

Contents

1	Convergence in IT and Telecommunications.....	1
1.1	Introduction.....	1
1.2	Semantic Web and Services Management	3
1.3	Internet Services and Telecommunications.....	5
1.4	SOA and Cloud Computing	7
1.5	Conclusions.....	9
2	The Role of Semantics in ICT at the Cloud Era	11
2.1	Introduction.....	11
2.1.1	Importance of Using Ontologies in Pervasive Services and Management Operations.....	12
2.2	Important Concepts and Terminology	13
2.2.1	Context Information	13
2.2.2	Context-Awareness/Ubiquitous Computing.....	14
2.2.3	Policy-Based Management	14
2.2.4	Pervasive Services.....	14
2.2.5	Ontology Engineering	15
2.2.6	Autonomic Communications	15
2.2.7	Virtual Infrastructure and Cloud Computing	18
2.3	Ontology Engineering, Autonomic Computing and Cloud Computing Basis	21
2.3.1	Ontologies to Define, Represent and Integrate Context Information	23
2.3.2	Using Ontologies for Managing Operations in Pervasive Services.....	23
2.3.3	Autonomic Communications and Ontologies.....	25
2.3.4	Cloud Service Challenges and Ontology Engineering.....	26

2.4	Identifying Requirements for IT Infrastructures and Cloud Service Management	29
2.4.1	The Information Requirements	31
2.4.2	The User Requirements.....	43
2.4.3	The Technology Requirements	44
2.4.4	Cloud Computing Challenges and Trends	48
2.5	Conclusions.....	52
3	Using Ontology Engineering for Modelling and Managing Services	55
3.1	Introduction.....	55
3.2	Ontology Structures: Elements and Links	56
3.2.1	Concepts.....	57
3.2.2	Representation.....	57
3.2.3	Relationships.....	58
3.2.4	Functions.....	58
3.2.5	Instances.....	58
3.2.6	Axioms	58
3.3	Semantics and Pervasive Services	58
3.3.1	Understanding Context-Awareness and Its Usage Implications.....	60
3.4	Ontology Operations to Support Network and Cloud Service Management.....	67
3.4.1	Ontology Engineering.....	67
3.4.2	Autonomic Computing and PBM	73
3.5	Ontology Engineering Functions and Tools.....	81
3.5.1	Ontology as an Operational Mechanism.....	81
3.5.2	Ontology as a Specification Mechanism.....	84
3.6	Conclusions.....	85
4	Information Modelling and Integration Using Ontology Engineering	87
4.1	Introduction.....	87
4.2	Data and Information Modelling	89
4.2.1	Context Information Model	92
4.2.2	Definition of the Main Entity—Context Model Objects.....	93
4.3	Ontologies in Service and Network Management	94
4.3.1	Policy Structure.....	94
4.3.2	Policy Hierarchy	96
4.3.3	Policy Model.....	97
4.4	Ontology Engineering and Model Interactions.....	100
4.4.1	Context Information Model Based on Ontologies	101
4.4.2	Policy Information Model Based on Ontologies.....	103
4.4.3	Operations Management Model Based on Ontologies	106
4.4.4	Service Lifecycle Control Model Based on Ontologies.....	109
4.5	Conclusions.....	113

5	Ontology Engineering as Modelling Process in Service Management Architectures	115
5.1	Introduction	115
5.2	The Service Lifecycle—A Management Perspective	116
5.2.1	Service Creation	118
5.2.2	Service Customization	118
5.2.3	Service Management	119
5.2.4	Service Operation	119
5.2.5	Service Billing	119
5.2.6	Customer Support	119
5.3	Service Management Operations and Semantic-Based Services Control	120
5.3.1	Interactions in Service Management Operations	124
5.3.2	Service Distribution	126
5.3.3	Service Maintenance	127
5.3.4	Service Invocation	128
5.3.5	Service Execution	129
5.3.6	Service Assurance	130
5.4	Ontology-Based Operations Using Semantic-Based Rules	131
5.5	Conclusions	132
6	Ontologies for Cloud Service and Network Management Operations	135
6.1	Introduction	135
6.2	Service Management Benefits Using Ontology Engineering	136
6.2.1	Advances on Information Interoperability in the Future Internet	137
6.2.2	Benefits on Interoperability and Linked-Data by Using Ontology Engineering	138
6.3	Integration of Models by Using Ontology Engineering	139
6.4	Functional Blocks Architecture Supporting Information Interoperability	143
6.4.1	Onto-CONTEXT Framework Components Description	145
6.5	PRIMO Architecture—Information Model Interactions Middleware	147
6.5.1	PRIMO Framework Components Description	151
6.5.2	Policy Performer or Selector	153
6.5.3	Ontology-Based Policy Interactor	153
6.5.4	Policy Analyzer	153
6.6	Application Scenarios	154
6.6.1	Personalized Services—CACTUS	155
6.6.2	Seamless Mobility Applications and Services—MUSEUM CAW	157
6.6.3	Managing Complexity of Converged Networks and Services—Sir WALLACE	159

- 6.7 Emerging Business-Driven Architectures: Ontologies
and Management Systems in the Cloud..... 162
 - 6.7.1 Services Lifecycle Control of Virtual Infrastructures—
ELASTICS EMC2 164
- 6.8 Conclusions..... 166
- Bibliography** 167
- Index**..... 185
