

Contents

1	Nonlinear Continuous Dynamical Systems	1
1.1	Continuous Dynamical Systems.	1
1.2	Equilibriums and Stability	5
1.3	Bifurcation and Stability Switching	15
1.3.1	Stability and Switching	20
1.3.2	Bifurcations	38
1.3.3	Lyapunov Functions and Stability	47
1.4	Approximate Periodic Motions	49
1.4.1	A Generalized Harmonic Balance Method	49
1.4.2	A Nonlinear Duffing Oscillator.	51
1.4.3	Approximate Solutions	55
1.4.4	Numerical Illustrations.	59
	References	62
2	Nonlinear Discrete Dynamical Systems	63
2.1	Discrete Dynamical Systems.	63
2.2	Fixed Points and Stability.	65
2.3	Bifurcation and Stability Switching	79
2.3.1	Stability and Switching	84
2.3.2	Bifurcations	107
2.4	Lower Dimensional Discrete Systems	118
2.4.1	One-Dimensional Maps	119
2.4.2	Two-Dimensional Maps	120
2.4.3	Finite-Dimensional Maps	121
2.5	Routes to Chaos	123
2.5.1	One-Dimensional Maps	123
2.5.2	Two-Dimensional Systems	127
2.6	Universality for Discrete Duffing Systems	129
	References	133

3	Chaos and Multifractality	135
3.1	Introduction to Fractals	135
3.1.1	Basic Concepts	135
3.1.2	Fractal Generation Rules	139
3.1.3	Multifractals	140
3.2	Multifractals in 1D Iterative Maps	144
3.2.1	Similar Structures in Period Doubling	145
3.2.2	Fractality of Chaos Via PD Bifurcation	148
3.2.3	An Example	150
3.3	Fractals in Hyperbolic Chaos	153
3.3.1	Fractal Theory for Hyperbolic Chaos	154
3.3.2	A 1D Horseshoe Iterative Map	157
3.3.3	Fractals of the 2D Horseshoe Chaos	160
	References	164
4	Complete Dynamics and Synchronization	167
4.1	Discrete Systems with a Single Nonlinear Map	167
4.2	Discrete Systems with Multiple Maps	178
4.3	Complete Dynamics of a Henon Map System	182
4.4	Companion and Synchronization	193
4.5	Synchronization of Duffing and Henon Maps	210
	References	219
5	Switching Dynamical Systems	221
5.1	Continuous Subsystems	221
5.2	Switching Systems	222
5.3	Measuring Functions and Stability	229
5.4	Impulsive Systems and Chaotic Diffusions	256
5.5	Mappings and Periodic Flows	266
5.6	Linear Switching Systems	273
5.6.1	Vibrations with Piecewise Forces	277
5.6.2	Switching Systems with Impulses	282
5.6.3	Numerical Illustrations	285
	References	294
6	Mapping Dynamics and Symmetry	295
6.1	Discontinuous Dynamical Systems	295
6.2	G-Functions to Boundaries	298
6.3	Mapping Dynamics	300
6.4	Analytical Dynamics of Chua's Circuits	306
6.4.1	Periodic Flows	311
6.4.2	Analytical Predictions	316
6.4.3	Illustrations	318

6.5	Flow Symmetry	322
6.5.1	Symmetric Discontinuity	322
6.5.2	Switching Sets and Mappings	326
6.5.3	Grazing and Mappings Symmetry	329
6.5.4	Symmetry for Steady-State Flows and Chaos	337
6.6	Strange Attractor Fragmentation	345
6.7	Fragmentized Strange Attractors	353
	References	359
Appendix A: Linear Continuous Dynamical Systems		361
A.1	Basic Solutions	361
A.2	Operator Exponentials	369
A.3	Linear Systems with Repeated Eigenvalues	372
A.4	Nonhomogeneous Linear Systems	387
A.5	Linear Systems with Periodic Coefficients	390
A.6	Stability Theory of Linear Systems	393
A.7	Lower-Dimensional Dynamical Systems	405
A.7.1	Planar Dynamical Systems	406
A.7.2	Three-Dimensional Dynamical Systems	412
	References	424
Appendix B: Linear Discrete Dynamical Systems		425
B.1	Basic Iterative Solutions	425
B.2	Linear Discrete Systems with Distinct Eigenvalues	426
B.3	Linear Discrete Systems with Repeated Eigenvalues	433
B.4	Stability and Boundary	446
B.5	Lower-Dimensional Discrete Systems	463
B.5.1	Planar Discrete Linear Systems	465
B.5.2	Three-Dimensional Discrete Systems	477
