Part I Introduction to Medical Ceramics

1 History, Market and Classification of Bioceramics	3
1.1 Bioceramics.....	3
1.2 Classification of Bioceramics	6
1.2.1 Biopassive (Bioinert) and Bioactive Materials	6
1.3 Mechanisms of Bioactivity	7
1.3.1 Formation of a Silica-Rich Surface Layer	8
1.3.2 Direct Precipitation of Apatite	8
1.3.3 Protein Mediation.....	8
1.4 Biopassive Ceramics	8
1.5 Bioactive Ceramics	10
1.6 Resorbable Bioceramics.....	11
1.7 Currently Used Glasses and Glass Ceramics	11
1.7.1 Bioactive Glasses	11
1.7.2 Glass–Ceramics.....	13
1.7.3 Dental Ceramics.....	14
2 Selection Criteria of Ceramics for Medical Applications.....	19
2.1 Biocompatibility	19
2.2 Radioactivity	20
2.3 Esthetics	20
2.4 Refractive Index	21
2.5 Chemical Solubility	22
2.6 Mechanical Properties.....	24
2.6.1 Tensile Strength.....	25
2.6.2 Flexural Strength.....	26
2.6.3 Biaxial Flexural Strength	27
2.6.4 Fracture Toughness	28
2.6.5 Microhardness.....	29
2.6.6 Machinability	31

2.7	Thermal Behavior	32
2.7.1	Thermal Expansion	33
2.7.2	Differential Thermal Analysis.....	35
3	Grouping of Ions in Ceramic Solids	37
3.1	Ceramic Solids	37
3.2	The Structure of the Atom	38
3.3	Formation of Ions and Ionic Compounds	38
3.4	The Ionic Size	39
3.5	Coordination Number	40
3.6	Electronegativity	41
3.7	Bonding of Ions in Ceramic Solids.....	41
3.8	The Ionic Bond Strength.....	42
3.9	Prediction of the Ionic Packing Structure	42
3.10	Stability of the Coordination Structure	45
3.11	Solid Solutions	46
3.12	Model of Solid Solutions	48
3.13	The Feldspar Solid Solution Using Rules of Ions Grouping	49
3.14	The Basic Structural Units of Silicates	49
3.14.1	Neosilicates (Single Tetrahedra)	50
3.14.2	Sorosilicates (Double Tetrahedra).....	51
3.14.3	Cyclosilicates (Ring Silicates)	51
3.14.4	Inosilicates (Chain Structure Silicates).....	52
3.14.5	Phyllosilicates (Sheet Structure Silicates).....	52
3.14.6	Tectosilicates (Framework Silicates)	53
	Further Reading	54

Part II Manufacturing of Medical Glasses

4	Formulation of Medical Glasses	57
4.1	Glass Chemical Compositions	57
4.2	The Glass Stoichiometry	58
4.3	Factors Affecting the Glass Stoichiometry	59
4.4	Industrial Factors Affecting Glass Stoichiometry.....	60
4.5	Replacement of Oxygen by Fluorine in Glass Chemical Compositions	61
4.6	Information Needed for Glass Calculations.....	62
4.7	Calculation of Glass Chemical Compositions	63
4.8	Glass Chemical Composition in wt% (Weight Composition).....	63
4.8.1	Information Needed for Calculation	63
4.8.2	Steps of Calculation of the Glass Chemical Composition in wt%.....	64

