

Contents

1	Elements of Parametric Control Theory of Market Economic Development	1
1.1	Components of Parametric Control Theory of Market Economic Development	1
1.2	Methods of Analysis of Structural Stability of Mathematical Models of National Economic Systems	3
1.3	Approach to Choosing (Synthesis) Optimal Laws of Parametric Control of the Development of National Economic Systems and the Analysis of Existing Conditions for the Solution of the Variational Calculus Problem of Choosing (Synthesis) Optimal Laws of Parametric Control in the Environment of the Given Finite Set of Algorithms	6
1.3.1	Statement of the Variational Calculus Problem of Choosing an Optimal Set of Parametric Control Laws for a Continuous-Time System.....	6
1.3.2	Analysis of Existing Conditions for the Solution of the Variational Calculus Problem of Choosing an Optimal Set of Parametric Control Laws for a Continuous-Time Dynamical System.....	8
1.3.3	Development of an Approach to Synthesis of Optimal Parametric Control Laws for the Development of National Economic Systems and the Analysis of Existing Conditions for a Solution to the Variational Calculus Problem of Choosing (Synthesis) Optimal Parametric Control Laws in the Environment of a Given Finite Set of Algorithms for CGE Models.....	9

1.4	Analysis of the Influence of Uncontrolled Parametric Disturbances on the Solution of the Variational Calculus Problem of Synthesis of Optimal Parametric Control Laws in the Environment of the Given Finite Set of Algorithms	14
1.5	Algorithm of the Application of Parametric Control Theory	16
1.6	Examples of the Application of Parametric Control Theory	19
1.6.1	Mathematical Model of the Neoclassic Theory of Optimal Growth	19
1.6.2	One-Sector Solow Model of Economic Growth.....	25
1.6.3	Richardson Model of the Estimation of Defense Costs	28
1.6.4	Mathematical Model of a National Economic System Subject to the Influence of the Share of Public Expense and the Interest Rate of Government Loans on Economic Growth	34
1.6.5	Choosing the Optimal Laws of Parametric Control of Market Economic Development on the Basis of the Mathematical Model of the Country Subject to the Influence of the Share of Public Expenses and the Interest Rate of Government Loans	37
1.6.6	Mathematical Model of the National Economic System Subject to the Influence of International Trade and Currency Exchange on Economic Growth.....	53
1.6.7	Forrester's Mathematical Model of Global Economy.....	66
2	Macroeconomic Analysis and Parametric Control of Equilibrium States in National Economic Markets	75
2.1	Factor Modeling of the Aggregate Demand in a National Economy: AD–AS Model	75
2.1.1	Problem Statement	75
2.1.2	Input Data	76
2.1.3	Model Construction	76
2.2	Macroeconomic Analysis of the National Economic State Based on IS, LM, IS–LM Models, Keynesian All-Economy Equilibrium. Analysis of the Influence of Instruments on Equilibrium Solution	91
2.2.1	Construction of the IS Model and Analysis of the Influence of Economic Instruments.....	92
2.2.2	Macroeconomics of Equilibrium Conditions in the Money Market.....	94

