

Contents

1	Introduction.....	1
	References.....	2
2	Background to Polymers and Composites.....	3
2.1	Fibers	3
2.2	Polymers	3
	2.2.1 Material Aspects	3
	2.2.2 Mechanics Aspects of Glassy Polymers	5
2.3	Effects of Fluids: Fundamental Aspects	6
2.4	Fiber Reinforced Composites: Basic Considerations	8
	References.....	10
3	Fluid Ingress Processes, Basic and Preliminaries.....	13
3.1	An Overview and Basic Scientific Concepts.....	13
3.2	A Brief Review of Classical Diffusion.....	15
3.3	The Simplest Classical Solution for Diffusion in a Plate.....	16
3.4	Interfacial Conditions.....	18
3.5	Concentration-Dependent Diffusion.....	22
3.6	Mobile and Bound Penetrant Molecules: Two Phase Diffusion	22
3.7	Diffusion Associated with Chemical Reaction.....	23
3.8	Effects of Fluid's Chemistry	24
3.9	Coupling Between Diffusion and Polymeric Relaxation: Two-Stage Diffusion	25
3.10	Coupling Between Fluid Ingress and Mechanical Strain or Stress.....	25
3.11	Coupling Between Diffusion and Damage.....	26
3.12	Fluid Ingress Within Fibers	27
3.13	Capillary Motion.....	27
3.14	Wicking Action	27
3.15	Osmosis	28

3.16	Relative Humidity (RH) and Equilibrium Moisture Content (M_{∞}).....	28
3.17	Temperature Dependence of Diffusion Coefficient	28
3.18	Time Scales	29
	References.....	29
4	Fluid Sorption Data and Modeling.....	31
4.1	Types of Weight-Gain Data	31
4.2	$D=D(T)$ Relationships.....	39
4.3	Saturation Weight-Gain Levels Vs. Relative Humidity	39
4.4	Fluid Effects on the Suppression of the Glass Transition Temperature T_g	44
4.5	Fluid Induced Swelling Data	45
4.6	Records of Moisture Distribution	45
4.7	Moving Fluid Fronts.....	49
4.8	Weight Gain Data Under Cyclic Exposure.....	49
4.9	Stress Effects on Fluid Ingress and Its Relation to Damage.....	52
4.10	Capillary Motion Within Composite Material	56
4.11	Thermal Spiking Effects.....	63
	References.....	63
5	Diffusion Models.....	69
5.1	Two Phase Diffusion: Additional Considerations.....	69
5.2	Two-Stage Diffusion	70
5.3	Free Volume Dependence	73
5.4	Concentration Dependence	74
5.5	Fiber Distribution and Shape	75
5.6	Stress Assisted Diffusion	75
5.7	Diffusion Coupled with Damage	82
5.8	Contradictory Effects of Hydrostatic Pressure	92
	References.....	93
6	Hygrothermal Viscoelastic Response	95
6.1	Data and Time-Temperature-Moisture Shifts	95
6.2	Residual Hygrothermal Stresses. Data and Analysis.....	99
6.3	Viscoelastic Modeling.....	108
6.4	Nonlinear Characterization	119
	References.....	120
7	Effects of Fluids on Mechanical Properties and Performance.....	123
7.1	Damage, Strength, and Durability.....	123
7.2	Fluid Effects on the Fracture Toughness, Fatigue Response, and Impact Resistance of Polymeric Composites.....	131
	References.....	139

8	Sea Water Effects on Foam-Cored Sandwich Structures	145
8.1	General	145
8.2	Ingress of Sea Water into Closed-Cell Polymeric Foams: Data and Observations	145
8.3	Sea Water Ingress into Closed-Cell Polymeric Foam. A Mechanics-Based Model.....	150
8.4	Foam Testing and Material Data	153
8.5	Facings Properties.....	157
8.6	Delamination of the Core/Facing Interface.....	158
	References.....	161
9	Special Issues	163
9.1	The Reverse Thermal Effect.....	163
9.1.1	Background and Existing Interpretations	163
9.1.2	An Alternate Interpretation	166
9.2	Effects of Polymer Aging on Fluid Uptake	167
9.3	Damage Susceptibility of Glass Fibers	167
9.4	Galvanic Corrosive Effects	169
	References.....	170
10	Concluding Remarks	173
	References.....	174
	Index.....	175

Fluid Effects in Polymers and Polymeric Composites

Weitsman, Y.J.

2012, XVI, 176 p., Hardcover

ISBN: 978-1-4614-1058-4