4.9	Glass Chemical Composition in mol% (The Molar Composition)	65
4.9.1	Definition of a Mole	65
4.9.2	Steps of Calculation of the Chemical Composition in mol%	66
4.10	Conversion of Molar Composition (mol%) to Weight Composition (wt%)	67
4.11	Conversion of Weight Composition (wt%) to Molar Composition (mol%)	67
4.12	Calculation of the Glass Chemical Composition of K-Fluorrichterite	68
4.12.1	Information Needed for Calculation	68
4.12.2	Steps of Calculation of the Glass Chemical Composition in mol%	70
4.13	Conversion of Molar Composition to Weight Composition	71
4.14	Templates for Conversion of Glass of Molar Composition to Weight Composition	72
4.15	Glass Batch Calculations	72
4.16	Reaction and Decomposition of Raw Materials	73
4.16.1	Metal Carbonates	73
4.16.2	Metal Hydroxides	74
4.16.3	Borax and Boric Acid	74
4.17	Method of Calculation Glass Batch Compositions	75
4.18	Batch Calculation for Stoichiometric Canasite Glass	76
4.19	Batch Calculation for Stoichiometric Fluorrichterite Glass	77
	Further Reading	78
5	Theoretical Estimation of Glass Properties	79
5.1	Importance of Estimation	79
5.2	Additives Law	79
5.3	Calculation of Glass Density	81
5.3.1	Factors for Calculating the Glass density	82
5.3.2	Calculation of Density Change with Compositional Variation	84
5.4	Calculation of the Refractive Index of a Glass	85
5.4.1	Definition of the Refractive Index	85
5.4.2	Calculation of the Refractive Indices for Glasses with Known Density	86
5.5	Estimation of the Coefficient of Thermal Expansion of a Glass	88
5.5.1	Definition of the Linear Coefficient of Thermal Expansion	88
5.5.2	Coating a Glass to a Metal Substrate	89
5.5.3	Estimation of the Thermal Expansion from Glass Chemical Composition	90
	Further Reading	92

6	Design and Raw Materials of Medical Glasses.....	95
6.1	Design of Glass Composition	95
6.2	Raw Materials for Glass.....	96
6.2.1	Feldspars Fluxing Agent	97
6.2.2	Silica (SiO_2)	98
6.2.3	Alumina (Al_2O_3).....	99
6.2.4	Other Glass Raw Materials	99
6.3	Melting of Glass Batches	101
6.4	The Glass Structure and Conditions of Glass Formation	101
6.5	Glass Shaping into Block as Glass Ceramic Precursors	104
6.6	Transformation Range of Glass and Annealing of Glass Blocks	105
	References.....	106

Part III Manufacturing of Medical Glass Ceramics

7	Design of Medical Glass-Ceramics	109
7.1	Glass Ceramic Fabrication	109
7.2	Mechanisms of Nucleation and Crystallization	111
7.2.1	Bulk/Volume Nucleation.....	113
7.2.2	Surface Nucleation and Crystallization.....	114
7.3	Selection of Glass Compositions for Glass Ceramics Processing	114
7.4	Optimum Heat Treatment Conditions.....	115
7.5	Prediction of the Proper Glass Heat Treatment Schedule.....	116
7.5.1	Glasses Crystallizing via Bulk Volume Crystallization	117
7.5.2	Glass Crystallizing via Surface Crystallization Mechanism	119
7.5.3	Glasses Crystallizing by Both Mechanisms: Surface and Volume Crystallization.....	119
7.6	Interpretation of a Differential Thermal Analysis Curve.....	119
7.7	Interpretation of Thermal Expansion Curves.....	121
7.8	Significant Points on the Thermal Expansion Curve	124
7.9	Dependency of the TEC on Heat Treatment.....	125
7.10	Physical Changes Due to Crystallization	126
7.11	The Impact of Environment on Choosing the Right Glass Ceramic	128
7.12	Chemical Solubility of Glass-Ceramics.....	128
7.13	The Chemical Solubility of Canasite	130
	Further Reading	131

8	Microstructural Optimization of Glass Ceramics	133
8.1	Ceramic Microstructures	133
8.1.1	Crystalline Shapes, Forms, and Habits	134
8.2	Development of Glass Ceramic Microstructures	137
8.3	Adjustment of Microstructure	138
8.4	The β -Spodumene/Fluorophlogopite System	139
8.5	Leucite–Fluorophlogopite Glass Ceramics	142
8.6	Fluorcanasite Dental Glass Ceramics	146
	Further Reading	148
9	Development of Colour and Fluorescence in Medical Glass Ceramics	149
9.1	Coloured Glasses	149
9.2	Coloured Glass Ceramics	150
9.3	Colourants Based on Spinel Structure	150
9.4	Fluorescing Oxide Additives	151
9.4.1	Uranium Oxides	152
9.4.2	Cerium and Terbium Oxides	152
9.4.3	Europium Compounds	153
9.5	The Colour Evaluation	154
9.6	Measurement of Colour	156
9.6.1	Quantitative Measurement of Translucency or Opacity	156
9.6.2	The Masking Ability of Veneering Ceramics	157
9.6.3	Metamerism	158
9.7	Fluorescing Glass Ceramics	159
9.8	Development of Colours and Florescence in UV Regions	160
9.9	Metamerism in Glass Ceramics: The Problem and Solution	160
9.10	Opalescence	162
	References	164

