

Contents

Preface.....	v
About the Author.....	vii
1. Introduction.....	1
1.1 In the Beginning.....	1
1.2 What Is “Life?”.....	6
1.3 The Miller Urey Experiment.....	10
1.4 General Background and Definitions.....	13
References	17
2. What is the Origin of the Lightest Elements?.....	21
2.1 The Big Bang.....	21
2.2 The Supernova Cosmology Project.....	25
2.3 The Wilkinson Microwave Anisotropy Probe.....	27
2.4 Olber’s Paradox	30
2.5 Big Bang Nucleosynthesis (BBN).....	31
References	38
3. What is the Origin of the Rest of the Elements?	41
3.1 Introduction to Stellar Nucleosynthesis	41
3.1.1 Hydrogen Burning	43
3.1.2 Helium Burning.....	49
3.1.3 Subsequent Burning Stages	50
3.2 After Stellar Burning.....	53
3.2.1 Creating a Core-Collapse Supernova Explosion	54
3.2.2 Synthesizing the Heavy Elements	56
3.2.3 White Dwarfs.....	61
3.2.4 Type Ia Supernovae.....	62
References	63

4.	Creation of Molecules in the Interstellar Medium.....	65
4.1	The Electromagnetic Spectrum.....	65
4.2	Detecting Photons of Different Energies	70
4.3	Secrets from Meteorites.....	74
4.4	Mining the Comets.....	77
4.5	The Next Huge Step: Forming Life from the Molecules Delivered to Earth.....	81
	References	84
5.	Amino Acids and Chirality	87
5.1	A Primer on Amino Acids	87
5.2	Chirality and Polarization	89
5.3	Relating Circularly Polarized Light and Molecular Chirality	93
5.3.1	Chiral Selection	94
5.3.2	A Little Atomic Physics and Some Very Basic Quantum Mechanics.....	96
5.4	The Other Molecules of Life	98
5.5	How Were the More Complex Molecules Created?.....	100
	References	105
6.	How Have Scientists Explained the Amino Acid Chirality?	107
6.1	Introduction to Models.....	107
6.2	Models That Produce Chirality.....	108
6.2.1	Chiral Selection via Circularly Polarized Sunlight	108
6.2.2	Chiral Selection via Starlight.....	110
6.2.3	Chiral Selection via the Weak Interaction	115
6.2.4	Chiral Selection via Chemical Selection in Clay	119
6.3	Amplification via Chemical Catalysis	120
6.4	Laboratory Experiments and Theoretical Developments	122
6.5	Terrestrial Amplification.....	123
6.6	Concluding Comments	124
	References	125

7. What Happens to the Amino Acids When the Supernova Explodes?	131
7.1 The Supernova	131
7.2 The Neutrino Story	135
7.3 Interactions of Neutrinos with ^{14}N	138
7.4 Relating the ^{14}N Spin to the Molecular Chirality	145
7.5 The Supernova Progenitor Star	147
References	153
8. Spreading Chirality Throughout the Galaxy and Throughout the Earth	157
8.1 Might Supernovae Process All the Amino Acids in the Galaxy?	157
8.2 Spreading Molecules and Enantiomerism Throughout the Galaxy	159
8.2.1 Cosmic Amplification	160
8.2.2 Galactic Mixing	161
8.2.3 Planetary Amplification	162
8.3 Testing the Models of Amino Acid Chirality	163
8.4 The Impact of Amino Acid Chirality on Questions of the Origin of Life in the Universe	168
8.5 Was the Development of Earthly Life a Fluke?	170
References	171
9. What About the Rest of the Universe?	175
9.1 Are We Alone?	175
9.2 Extremophiles on Earth	176
9.3 And From Outer Space?	181
References	185
Glossary	187
Index	209

Stardust, Supernovae and the Molecules of Life
Might We All Be Aliens?

Boyd, R.

2012, XI, 215 p. 39 illus., 26 illus. in color., Softcover

ISBN: 978-1-4614-1331-8
