliography	90
10	Induction and Inhibition Compounds.....	91
10.1	Defense Against Potential Toxicities	91
10.2	Sulforaphane and Isothiocyanates	92
10.3	1,2-Dithiole-3-Thione and Derivatives	93
10.4	Indole-3-Carbinol	95
10.5	Flavonoids and Isoflavones.....	96
10.6	Polyphenols.....	98
10.7	Organosulfur Compounds.....	98
10.8	Terpenes and Terpenoids	100
	Bibliography	101
11	Diets Rich in Enzyme Modulators.....	103
11.1	Dietary Contributions to Enzyme Modulation.....	104
11.2	Vegetables Rich in Enzyme Modulators	104
11.3	Fruits Rich in Enzyme Modulators	106
11.4	Herbs Rich in Enzyme Modulators.....	108
11.5	Beverages Rich in Enzyme Modulators.....	109
	Bibliography	110
12	Induction of Enzymes for Health Benefits	113
12.1	Enzyme Modulation as a Defense Mechanism.....	114
12.2	Monofunctional and Bifunctional Inducers	115
12.3	Role of Antioxidant Response Element.....	115

12.4	Dietary Inducers of Phase II Enzymes.....	117
12.4.1	Isothiocyanates.....	117
12.4.2	Sulforaphane	118
12.4.3	Indole-3-Carbinol.....	119
12.4.4	Allyl Sulfides.....	119
	Bibliography	120
13	Sources of Foreign Compounds	123
13.1	Foreign Compounds That Humans Are Exposed To	123
13.1.1	Food.....	123
13.1.2	Pharmaceuticals.....	124
13.1.3	Smoking	124
13.1.4	Household Products	124
13.1.5	Environmental Chemicals	125
13.2	Heterocyclic Amines.....	125
13.3	Nitrosamines	126
13.4	Polycyclic Aromatic Hydrocarbons.....	127
13.5	Azo Dyes	128
13.6	a,b-Unsaturated Aldehydes.....	129
13.7	Mycotoxins	129
13.8	Overdose of Drugs	130
13.8.1	Acetaminophen	131
13.8.2	Xanthine	131
13.8.3	Terfenadine.....	131
13.9	Household Products	132
13.9.1	Benzene.....	132
13.9.2	Di(2-ethylhexyl)phthalate	132
13.10	Environmental Chemicals.....	133
13.10.1	Diesel Exhausts.....	133
13.10.2	Arsenic in Drinking and Underground Water	133
13.10.3	Polychlorinated Biphenyls	134
	Bibliography	134
14	Catalytic Reactions of Phase II Enzymes.....	137
14.1	Cytochrome P450-Catalyzed Reactions	137
14.1.1	Hydroxylation of Aliphatic or Aromatic Compound.....	138
14.1.2	Epoxidation of Ether	138
14.1.3	Dehydrogenation of Alcohol or Aldehyde.....	138
14.1.4	Oxidation of N- or S-Compound.....	139
14.1.5	Dealkylation of Ether, Amide, or Carboxylic Acid.....	139
14.1.6	Oxidation of Carbon on Aromatic Ring.....	139
14.2	Flavin Monooxygenase-Catalyzed Reactions.....	140
14.3	Amine Oxidase-Catalyzed Reactions	140

14.4	Nitroreductase-Catalyzed Reactions.....	140
14.5	Azoreductase-Catalyzed Reactions	141
14.6	Molybdenum Hydroxylase-Catalyzed Reactions	141
14.7	Alcohol Dehydrogenase-Catalyzed Reactions	142
14.8	Peroxidase-Catalyzed Reactions.....	142
14.9	Carboxylesterase-Catalyzed Reactions.....	142
	Bibliography	142
15	Catalytic Reactions of Phase II Enzymes.....	145
15.1	UDP-Glucuronosyl Transferase-Catalyzed Conjugation Reactions	145
15.2	Glutathione S-Transferase-Catalyzed Conjugation Reactions	148
15.3	Sulfotransferase-Catalyzed Conjugation Reactions	149
15.4	Acyltransferase-Catalyzed Conjugation Reactions	149
15.5	N-Acetyltransferase-Catalyzed Conjugation Reactions	150
15.6	Methyltransferase-Catalyzed Conjugation Reactions.....	151
15.7	Quinone Reductase-Catalyzed Reactions	151
15.8	Epoxide Hydrolase-Catalyzed Reactions	152
	Bibliography	152
16	Diversified Classes of Enzyme Modulators.....	155
16.1	Substrate–Enzyme Interactions	156
16.2	Modulator–Enzyme Interactions	157
16.3	Michael Acceptor Functionalities.....	158
16.4	Diversities of Enzyme Inducers	159
	Bibliography	164
	Conclusion	167
	Index.....	171

Activation and Detoxification Enzymes

Functions and Implications

Chen, C.-H.

2012, XIV, 182 p., Hardcover

ISBN: 978-1-4614-1048-5