Part IV Models of Dentally Used Glass Ceramics

10	Leucite Glass-Ceramics	167
10.1	Industrial Importance of Synthetic Leucite	168
10.2	The $K_2O-Al_2O_3-SiO_2$ Phase Diagram and Related Systems	169
10.3	Chemical Compositions of Leucite Ceramics	170
10.4	The Surface Crystallization Mechanism of Leucite	171
10.5	Crystalline Structure of Leucite	173
10.6	Crystalline Leucite Phases	175
10.6.1	Tetragonal Leucite Glass-Ceramics	176
10.6.2	Cubic Leucite Glass-Ceramics	177
10.6.3	Pollucite Glass-Ceramics	179

10.7	Criteria for Choosing the Compositions of Ceramic Coatings.....	179
10.8	Design of Glass-Ceramic Veneers for Metal Substructures.....	180
10.9	How to Modify Thermal Expansion Coefficient of Ceramic Coating	181
10.10	Opacity Development in Veneering Glass-Ceramics.....	185
10.11	Microstructural Optimization of Low Fusion Leucite Ceramics	187
10.12	Classification of Leucite Dental Glass-Ceramics	188
10.13	Glass-Ceramic Veneers for Metal or Ceramic Substructures.....	189
10.13.1	Low Fusion Leucite Glass-Ceramics for Coating Gold Alloys.....	189
10.14	Yellow Coloration in the Leucite Ceramics	190
	References.....	191
11	Machinable Mica Dental Glass-Ceramics	193
11.1	Mica Glass-Ceramics.....	193
11.2	Industrial Importance of Synthetic Mica	194
11.3	History of Synthetic Mica.....	194
11.4	Crystalline Structure of Mica.....	195
11.5	Structure of Fluorophlogopite.....	197
11.6	Chemical Reactions of Mica and Mica Related Phase Diagrams.....	198
11.6.1	MgO–MgF ₂ –SiO ₂ System	198
11.7	Chemical Compositions of Mica Glass-Ceramics	200
11.8	Development of Mica Glass-Ceramics Microstructures.....	202
11.9	The Crystallization of Tetrasilicic Mica	203
11.10	The Crystallization of Fluorophlogopite (Trisilicic Mica) Glass-Ceramics	204
11.11	Scientific and Technical Problems Encountered in Synthetic Mica Glass-Ceramics for Dental Applications	206
	References.....	207
12	Lithium Disilicate Glass Ceramics	209
12.1	Lithium Disilicate Glass-Ceramics.....	209
12.2	Advantages of Lithium Disilicate Glass Ceramics	210
12.3	Crystallization of Lithium Disilicate Glass Ceramics	210
12.4	Crystalline Phase Development	210
12.4.1	Mechanism of Crystallization	211
12.5	Chemical Composition of Lithium Disilicate Glass Ceramics	212
12.6	The Properties of Lithium Disilicate Glass Ceramics.....	214
12.7	Problems Encountered with Lithium Disilicate.....	216
	Further Reading	218

Part V Bioactive Glass and Bioactive Glass Ceramics

13 Bioactive Glasses	221
13.1 Nature of Bioactive Glass	221
13.2 Chemical Composition of Bioactive Glasses	222
13.3 Properties of Bioactive Glasses.....	224
13.4 Bioactivity of Bioactive Glasses	225
Further Reading	227
14 Models of Bioactive Glass Ceramics.....	229
14.1 Apatite Glass Ceramics	229
14.2 Apatite–Wollastonite Glass-Ceramics	230
14.3 Apatite–Fluorophlogopite Glass-Ceramics.....	232
14.4 Apatite–Mullite Glass-Ceramics	232
14.5 Fluorocanasite Glass Ceramics	233
14.6 Potassium Fluorrichterite Glass-Ceramics.....	235
References.....	236
Index	239

Glasses and Glass Ceramics for Medical Applications

El-Meliegy, E.; van Noort, R.

2012, XXIV, 244 p., Hardcover

ISBN: 978-1-4614-1227-4
