

# Contents

## Part I Three Fundamental Statistics Papers

- 1 W.R. van Zwet. Convex transformations: A new approach to skewness and kurtosis, *Statistica Neerlandica*, 18 (1964), 433–441. Reprinted with permission of John Wiley and Sons. 3
- 2 J. Fabius and W.R. van Zwet. Some remarks on the two-armed bandit. *Annals of Mathematical Statistics*, 41 (1970), 1906–1916. Reprinted with permission of the Institute of Mathematical Statistics. 13
- 3 W.R. van Zwet. Van de Hulst on robust statistics: A historical note, *Statistica Neerlandica*, 39 (1985), 81–95, 15 pp. Reprinted with permission of John Wiley and Sons 25
- 4 Commentary: Discussion of three statistics papers by Willem van Zwet, by Jon A. Wellner 41

## Part II Asymptotic Statistics

- 5 F.H. Ruymgaart, G.R. Shorack, and W.R. van Zwet. Asymptotic normality of nonparametric tests for independence. *Annals of Mathematical Statistics*, 43 (1972), 1122–1135. Reprinted with permission of the Institute of Mathematical Statistics 49
- 6 J. Oosterhoff and W.R. van Zwet. A note on contiguity and Hellinger distance. In *Contributions to Statistics, J. Hájek Memorial Volume*, J. Jurečková ed. Academia, Prague, (1979), 157–166 63
- 7 C.A.J. Klaassen and W.R. van Zwet. On estimating a parameter and its score function, In *Proceedings of the Berkeley Conference in Honor of Jerzy Neyman and Jack Kiefer, II*. Editors L. M. Le Cam and R. A. Olshen. Wadsworth Books/Cole, (1985), 827–840. Reprinted with permission of Springer Science+Business Media 73

- 8 C.A.J. Klaassen, A.W. van der Vaart, and W.R. van Zwet.  
On estimating a parameter and its score function, II. In *Statistical Decision Theory and Related Topics IV*, Volume 2, Editors S.S. Gupta and J.O. Berger (1988), Springer, New York, 281–288. Reprinted with permission of Springer Science+Business Media 87
- 9 E.W. van Zwet and W.R. van Zwet. A remark on consistent estimation. *Mathematical Methods of Statistics*, 8 (1999), 277–284. Reprinted with permission of Allerton Press. 95
- 10 Commentary: Finite samples and asymptotics, by Chris A.J. Klaassen 103

### Part III Second Order Asymptotics

- 11 P.J. Bickel and W.R. van Zwet. Asymptotic expansions for the power of distribution free tests in the two-sample problem. *The Annals of Statistics*, 6 (1978), 937–1004. Reprinted with permission of the Institute of Mathematical Statistics 117
- 12 P.J. Bickel, D.M. Chibisov, and W.R. van Zwet. On efficiency of first and second order. *International Statistical Review*, 49 (1981), 169–175. Reprinted with permission of the International Statistical Institute 185
- 13 W.R. van Zwet. A Berry-Esseen bound for symmetric statistics. *Zeitschrift für Wahrscheinlichkeit und Verwandte Gebiete*, 66 (1984), 425–440. Reprinted with permission of Springer Science+Business Media 193
- 14 P.J. Bickel and F. Götze, and W.R. van Zwet. The edgeworth expansion for U-statistics of degree two. *The Annals of Statistics*, 14 (1986), 1463–1484. Reprinted with permission of the Institute of Mathematical Statistics 209
- 15 Commentary: Entropic instability of Cramer’s characterization of the normal law, by S.G. Bobkov, G.P. Chistyakov and F. Götze 231

### Part IV Resampling

- 16 H. Putter and W.R. van Zwet. Resampling: Consistency of substitution estimators. *The Annals of Statistics*, 24 (1996), 2297–2318. Reprinted with permission of the Institute of Mathematical Statistics 245
- 17 P.J. Bickel, F. Götze, and W.R. van Zwet. Resampling fewer than  $n$  observations: Gains, losses and remedies for losses. *Statistica Sinica*, 7 (1997), 1–31. Reprinted with permission of Statistica Sinica 267

- 18 H. Putter and W.R. van Zwet. On a set of the first category.  
In *Festschrift for Lucien Le Cam*, Editors D. Pollard,  
E. Torgersen and G.L. Yang. Springer Verlag, New York (1997),  
315–323. Reprinted with permission  
of Springer Science+Business Media 299
- 19 Commentary: Discussion of three resampling papers,  
by Peter J. Bickel 309

## Part V Applications

- 20 M.C.M. de Gunst and W.R. van Zwet. A non-Markovian  
model for cell population growth: tail behavior and duration  
of the growth process. *Annals of Applied Probability*, 3 (1993),  
1112–1144. Reprinted with permission of the  
Institute of Mathematical Statistics 315
- 21 M. Fiocco and W.R. van Zwet. Parameter estimation for the  
supercritical contact process, *Bernoulli*, 9 (2003), 1071–1092.  
Reprinted with permission of the Bernoulli Society 349
- 22 N. Litvak and W.R. van Zwet. On the minimal travel time  
to collect  $n$  items on a circle. *The Annals of Applied Probability*, 14  
(2004), 881–902. Reprinted with permission of the Institute  
of Mathematical Statistics 371
- 23 Commentary: Applications: simple models and difficult theorems,  
by Nelly Litvak 393

## Part VI Probability

- 24 W.R. van Zwet. A proof of Kakutani's conjecture on random  
subdivision of longest intervals. *The Annals of Probability*, 6 (1978),  
133–137. Reprinted with permission of the Institute  
of Mathematical Statistics 403
- 25 W.R. van Zwet. A strong law for linear functions  
of order statistics. *The Annals of Probability*, 8 (1980), 986–990.  
Reprinted with permission of the Institute of Mathematical Statistics 409
- 26 D.M. Mason and W.R. van Zwet. A refinement of the KMT  
inequality for the uniform empirical process. *The Annals of Probability*,  
15 (1987), 871–884. Reprinted with permission of the Institute  
of Mathematical Statistics 415
- 27 W.R. van Zwet. The asymptotic distribution of point charges  
on a conducting sphere. In: *Statistical Decision Theory  
and Related Topics*, V, S.S. Gupta and J.O. Berger editors,  
Springer New York (1993), 427–430. Reprinted with  
permission of Springer Science+Business Media 429

- 28 R. Pyke and W.R. van Zwet. Weak convergence results  
for the Kakutani interval splitting procedure. *The Annals of Probability*,  
32 (2004), 380–423. Reprinted with permission of the  
Institute of Mathematical Statistics 433
- 29 Commentary: A discussion of Willem van Zwet’s probability papers,  
by David M. Mason 477

Selected Works of Willem van Zwet  
van de Geer, S.; Wegkamp, M. (Eds.)  
2012, XXIV, 484 p., Hardcover  
ISBN: 978-1-4614-1313-4