2.2.3	Macro-Estimation of the Mutual Equilibrium State in Wealth and Money Markets. Analysis of the Influence of Economic Instruments.....	97
2.2.4	Macro-Estimation of the Equilibrium State on the Basis of the Keynesian Model of Common Economic Equilibrium. Analysis of the Influence of Economic Instruments.....	99
2.2.5	Parametric Control of the Open Economy State Based on the Keynesian Model.....	101
2.3	Long-Term IS–LM Model and Mundell–Flemming Model.....	102
2.3.1	Problem Statement and Data Preparation	102
2.3.2	Model Construction	103
2.3.3	Final IS-LM-BP Model	111
2.4	Macroeconomic Analysis and Parametric Control of the National Economic State Based on the Model of a Small Open Country	113
2.4.1	Construction of the Model of an Open Economy of a Small Country and the Estimation of Equilibrium Conditions	114
2.4.2	Influence of Economic Instruments on Equilibrium Solutions and State of the Balance of Payments	121
2.4.3	Parametric Control of an Open Economy State Based on a Small Country Model	124
2.5	Modeling of Inflationary Processes by Means of Regression Analysis: Rational and Adaptive Expectations.....	125
2.5.1	Preparation of the Data for Factor Regression Models of Inflation.....	127
2.5.2	Construction of One-Factor Regression Models of Inflation.....	127
2.5.3	Construction of Multifactor Regression Models of Inflation.....	139
2.5.4	Construction of Autoregression Models of Inflation Rate.....	142
2.6	Conclusion	144
3	Parametric Control of Cyclic Dynamics of Economic Systems.....	145
3.1	Mathematical Model of the Kondratiev Cycle	145
3.1.1	Model Description	145
3.1.2	Estimating the Robustness of the Kondratiev Cycle Model Without Parametric Control.....	147
3.1.3	Parametric Control of the Evolution of the Economic System Based on the Kondratiev Cycle Model.....	148
3.1.4	Estimating the Structural Stability of the Kondratiev Cycle Mathematical Model with Parametric Control	150

3.1.5	Analysis of the Dependence of the Optimal Value of Criterion K on the Parameter for the Variational Calculus Problem Based on the Kondratiev Cycle Mathematical Model	151
3.2	Goodwin Mathematical Model of Market Fluctuations of Growing Economies	152
3.2.1	Model Description	152
3.2.2	Analysis of the Structural Stability of the Goodwin Mathematical Model Without Parametric Control	153
3.2.3	Problem of Choosing Optimal Parametric Control Laws on the Basis of Goodwin's Mathematical Model	154
3.2.4	Analysis of the Structural Stability of the Goodwin Mathematical Model with Parametric Control	157
3.2.5	Analysis of the Dependence of the Optimal Parametric Control Law on Values of the Uncontrolled Parameter of the Goodwin Mathematical Model	161
4	Parametric Control of Economic Growth of a National Economy Based on Computable Models of General Equilibrium	163
4.1	National Economic Evolution Control Based on a Computable Model of General Equilibrium with the Knowledge Sector	164
4.1.1	Model Description, Parametric Identification, and Retrospective Prediction	164
4.1.2	Finding Optimal Parametric Control Laws on the Basis of the CGE Model with the Knowledge Sector.....	189
4.1.3	Analysis of the Dependence of the Optimal Parametric Control Law on Values of Uncontrolled Parameters Based on the CGE Model with the Knowledge Sector	193
4.2	National Economic Evolution Control Based on a Computable Model of General Equilibrium of Economic Branches	195
4.2.1	Model Description, Parametric Identification, and Retrospective Prediction	195
4.2.2	Finding Optimal Parametric Control Laws on the Basis of the CGE Model of the Economic Sectors	211

- 4.2.3 Analysis of the Dependence of the Optimal Parametric Control Law on Values of Uncontrolled Parameters on the Basis of the CGE Model of Economic Sectors 214
 - 4.3 National Economic Evolution Control Based on a Computable Model of General Equilibrium with the Shady Sector..... 215
 - 4.3.1 Model Description, Parametric Identification, and Retrospective Prediction 215
 - 4.3.2 Finding the Optimal Values of the Adjusted Parameters on the Basis of the CGE Model with the Shady Sector..... 244
- 5 Conclusion..... 249**
- References..... 253**
- About the Authors..... 257**
- Index..... 259**

Macroeconomic Analysis and Economic Policy Based on
Parametric Control

Ashimov, A.A.; Sultanov, B.T.; Adilov, Z.M.; Borovskiy,
Y.V.; Novikov, D.A.; Nizhegorodtsev, R.M.; Ashimov, A.A.

2012, XIV, 266 p., Hardcover
