

# Contents

## Part I Introduction

- 1 Biofuels, the Larger Context** ..... 3  
Patrick C. Hallenbeck

## Part II Gaseous Biofuels

- 2 Hydrogen Production by Cyanobacteria** ..... 15  
Patrick C. Hallenbeck
- 3 Hydrogen Production: Light-Driven Processes – Green Algae** ..... 29  
Anatoly A. Tsygankov
- 4 Hydrogen Production: Photofermentation** ..... 53  
Alessandra Adessi and Roberto De Philippis
- 5 Fermentative Hydrogen Production** ..... 77  
Mona Abo-Hashesh and Patrick C. Hallenbeck
- 6 Microbial Electrolysis: Novel Biotechnology for Hydrogen  
Production from Biomass** ..... 93  
Hong Liu and Hongqiang Hu
- 7 Combined Systems for Maximum Substrate Conversion** ..... 107  
Alessandra Adessi, Roberto De Philippis,  
and Patrick C. Hallenbeck
- 8 Syntrophic Degradation of Fatty Acids by Methanogenic  
Communities** ..... 127  
Alfons J.M. Stams, Petra Worm, Diana Z. Sousa,  
M. Madalena Alves, and Caroline M. Plugge

<b>9 Anaerobic Digestion as an Effective Biofuel Production Technology .....</b>	<b>143</b>
Serge R. Guiot and Jean-Claude Frigon	
 <b>Part III Liquid Biofuels</b>	
<b>10 Advanced Bioethanol Production .....</b>	<b>165</b>
Dipankar Ghosh and Patrick C. Hallenbeck	
<b>11 Novel Strategies for Production of Medium and High Chain Length Alcohols.....</b>	<b>183</b>
Ana María López-Contreras, Wouter Kuit, Jan Springer, and Pieter A.M. Claassen	
<b>12 Microbial Production of Fatty-Acid-Based Biofuels.....</b>	<b>213</b>
Patrick C. Hallenbeck	
<b>13 Algae Oil .....</b>	<b>231</b>
Gustavo B. Leite and Patrick C. Hallenbeck	
<b>14 The Future of Biofuels, Biofuels of the Future .....</b>	<b>261</b>
Patrick C. Hallenbeck	
<b>Index.....</b>	<b>269</b>

Microbial Technologies in Advanced Biofuels Production

Hallenbeck, P.C. (Ed.)

2012, X, 274 p., Hardcover

ISBN: 978-1-4614-1207-6
