

Contents

1	Introduction.....	1
2	Carpal Tunnel Syndrome, Electroneurography, Electromyography, and Statistics	3
2.1	Patient Cases	3
2.2	Electroneurography: Assessing Nerve Function.....	4
2.2.1	Nerve Physiology and Investigation.....	4
2.2.2	Diagnosing Carpal Tunnel Syndrome	9
2.3	Electromyography: Assessing Muscle Function.....	11
2.4	Diagnostic Measures: What Is (Ab)normal?	13
2.4.1	Sampling the Population.....	13
2.4.2	Normal Distributions.....	14
2.4.3	Descriptive Statistics.....	15
2.4.4	Correlations	16
2.4.5	Tips and Tricks When Using Descriptive Statistics.....	19
2.5	Electroneurography in Individual Patients	24
2.6	Other Applications of Electromyography in Neurology	28
2.7	Answers to Questions	29
	Glossary	29
	References.....	30
3	Tremor, Polymyography, and Spectral Analysis	33
3.1	Patient Cases	33
3.2	Tremor Recording: Polymyography and Accelerometry.....	34
3.3	Spectral Analysis.....	35
3.3.1	Tremor Frequency and Period	35
3.3.2	Toward Spectral Analysis of Tremor by Computer: Sampling	37
3.3.3	Obtaining Frequency Content from a Digitized Signal: Fourier Transform.....	41

3.3.4	Tips and Tricks when Interpreting Spectra	45
3.4	Tremor Analysis in Individual Patients	52
3.5	Other Applications of Spectral Analysis in Neurology	61
3.6	Answers to Questions	64
	Glossary	65
	References	66
4	Epilepsia, Electroencephalography, Filtering, and Feature Extraction	67
4.1	Patient Cases	67
4.2	Electroencephalography: Measuring the Brain in Action	68
4.3	Filtering	72
4.3.1	Biological Artifacts	74
4.3.2	Technical Artifacts	76
4.3.3	Filtering in the Frequency Domain	78
4.3.4	Types of Filters	82
4.3.5	Filtering in the Time Domain: Smoothing	84
4.3.6	Relationship Between Filtering in the Frequency and Time Domain	85
4.3.7	Dos and Don'ts of Filtering	87
4.4	Feature Extraction	87
4.4.1	Template Matching and Wavelet Analysis	89
4.4.2	EEG Spike Detection	89
4.5	EEG Findings in Individual Patients	91
4.6	Other Applications of EEG Recordings in Neurology	93
4.6.1	Monitoring of Carotid Artery Endarterectomy	94
4.6.2	Monitoring of Status Epilepticus in Intensive Care Units	96
4.6.3	Confirmation of Brain Death	98
4.7	Answers to Questions	99
	Glossary	100
	References	101
5	Multiple Sclerosis, Evoked Potentials, and Enhancing Signal-to-Noise Ratio	103
5.1	Patient Cases	103
5.2	Evoked Potentials: Assessing Sensory Pathway Functioning	104
5.3	Obtaining Evoked Potentials	104
5.3.1	Enhancing Signal-to-Noise Ratio	104
5.3.2	Stimulation Protocols	105
5.3.3	Assessing Reliability	107
5.3.4	Quantifying and Interpreting EPs	108
5.3.5	Steps in Calculation of Evoked Potential Averages	111

5.4	Types of Clinical Evoked Potentials.....	112
5.4.1	Visual Evoked Potential	112
5.4.2	Somatosensory Evoked Potential	115
5.4.3	Brainstem Auditory Evoked Potential (BAEP).....	117
5.5	Evoked Potentials in Individual Patients	119
5.6	Other Applications of Evoked Potentials in Neurology.....	121
5.6.1	Intraoperative Monitoring: SEP in Scoliosis Surgery	123
5.6.2	BAEP to Assess Hearing Threshold	125
5.7	Answers to Questions	125
	Glossary	126
	References.....	127
6	Cortical Myoclonus, EEG-EMG, Back-Averaging, and Coherence Analysis.....	129
6.1	Patient Cases	129
6.2	Simultaneous EEG-EMG Recording: Relating Brain and Muscle Activity.....	130
6.3	Back-Averaging.....	132
6.3.1	Principles of and Prerequisites for Back-Averaging	132
6.3.2	Back-Average Calculation	133
6.3.3	Tips and Tricks When Identifying EMG Onsets	134
6.4	Coherence Analysis	137
6.4.1	Coherence: Signal Correlation in the Frequency Domain	138
6.4.2	Tips and Tricks When Calculating Coherence	139
6.5	EEG-EMG Analysis in Individual Patients.....	142
6.6	Other Applications of Coherence Analysis in Neurology.....	147
6.6.1	EEG-EEG Coherence in Alzheimer's Disease	149
6.6.2	EEG-EMG Coherence Analysis for Tremor Diagnosis	150
6.6.3	Blood Pressure-Cerebral Blood Flow Coherence in Cerebral Autoregulation.....	150
6.7	Answers to Questions	152
	Glossary	152
	References.....	153
7	Psychogenic Movement Disorders, Bereitschaftspotential, and Event-Related Potentials.....	155
7.1	Patient Case	155
7.2	The Bereitschaftspotential: Recording the Intention to Move by Simultaneous EEG-EMG	156
7.3	Calculating Event-Related Potentials.....	158
7.3.1	Are Event-Related Potentials Different from Evoked Potentials?.....	158

