

# Contents

## Part I Basic Principles

<b>1 Introduction</b> .....	3
Roel van de Krol and Michael Grätzel	
<b>2 Principles of Photoelectrochemical Cells</b> .....	13
Roel van de Krol	
<b>3 Photoelectrochemical Measurements</b> .....	69
Roel van de Krol	

## Part II Materials Properties and Synthesis

<b>4 Nanostructured <math>\alpha</math>-Fe<sub>2</sub>O<sub>3</sub> Photoanodes</b> .....	121
Kevin Sivula	
<b>5 Mixed Metal Oxide Photoelectrodes and Photocatalysts</b> .....	157
Kazuhiro Sayama	
<b>6 Combinatorial Identification and Optimization of New Oxide Semiconductors</b> .....	173
Bruce A. Parkinson	

## Part III Devices and Device Characterization

<b>7 Multijunction Approaches to Photoelectrochemical Water Splitting</b> .....	205
Eric L. Miller, Alex DeAngelis, and Stewart Mallory	

**Part IV Future Perspectives**

<b>8 Economic and Business Perspectives .....</b>	<b>277</b>
Julian Keable and Brian Holcroft	
<b>9 Emerging Trends in Water Photoelectrolysis .....</b>	<b>293</b>
Scott C. Warren	
<b>Index .....</b>	<b>317</b>

Photoelectrochemical Hydrogen Production

van de Krol, R.; Grätzel, M. (Eds.)

2012, VIII, 324 p., Hardcover

ISBN: 978-1-4614-1379-0
