List of Figures	xi
List of Tables	xiii
Acknowledgements and Dedications	xv
About the Authors	xvii
Preface	xix
<b>Part I: The Context and Uniqueness of Human Evolution and Adaptation</b>	<b>1</b>
1 The Extraterrestrial Adaptation: Humanity, Evolution and Migration Into Space	3
How Anthropology Will Assist Human Space Migration	7
Physical Anthropology	7
Archaeology	8
Cultural Anthropology	9
Linguistic Anthropology	9
Anthropology and Space Colonization	10
An Anthropological and Evolutionary Primer for Building an Adaptationist Paradigm for Human Space Migration and Colonization	13
Anthropology	13
Evolution	14
Adaptation	18
Culture	19
Humanity	26
Synthesis	27
2 Stardust: The Origins of Life, Evolution and Adaptation	31
Origins of the Universe and the Solar System	31
Formation of the Solar System and the Earth	32
The Origins of Earth Life	34
Independent Evolution of Life on Earth	34
Panspermia	37
The Major Transitions in the Evolution of Earth Life	41
Transition 1: Replicating Molecules to Populations of Molecules in Compartments	41
Transition 2: Unlinked Replicators to Chromosomes	44
Transition 3: RNA to DNA	44
Transition 4: Prokaryotes to Eukaryotes	45
Transition 5: Asexual Replication to Sexual Replication	45

Transition 6: Protists to Multicellular Organisms	47
Transition 7: Eusocial Societies	48
Transition 8: Language and Symbolism	52
Larger Revolutions in the Evolution of Earth Life	52
Lessons from the Evolution of Earth Life	53
Early Hominin Origins and Evolution	54
Adaptive Evolutionary History of the Primate Order	55
The Early Hominins	56
Why Bipedalism?	58
The Australopithecines	60
Gracile australopithecines	61
Robust australopithecines	63
Evolution of Early Homo	64
Evolutionary Fate of the Australopithecines	66
The World of Early Homo	67
Increased Brain Volume	69
Increased Stone Tool Use	71
Increased Animal Tissue Consumption	73
Increased Body Stature	74
Decreased Tooth Size	75
Early Hominin Ecology, Behavior and Culture	76
Adaptive Lessons for Human Space Colonization	78
<b>3 The Adaptive Equipment of the Genus <i>Homo</i>: Symbolism and Niche Construction</b>	81
Evolution of the Modern Mind	81
The Donald Model: Representing Reality	82
Echoes of Representation	85
The Mithen Model: Cognitive Fluidity	86
Echoes of Fluidity	88
Synthesis: One Mind, Two Models?	90
Major Adaptations in Human Subsistence and Social Organization	95
Niche Construction and Major Adaptations in the Evolution of <i>Homo</i>	100
Adaptations of the Genus <i>Homo</i> : Overview and Lessons for Human Space Colonization	105
<b>Part II: Arguments For and Against Human Space Colonization</b>	111
<b>4 A Choice of Catastrophes: Common Arguments for Space Colonization</b>	113
Extinction	115
Civilization Collapse	116
Natural Threats to Humanity and Civilization	123
The End-Ordovician Mass Extinction	126
“The Great Dying”: The End-Permian Extinction	129
The End-Cretaceous Mass Extinction	132

