

# Contents

<b>1</b>	<b>Introduction to Carbon Capture</b>	<b>1</b>
1.1	Relationship Between CO <sub>2</sub> and Climate	3
1.2	CO <sub>2</sub> Sources and Sinks	6
1.3	Formation Pathways of CO <sub>2</sub>	13
1.4	Advanced Coal Conversion Processes	17
1.5	Minimum Thermodynamic Work for CO <sub>2</sub> Separation	22
1.6	Cost of CO <sub>2</sub> Capture	27
	References	31
<b>2</b>	<b>Compression and Transport of CO<sub>2</sub></b>	<b>35</b>
2.1	Thermodynamic Properties of CO <sub>2</sub>	35
2.2	How a Compressor Works	37
2.3	Compression Cycles	39
2.4	Compressor Power	41
2.5	Advanced Compression	45
2.6	Pipeline Transport	46
	References	50
<b>3</b>	<b>Absorption</b>	<b>53</b>
3.1	Solubility of CO <sub>2</sub> in Aqueous Solutions	56
3.2	Diffusion of CO <sub>2</sub> in Aqueous Solutions	60
3.3	Chemical Kinetics of CO <sub>2</sub> in Solution	64
3.3.1	Role of Catalysis in Absorption	71
3.4	Determining the Rate of Absorption	73
3.4.1	Liquid-Phase Resistance: Mass Transfer Theories	75
3.4.2	Liquid-Phase Resistance: Mass Transfer Relations	86
3.5	Design Parameters for Packed Columns	88
3.5.1	Trays vs. Packing	89
3.5.2	Pressure Drop	91
3.5.3	Material Balances	91
3.5.4	Column Height Estimation	96
3.5.5	Column Diameter Estimation	100

3.6	Work Required for Separation	102
3.7	Problems	107
	References	110
<b>4</b>	<b>Adsorption</b>	<b>115</b>
4.1	Adsorption Fundamentals	117
4.1.1	Physical Adsorption	117
4.1.2	Chemical Adsorption	126
4.2	Common Types of Sorbents	129
4.2.1	Water Adsorption	135
4.2.2	Pore Characterization	136
4.2.3	Pelletization	141
4.3	Adsorption Kinetics	142
4.3.1	Diffusion in Pores	142
4.3.2	Mass Transfer	145
4.3.3	Heat-Transfer Effects	150
4.3.4	Axial Dispersion	151
4.4	Column Dynamics	152
4.4.1	Mass-Transfer Zone	152
4.4.2	Breakthrough	153
4.5	Adsorption Processes	157
4.6	Adsorption Cycles	159
4.7	Work Required for Separation	162
4.8	Problems	169
	References	171
<b>5</b>	<b>Membrane Technology</b>	<b>177</b>
5.1	Common Membrane Materials	179
5.2	Membrane Transport Mechanisms	179
5.3	Nonporous Membranes	180
5.3.1	Permeability and Selectivity	182
5.3.2	Solubility	188
5.3.3	Diffusion	191
5.4	Facilitated-Transport Membranes	195
5.5	Porous Membranes	197
5.6	Membrane Architecture	200
5.7	Product Purity and Yield	201
5.8	Pressure Drop	205
5.9	Membrane Modules and Flows	205
5.10	Multiple-Stage Separator Arrangements	207
5.11	Work Required for Separation	209
5.12	Problems	214
	References	215

<b>6</b>	<b>Cryogenic Distillation and Air Separation</b>	219
6.1	Cryogenic Distillation	219
6.2	Air Separation	222
6.2.1	Cryogenic Air Separation	224
6.2.2	Air Separation using Adsorption	225
6.2.3	Air Separation using Membrane Technology	226
	References	228
<b>7</b>	<b>The Role of Algae in Carbon Capture</b>	231
7.1	Microalgae to Biofuel	232
7.1.1	Theoretical Maximum of Algae-based Biofuel Production	233
7.1.2	Properties of Algae-based Biofuel	235
7.2	Microalgae Production	237
7.2.1	Cultivation Technology	238
7.3	CO <sub>2</sub> Mitigation Potential	240
7.4	Challenges of Microalgae-to-Biofuel Processes	240
	References	241
<b>8</b>	<b>The Role of CO<sub>2</sub> Reduction Catalysis in Carbon Capture</b>	245
8.1	Electrochemical Catalytic Reduction of CO <sub>2</sub>	247
8.2	Electrocatalysis Tutorial	247
8.3	Photocatalytic Reduction	253
8.4	Challenges in Catalytic Approaches to CO <sub>2</sub> Reduction	254
	References	255
<b>9</b>	<b>The Role of Mineral Carbonation in Carbon Capture</b>	257
9.1	Natural and Accelerated Weathering	258
9.2	Natural Alkaline Sources	259
9.2.1	Direct Carbonation	260
9.2.2	Indirect Carbonation	260
9.2.3	Ultramafic Mineral Carbonation	261
9.3	Brine Carbonation	263
9.4	Industrial Alkaline Sources	263
9.4.1	Aggregate Production from Mineral Carbonation	266
9.4.2	Alkaline Availability	267
9.4.3	Market Availability of Synthetic Aggregate Use	269
9.5	Challenges of Mineral Carbonation Processes for CCS	270
	References	271
	<b>Appendix</b>	275
	<b>Glossary</b>	305
	<b>Index</b>	317