7.3.2	Steps in Offline Calculation of Event-Related Potentials	159
7.3.3	Quantifying and Interpreting ERPs and the BP in Particular.....	160
7.3.4	Tips and Tricks When Calculating ERPs and the BP in Particular.....	166
7.4	Bereitschaftspotential in an Individual Patient	170
7.5	Other Applications of Event-Related Potentials in Neurology	172
7.5.1	Lateralized Readiness Potential (LRP)	173
7.5.2	Contingent Negative Variation (CNV)	175
7.5.3	Oddball Paradigm (P300)	175
7.6	Answers to Questions	176
	Glossary	178
	References.....	179
8	Brain Tumor, Preoperative Function Localization, and Source Localization	181
8.1	Patient Case	181
8.2	Preoperative Function Localization: Identifying Eloquent Brain Areas	183
8.3	EEG Source Localization	183
8.3.1	Principles.....	183
8.3.2	Alternative Methods	194
8.3.3	Tips and Tricks When Performing Source Localization	195
8.4	Preoperative Function Localization in an Individual Patient	197
8.5	Other Applications of Source Localization in Neurology	203
8.5.1	Epileptogenic Focus Detection	203
8.5.2	Evoked and Event-Related Potentials in General	205
8.6	Answers to Questions	206
	Glossary	206
	References.....	208
9	Neuromuscular Diseases, Ultrasound, and Image Analysis	209
9.1	Patient Cases	209
9.2	Ultrasound Imaging to Assess Muscle Structure	210
9.3	From Sound to Anatomical Images.....	211
9.3.1	Physics of Sound.....	212
9.3.2	Sound Waves in Biological Tissues	212
9.3.3	Diagnostic Muscle Ultrasound and Image Analysis.....	214
9.3.4	Tips and Tricks in Muscle Ultrasound Imaging and Analysis.....	220

9.4	Ultrasound Image Analysis in Individual Patients	221
9.5	Other Applications of Ultrasound Imaging in Neurology.....	225
9.5.1	Nerve Ultrasound	225
9.5.2	Early Diagnosis of Parkinson's Disease	227
9.6	Answers to Questions	228
	Glossary	229
	References.....	230
10	Cerebrovascular Disease, Ultrasound, and Hemodynamical	
	Flow Parameters.....	231
10.1	Patient Cases.....	231
10.2	Ultrasound Imaging of Extracranial and Intracranial Arteries.....	232
10.3	Hemodynamics and Ultrasound Imaging.....	234
10.3.1	Normal Flow	234
10.3.2	Abnormal Flow	237
10.3.3	The Doppler Effect	238
10.3.4	Pulsed Wave Doppler Ultrasound	242
10.3.5	Tips and Tricks in Duplex Ultrasound Imaging.....	243
10.4	Vascular Ultrasound Imaging in Individual Patients.....	247
10.5	Other Applications of Duplex and Doppler Ultrasound in Neurology	251
10.5.1	Intraoperative Neuromonitoring: Carotid Endarterectomy	251
10.5.2	Embolus Detection.....	252
10.5.3	Confirmation of Brain Death	253
10.6	Answers to Questions.....	253
	Glossary	254
	References.....	255
11	Spinal Dysfunction, Transcranial Magnetic Stimulation, and Motor Evoked Potentials.....	257
11.1	Patient Cases.....	257
11.2	Magnetic Stimulation of the Central Nervous System: Assessing the Pyramidal Tract	258
11.3	Motor Evoked Potentials	260
11.3.1	MEP Physiology	260
11.3.2	MEP Outcome Measures	262
11.3.3	Tips and Tricks for TMS	263
11.4	Repetitive TMS	267
11.4.1	rTMS Outcome Measures	268
11.4.2	rTMS Protocols	269
11.4.3	Tips and Tricks of rTMS	269
11.5	MEPs in Individual Patients.....	271
11.6	Other Applications of TMS and MEP in Neurology.....	275

11.6.1	Preoperative Motor Cortex Mapping	275
11.6.2	Intraoperative Monitoring	275
11.6.3	Experimental Treatment of Movement Disorders.....	275
11.7	Answers to Questions.....	277
	Glossary	278
	References.....	279