Extinction of Humanity vs Extinction of Civilization	136
Human Threats to Humanity and Civilization	137
Civilization Collapse: Where Are the Maya?	137
Splendid Isolation: The Great Leap Backward of Ming Dynasty	
China	139
Nuclear Conflict	142
Pandemics	143
The Worst-Case Scenario	145
The Only Way Out is Up	147
<b>5 False Choices: Common Objections to Human Space Colonization</b>	151
Introduction	151
The Usual Objections: Humans <i>Cannot</i> Colonize Space	152
Space Colonization Would Be Too Technically Challenging	152
Humanity is Not Meant to Live in Space	159
The Usual Objections: Humans <i>Should</i> Not Colonize Space	165
Space Colonization Would Cost Money That Should be Spent on	
Earth Problems	165
Space Colonization Will Only Move Human Problems Off of	
Earth	170
Space Colonization Would Simply Be An Unnatural, Technocratic	
Project	172
Space Colonization Would Be Immoral	175
Conclusions	177
<b>Part III: Human Adaptation to Space: Lessons from the Past and Shaping the Future</b>	179
<b>6 Starpaths: Adaptation to Oceania</b>	181
Oceania: Initial Colonization of the Western Pacific	182
The Lapita Culture	183
Lapita Subsistence	184
Lapita Raw Materials and Tools	184
Lapita Social Organization	187
Post-Lapita Voyagers and Colonists of the Pacific	189
Traditional Polynesian Sailing Vessels	189
Traditional Polynesian Navigation	195
Traditional Polynesian Sailing Voyages	199
The Traditional Polynesian Voyaging Ethos of Exploration	201
Oceanic Adaptive Lessons for Human Space Colonization	202
<b>7 Building an Adaptive Framework for Human Space Colonization</b>	205
A Closer Look at Adaptation	206
Defining Adaptation	206
Learning from Adaptation for Human Space Colonization	207
Lesson 1: Adaptations Arise from Ecological Opportunities	208

Lesson 2: Successful Adaptations in Nature Can Be Characterized and Learned From	209
Lesson 3: Benefits of Collaboration	212
Lesson 4: Biological Adaptations are Sustainable	213
A Framework for Human Space Colonization	214
Cognitive Shifts Necessary to Promote Human Space Colonization	217
Cold War/Militaristic → Humanistic/Families in Space/People	217
Industrial/Mechanical → Human/Organic	217
‘The Right Stuff’/NASA Complex/Professional → Everyman/Pioneer	218
Short-term, Limited Goals → Long-Term, Infinite Future	218
Exploration → Colonization	219
Conquest of Nature → Adaptation to Nature	219
Limitations to Humanity → Increasing Human Options	220
Barely Possible → Possible and Routine	220
Destiny/March of Progress → Human-Directed Evolution	221
Costly Luxury → Responsible Investment	221
Spinoff Mentality → Survival Mentality	222
Technospeak → Common Speech	222
Principles of an Evolutionary/Adaptive Framework for Human Space Colonization	223
Values	225
Build Towards Evolutionary Success	226
Use Adaptive Principles	226
Use the Potential of Exaptation	226
Remember Proaction	227
Use of Nature-Based & Evolutionary Technologies	227
Use Technology for Humanity/Build Better Information Ecologies	227
Generate Cognitive Variation and Creativity by Encouraging Do-It-Yourself Projects	228
Continue Pure-Knowledge Research in Biology, Adaptation and Extinction, and Learn From Them	228
Grow More Effective Human Space Colonization Decision Cultures	230
Work to Human Strengths, and Beware Human Weaknesses	232
Strengths	232
Weaknesses	232
Synthesis	233
<b>8 Distant Lands Unknown: Informed Speculation on the Human Future in Space</b>	241
Where Can We Go? The Moon	242
Where Can We Go? Mars	243
Farther Afield: Worlds Beyond our Sun	247
What Will Change in Human Extraterrestrial Cultures?	249
What Will Change in Human Extraterrestrial Biology?	251

Mutagenesis	252
Founder Effect	253
Holobiont Evolution	253
Communicable Disease	253
Minimum Viable Population	254
Domesticate Health	254
The “Other”?	256
Here There Be Dragons	263
<b>Bibliography</b>	<b>267</b>
<b>Index</b>	<b>283</b>

Emigrating Beyond Earth

Human Adaptation and Space Colonization

Smith, C.; Davies, E.T.

2012, XXIII, 290 p. 45 illus., Softcover

ISBN: 978-1-4614-1164-2
