
Contents

1	Fundamental Theorem of Morphology	1
1.1	The Fundamental Theorem of Biological Morphology	1
1.2	The Universal Power of the Symmetry-Curvature Duality Theorem	2
2	Generative Theory of Shape	5
2.1	New Foundations to Geometry	5
2.2	Mathematical Theory of Transfer	7
2.3	Mathematical Theory of Recoverability: 1	15
2.4	Combining Transfer and Recoverability	22
2.5	New Theory of Symmetry-Breaking	24
2.6	External vs. Internal Inference	26
2.7	Algebraic Theory of Inheritance	28
2.8	Complex Shape	30
3	Process Grammar	35
3.1	Curvature Variation as Memory Storage	35
3.2	Differential Symmetry Axes	36
3.3	Symmetry-Curvature Duality	41
3.4	Curvature Extrema and the Symmetry Principle	43
3.5	Curvature Extrema and the Asymmetry Principle	43
3.6	General Shapes	45
3.7	The Three Rules	46
3.8	Process Diagrams	46
3.9	Applying the Rules	48
3.10	How the Rules Accord with the Procedure for Recovering the Past	51
3.11	The Four Extremum-Types	51
3.12	The Inferred Process-Types	53
3.13	Process-Continuations and Bifurcations	61
3.14	Continuation at M^+ and m^-	61
3.15	Continuation at m^+	62
3.16	Continuation at M^-	64
3.17	The Continuation Format	65

3.18	Bifurcation at M^+	66
3.19	Bifurcation at m^-	67
3.20	The Bifurcation Format	68
3.21	Bifurcation at m^+	69
3.22	Bifurcation at M^-	70
3.23	The Process Grammar	72
3.24	The Bifurcation-Causing Process	72
3.25	Causal Plausibility	74
3.26	Causal Effect on the Curvature Functions	79
3.27	Unfolding Groups and Process-Bifurcation	83
3.28	Operations and Operators	89
3.29	Parts of Shape	89
3.30	Interactive Singularity Theory	90
3.31	Appendix: Notes on Presentation	92
4	Pair-Creation	97
4.1	Introduction	97
4.2	The Pair-Creation Operator	98
4.3	The Application-Types	104
4.4	The Adding-On Structure of Pair-Creation	108
4.5	Zero Pair-Creation Operations	110
4.6	Misalignment of Processes	113
4.7	Erupting Effect on an Extremum-Side	117
4.8	The Complete Set of Pair-Creation Operations	118
4.9	Notation	120
5	Process-Theory of Parts (1)	125
5.1	The Definition of Parts in the New Foundations to Geometry	125
5.2	Two Fundamentally Important Parts	128
5.3	Shield Structures	130
5.4	More Examples of Shields	148
5.5	Car Design	151
5.6	Grasping	164
5.7	Bay Structures	168
5.8	Double Design Intent	177
5.9	Unification of Biological Morphology and Vehicle Design	184
5.10	Zone of Influence	186
5.11	Pinching Operator CC	191
5.12	The One-Stage Scenario	192
6	Process-Theory of Parts (2)	199
6.1	Part-Formation as Bifurcation	199
6.2	The Three Scenarios	208
6.3	Applying Continuation Operators	217
6.4	5-fold Radial-Undulation Operator $[C(6)B(5)]$	219
6.5	Double-Continuation of Complete Double-Compressive Parts	222

6.6	The n -fold Process-Bifurcation Operators $B(n)$ with the Odd Numbers n	224
6.7	Additional Process Grammar Operators	228
6.8	Important New CAD Operations	228
7	The Inadequacy of Catastrophe Theory for Morphology	233
7.1	Introduction	233
7.2	Process-Bifurcations and Continuations	235
7.3	Canonical forms in Catastrophe Theory	235
7.4	Causal Incompatibility of Catastrophe Theory	250
8	Interactive Singularity Theory	255
8.1	The Transversality Issue	256
8.2	Fundamental Transversality Role of the Continuation Operator	259
8.3	Control Space of an Interactive Unfolding	264
8.4	Separatrices in an Interactive Unfolding	265
8.5	Method 1 for Constructing the Zero-Separatrix	266
8.6	Quantitative Example of the Cm^+ Operation	275
8.7	Method 2 for Constructing the Zero-Separatrix	279
8.8	Additional Inadequacy of Catastrophe Theory in Modeling Spatial Morphology	294
8.9	Full Separatrix of the Interactive Unfolding of EA_3	295
9	The Structure of Interaction	297
9.1	Interactive Structure	297
9.2	Contact Structure	298
9.3	The Detailed Basis of Method 2	300
9.4	Comment on the Label EA_n	305
9.5	The Structures in Interactive Singularity Theory	305
9.6	The Universal Structure of Cm^+	310
9.7	The Intersection Structure of the Interactive Unfolding of EA_2	317
9.8	The Intersection Structure of the Interactive Unfolding of EA_3	323
10	Operators B and C in the Interactive Unfoldings of EA_3 and EA_{-3}	329
10.1	Introduction	329
10.2	Operations Bm^+ and Bm^- in the Interactive Unfolding of EA_3	330
10.2.1	Relation of Bm^+ and Bm^- to Critical-Point Manifolds	332
10.2.2	Relation of Bm^+ and Bm^- to the Full Separatrix for EA_3	335
10.3	Operations Cm^+ and Cm^- in the Interactive Unfolding of EA_3	337
10.4	Comment on EA_1 and EA_{-1}	340
10.5	Operations BM^- and BM^+ in the Interactive Unfolding of EA_{-3}	342
10.5.1	Relation of BM^- and BM^+ to the Critical-Point Manifolds. ..	344
10.5.2	Relation of BM^- and BM^+ to the Full Separatrix for EA_{-3} ..	347
10.6	Operations CM^- and Cm^+ in the Interactive Unfolding of EA_{-3}	348
10.7	The Preservation Scenario	357
10.8	Causal Structure	363

