

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Metal-Dielectric Interfaces in IC Chips	1
1.2	Materials Choices	3
1.3	Thermal and Electrical Stability	6
	References	8
<b>2</b>	<b>Metal–Dielectric Diffusion Processes: Fundamentals</b>	<b>11</b>
2.1	Thermal Diffusion	11
2.2	Field-Enhanced Ion Drift	14
2.3	Thermodynamics and Chemical Interactions	15
2.3.1	Pt–Dielectric Interface	17
2.3.2	Al–Dielectric Interface	18
2.3.3	Ta–Dielectric Interface	19
2.3.4	Cu–Dielectric Interface	19
2.4	Summary	20
	References	20
<b>3</b>	<b>Experimental Techniques</b>	<b>23</b>
3.1	Test Structures	23
3.1.1	Metal–Insulator–Metal	24
3.1.2	Metal–Insulator–Semiconductor	25
3.2	Electrical Measurements	33
3.2.1	Bias-Temperature Stress	33
3.2.2	Triangular Voltage Sweep	35
3.2.3	Leakage Current–Voltage	36
3.2.4	Time-Dependent Dielectric Breakdown	38
3.3	Elemental Characterizations	39
3.3.1	Rutherford Backscattering Spectrometry	39
3.3.2	Energy-Dispersive X-Ray Spectroscopy	40
3.3.3	X-Ray Photoelectron Spectroscopy	41

3.3.4	Secondary Ion Mass Spectrometry . . . . .	41
3.4	Summary . . . . .	43
	References . . . . .	43
<b>4</b>	<b>Al-Dielectric Interfaces.</b> . . . .	<b>45</b>
4.1	Al-SiO <sub>2</sub> Interface. . . . .	45
4.2	Al/Low- <i>k</i> Dielectric Interfaces . . . . .	47
4.3	Chemical Identification of Al-Ion Drift . . . . .	50
4.4	SiO <sub>2</sub> as a Dielectric Barrier Against Al-Ion Drift . . . . .	52
4.5	Summary . . . . .	54
	References . . . . .	55
<b>5</b>	<b>Cu–Dielectric Interfaces.</b> . . . .	<b>57</b>
5.1	Stability of Cu-SiO <sub>2</sub> in an Oxygen-Free Environment . . . . .	58
5.2	Instability of Cu-SiO <sub>2</sub> in an Oxygen-Containing Environment . . . . .	58
5.2.1	Cu-SiO <sub>2</sub> Under Thermal Stress . . . . .	59
5.2.2	Cu-SiO <sub>2</sub> Under BTS . . . . .	61
5.2.3	Leakage Current . . . . .	62
5.3	Origin of Cu Ions in SiO <sub>2</sub> . . . . .	63
5.4	Cu-Ion Diffusivity Inside SiO <sub>2</sub> . . . . .	64
5.5	Cu Ions in Porous Low- <i>k</i> Dielectrics . . . . .	65
5.6	Pre-Cleaning of Cu/Low- <i>k</i> Dielectric . . . . .	67
5.7	Cu Atoms in Porous Low- <i>k</i> Dielectric . . . . .	69
5.8	Dielectrics Containing No Oxygen. . . . .	71
5.9	Summary . . . . .	72
	References . . . . .	73
<b>6</b>	<b>Barrier Metal–Dielectric Interfaces.</b> . . . .	<b>75</b>
6.1	Barrier Metals on SiO <sub>2</sub> . . . . .	75
6.2	Barrier Metals on Low- <i>k</i> Dielectrics . . . . .	77
6.2.1	C–V Detection of Barrier Metal Ions in Low- <i>k</i> Dielectrics . . . . .	79
6.2.2	I–V Detection of Barrier Metal Ions in Low- <i>k</i> Dielectrics . . . . .	82
6.2.3	SIMS Detection of Barrier Metal Ions in Low- <i>k</i> Dielectrics . . . . .	85
6.2.4	TEM and EDX Detection of Barrier-Metal Ions in Low- <i>k</i> Dielectrics . . . . .	86
6.3	Summary . . . . .	86
	References . . . . .	88

<b>7 Self-Forming Barriers</b>	91
7.1 General Considerations	93
7.2 Cu(Al) Self-Forming Barrier	95
7.3 Cu(Mg) Self-Forming Barrier	99
7.4 Cu(Mn) Self-Forming Barrier	101
7.5 Refractory Metal Self-Forming Barrier Alloys	104
7.6 Summary	106
References	106
<b>8 Kinetics of Ion Drift</b>	109
8.1 Ion Distribution Simulations	110
8.2 Leakage Current	113
8.3 C–V Characteristics	116
8.4 Summary	123
References	124
<b>9 Time-Dependent Dielectric Breakdown (TDDB) and Future Directions</b>	127
9.1 Time-Dependent Dielectric Breakdown	127
9.1.1 Intrinsic Breakdown	128
9.1.2 Ion-Induced Breakdown	131
9.1.3 Additional Concerns in TDDB Modeling	135
9.2 Dielectric Pore-Sealing	139
9.3 Resistance-Switching Memory	141
9.4 Summary	143
References	144
<b>Index</b>	147

Metal-Dielectric Interfaces in Gigascale Electronics  
Thermal and Electrical Stability

He, M.; Lu, T.-M.

2012, XI, 149 p., Hardcover

ISBN: 978-1-4614-1811-5
