

Contents

1	Grounding Language through Evolutionary Language Games	1
	Luc Steels	
1.1	Introduction	1
1.2	Language Games	6
1.3	Language Game Experiments	10
1.4	Conclusion	18
	References	20

Part I Embodiment and Behavior

2	Myon, a New Humanoid	25
	Manfred Hild, Torsten Siedel, Christian Benckendorff, Christian Thiele, and Michael Spranger	
2.1	Introduction	25
2.2	The Humanoid Robot Myon	27
2.3	The DISTAL System Architecture	35
2.4	Conclusion	42
	References	43
3	Neural Implementation of Behavior Control	45
	Matthias Kubisch, Christian Benckendorff, Benjamin Werner, Stefan Bethge, and Manfred Hild	
3.1	Introduction	45
3.2	Dynamical Systems and Recurrent Neural Networks	46
3.3	Sensorimotor Loops as the Source of Robot Motion	47
3.4	Getting Up and Keeping Balance	52
3.5	Grasping Objects	58
3.6	Conclusion	65
	References	66

4	Evolving Humanoid Behaviors for Language Games	67
	Frank Pasemann, Christian Rempis, and Arndt von Twickel	
4.1	Introduction	67
4.2	Simulating the Myon Humanoid	69
4.3	The Evolution Environment	70
4.4	Neuro-Control for the Myon Humanoid Robot	72
4.5	Examples of Developed Neuro-Controllers	78
4.6	Summary	85
	References	85
 Part II Perception		
5	A Perceptual System for Language Game Experiments	89
	Michael Spranger, Martin Loetzsch and Luc Steels	
5.1	Introduction	89
5.2	Visual Object Recognition and Tracking	91
5.3	Joint Attention and Social Learning in Robots	101
5.4	Discussion and Conclusion	107
	References	107
6	Posture Recognition Based on Slow Feature Analysis	111
	Sebastian Höfer, Michael Spranger, and Manfred Hild	
6.1	Introduction	111
6.2	Methods	113
6.3	Experiments	116
6.4	Multimodal Recognition of Simple Postures	117
6.5	Proprioceptive Recognition of Postures in a Complex Action Sequence	121
6.6	Conclusion and Outlook	128
	References	129
7	Grounded Internal Body Models for Communication: Integration of Sensory and Motor Spaces for Mediating Conceptualization	131
	Malte Schilling	
7.1	Introduction	131
7.2	Grounded Internal Models	133
7.3	Internal Body Model – Mean of Multiple Computation Network . .	137
7.4	Integration of Visual Features Into the Body Model	141
7.5	Conclusion: Recruitment of the Body Model in Communication . .	146
	References	148

Part III Conceptualization

8	Open-ended Procedural Semantics	153
	Michael Spranger, Simon Pauw, Martin Loetzsch, and Luc Steels	
8.1	Introduction	153
8.2	Motivating Example	154
8.3	Building Blocks of IRL	156
8.4	Representation of Compositional Meanings	160
8.5	Conceptualization and Interpretation	163
8.6	Open-Ended Adaptation of Semantic Structure	169
8.7	Discussion	170
	References	171
9	Dealing with Perceptual Deviation: Vague Semantics for Spatial Language and Quantification	173
	Michael Spranger and Simon Pauw	
9.1	Introduction	173
9.2	Strict Semantics	177
9.3	Lenient Semantics	180
9.4	Comparing Strict and Lenient Spatial Semantics	181
9.5	Quantification	185
9.6	Comparing Clustering to Strict Quantification	187
9.7	Discussion	188
9.8	Final Remarks	190
	References	190

Part IV Language Processing

10	Fluid Construction Grammar on Real Robots	195
	Luc Steels, Joachim De Beule, and Pieter Wellens	
10.1	Introduction	195
10.2	The processing level	198
10.3	The design level	208
10.4	Conclusions	211
	References	212
11	Diagnostics and Repairs in Fluid Construction Grammar	215
	Katrien Beuls, Remi van Trijp, and Pieter Wellens	
11.1	Introduction	215
11.2	Situated Interactions	216
11.3	A Meta-level Architecture for Problem Solving	218
11.4	The Salmon Game Revisited	226
11.5	Conclusion	232
	References	233

Part V Whole Systems Experiments

12	An Experiment in Temporal Language Learning	237
	Kateryna Gerasymova and Michael Spranger	
12.1	Introduction	237
12.2	Grounded Temporal Semantics	240
12.3	Syntactic Processing of Temporal Language	242
12.4	Acquisition of Temporal Language	246
12.5	The Aspectual Language Game	247
12.6	Stages in the Acquisition of Temporal Language	248
12.7	Experimental Results	251
12.8	Conclusion	253
	References	254
13	Emergent Action Language on Real Robots	255
	Luc Steels, Michael Spranger, Remi van Trijp, Sebastian Höfer, and Manfred Hild	
13.1	Introduction	255
13.2	The Mirror Problem	256
13.3	The Affordance Problem	263
13.4	Conclusions	274
	References	275