10.9	Quantitative Example of Bm^+	368
10.10	Quantitative Example of Bm^- and Subsequent CM^-	373
11	Operator π in the Interactive Unfoldings of EA_3 and EA_{-3}	379
11.1	Introduction	379
11.2	Pair-Creation and the Cusp Catastrophes A_3 and A_{-3}	379
11.3	Pair-Creation in the Interactive Unfoldings of EA_3 and EA_{-3}	385
11.4	Logical Relation between Bi-Valent Lines and Pair-Creation Operations	390
11.5	The Configuration of Positive and Negative Pair-Creation Operations in the Interactive Unfoldings of EA_3 and EA_{-3}	391
11.6	The c -Preservation Surface	394
11.7	Quantitative Example of $\pi\emptyset^{l+}$ with a c -Preserved Anchor-Extremum m^+	395
11.8	Quantitative Example of $\pi\emptyset^{l+}$ with a c -Preserved Anchor-Extremum m^-	406
11.9	Quantitative Example of $\pi\emptyset^{l-}$ with a c -Preserved Anchor-Extremum m^-	413
11.10	Zero Pair-Creation in the Interactive Unfoldings of EA_3 and EA_{-3} ..	423
11.11	The Pair-creation Operations in the Interactive Unfoldings of EA_3 and EA_{-3}	440
12	Operators CC and $[C(4)B]$ in the Interactive Unfoldings of EA_3 and EA_{-3}	441
12.1	Introduction	441
12.2	Two-Stage Scenario	442
12.3	One-Stage Scenario	446
12.4	Fundamental Fact of Interactive Singularity Theory	453
12.5	$[C(4)B]$ as Part-Formation	454
12.6	Quantitative Example of $[C(4)B]m^+$	454
12.7	Increasing the Pinching	458
13	Five-Fold Part-Formation Operators in the Symmetry-Restricted Interactive Unfoldings of EA_5 and EA_{-5}	461
13.1	Introduction	461
13.2	Symmetry-Restricted Butterfly Catastrophe	462
13.3	Inadequacy of Modeling 5-Fold Part-Formation in Catastrophe Theory	470
13.4	Symmetry-Restricted Interactive Unfolding of EA_5	473
13.5	Scenario 1	493
13.6	How Scenario 1 Relates the Symmetry-Restricted Interactive Unfolding of EA_5 to the Interactive Unfolding of EA_3	495
13.7	Scenario 2	498
13.8	Scenario 3	501
13.9	Symmetric Continuations on a Triple-Compressive Part	503

13.10	Five-fold Radial-Undulation Operator $[C(6)B(5)]$	512
13.11	Double-Continuation of Double-Compressive Parts	516
13.12	All Continuation Operators in the Symmetry-Restricted Interactive Unfolding of EA_5	518
13.13	Quantitative Example of the Operation $\pi^\downarrow\pi^\uparrow\emptyset^+$ Applied with m^+ Anchor-Extremum	520
13.14	Quantitative Example of Adding the Continuation Operation Cm^+ to the Previous Operation $\pi^\downarrow\pi^\uparrow\emptyset^+$	527
13.15	Quantitative Example of the Operation $\pi^\downarrow\pi^\uparrow\emptyset^-$	529
13.16	Quantitative Example of Adding the 2-Fold Pinching Operation CCM^- to the Previous Operation $\pi^\downarrow\pi^\uparrow\emptyset^-$	534
