

Contents

1	Introduction	1
2	Digital Terrestrial Broadcasting Systems	3
2.1	Digital Terrestrial Radio Systems	4
2.1.1	The DAB-Family	4
2.1.2	Digital Radio Mondiale	7
2.1.3	HD Radio	9
2.2	Digital Terrestrial Television Systems	10
2.2.1	Digital Video Broadcasting (DVB-T)	10
2.2.2	Digital Video Broadcasting-Handheld (DVB-H)	13
2.2.3	Second Generation DVB (DVB-T2)	15
2.2.4	Next Generation Handheld DVB (DVB-NGH)	16
2.2.5	Integrated Service Digital Broadcasting (ISDB-T)	17
2.2.6	Advanced Television System Committee (ATSC)	18
3	Spectrum Management	21
3.1	International Organizations and Bodies	21
3.1.1	International Telecommunications Union (ITU)	22
3.1.2	European Conference of Postal and Telecommunications Administrations (CEPT)	24
3.1.3	European Commission (EC)	26
3.1.4	Inter-American Telecommunication Commission (CITEL)	28
3.1.5	Asia-Pacific Telecommunity (APT)	29
4	Frequency Planning Frameworks	31
4.1	The GE06 Agreement and Plan	32
4.1.1	Regional Radiocommunication Conference RRC-04	32
4.1.2	The Regional Radiocommunication Conference RRC-06 and the GE06 Agreement	36
4.2	Bilateral Frequency Planning in ITU-R Region 3	56
4.3	World Radiocommunication Conference 2007	58
4.4	Frequency Allocations for Broadcasting and Mobile Services	61

5	Digital Switch-Over in Broadcasting	65
5.1	Overview About the Digital Switch-Over in Europe	65
5.2	Overview About the Digital Switch-Over Outside Europe	69
5.2.1	Digital Switch-Over in Australia	70
5.2.2	Digital Switch-Over in the USA	72
6	Implementing the Digital Dividend	75
6.1	Defining a Digital Dividend	75
6.2	White Spaces in the UHF Range	79
6.3	Digital Dividend in Different Regions	82
6.3.1	Digital Dividend in Europe	83
6.3.2	Digital Dividend in the USA	84
6.3.3	Digital Dividend in Asia	86
6.4	Sharing Between Broadcasting and Mobile Service	87
6.4.1	Channelling Arrangements in the 800 MHz Band in Europe	88
6.4.2	Common and Minimal Technical Conditions for the Usage of the 800 MHz Band in Europe	90
6.4.3	Mitigation Techniques	92
6.4.4	Cumulative Interference Effect of Mobile Networks	93
6.5	Impact of Spectrum Reallocation on Frequency Plans for Broadcasting	96
6.6	Different National Cases	97
6.6.1	Germany	98
6.6.2	Australia	102
6.6.3	Some Observations on National Cases	105
7	Future Developments	107
7.1	Digital Dividend II	107
7.2	Relevant Technological Trends	112
7.2.1	Next Generation Mobile Networks	112
7.2.2	Software Defined Radio	113
7.2.3	Cognitive Radio	114
8	Strategic Considerations	117
8.1	Change of Paradigm in Broadcasting	117
8.1.1	Context of Media Usage	117
8.1.2	Evolution of Content	119
8.1.3	Future Receiver Technology	122
8.1.4	Hybrid Distribution Networks	123
8.2	New Strategic Direction	127
