**Part I What is Evidence-Based Practice
and How It Influences Clinical Practice**

1 Introduction and Overview	3
What is Evidence-Based Practice?	3
The Foundations and History of Evidence-Based Practice.	4
The Overall Goals of Evidence-Based Practice	6
Defining the Evidence-Based Medicine/Evidence-Based Practice Decision-Making Process	7
What Makes up the Evidence-Based Medicine/Evidence-Based Practice Decision-Making Model?	8
How the Evidence-Based Practice Decision-Making Process Differs From	10
‘Empirically Supported Treatments’ and ‘Best Practices’	10
Best Practices	10
Evidence-Based Practice in Social Work	12
Was There Not Any Previous Evidence that Treatments Worked? . . .	14
An Example: Is Medication Useful for Treating Depression?	15
Summary	17
2 Three Perspectives on Evidence-Based Practice	19
The Policy Level and Administrative Applications of Evidence-Based Practice	20
Using Evidence in Evaluations of the Performance of Professionals	23
Evidence-Based Practice, Many Ways of Knowing and Qualitative Research	25
Summary	30
A Starting Point for the Mental Health Practitioner	30

3	The Steps of Evidence-Based Practice in Clinical Practice:	
	An Overview	31
	The Six Steps of EBP in Clinical Practice	32
	Step 1: Drawing on Client Needs and Circumstances Learned in a Thorough Assessment, Identify Answerable Practice Questions and Related Research Information Needs	33
	Information Needs May Not Always Be About Selecting Treatments	34
	A Model for Framing Clinical Questions: The P.I.C.O.T. Model.	35
	Enhancing the Client–Practitioner Relationship	36
	Improving Diagnostic Assessment	37
	Selecting the Optimal Treatment	38
	Step 2: Efficiently Locate Relevant Research Knowledge	39
	An Example: What the Literature Shows About Light Therapy	41
	Step 3: Critically Appraise the Quality and Applicability of Located Knowledge to the Client’s Needs and Situation.	43
	Is This Research Applicable to My Client’s Needs and Situation?	48
	Step 4: Discuss the Research Results With the Client to Determine How Likely Effective Options Fit With the Client’s Values and Goals.	49
	Step 5: Synthesizing the Client’s Clinical Needs and Circumstances With the Relevant Research, Develop a Shared Plan of Intervention Collaboratively With the Client	51
	Step 6: Implement the Intervention	52
	Summary	52
4	Assessment in Clinical Social Work and Identifying Practice Information Needs	55
	Defining Assessment	55
	Components of an Assessment	56
	The Person-in-Environment Classification System	57
	The Risk and Resilience Framework	59
	Family Systems Models	60
	Psychodynamic Models	61
	American Psychiatric Association Guidelines: The Medical Model	63
	Assessment of Mental Health Disorders	65
	The Diagnostic and Statistical Manual of Mental Disorders	67
	Guidelines and Cautions Regarding Assessment and Diagnosis	69

Diagnostic Tests and Measures	70
A Social Work Assessment Format	71
An Example: Case of Samir—Identifying Practice Information Needs Through Assessment.	74
Conclusion	77
5 Locating Practice Research.	79
Starting Points	79
Print Resources	80
Online Resources	81
Disorder- or Diagnosis-Specific Online Resources	81
Program-Oriented Online Resources	84
General Online Resources Addressing Clinical Practice	84
Databases of Individual Research Articles.	85
Search Strategies	86
The Next Step in Evidence-Based Practice: Critically Appraising the Research Knowledge.	89
6 Evaluating Research: Research Designs in Evidence-Based Medicine/Evidence-Based Practice.	91
Research Designs.	92
Types of Clinical Studies	94
Part I: Experimental Studies	94
Effectiveness Versus Efficacy Studies: Experiments Done in Different Settings	98
Part II: Observational Studies, Including Non-interventive Studies.	100
Research Designs: Section Summary	104
7 Evaluating Research: Other Issues of Research Methodology in Evidence-Based Medicine/Evidence-Based Practice	107
Sampling Issues.	108
Increasing Statistical Power: Sample Size and Other Influences	111
The Human Diversity Included in Study Samples	112
Standardized Tests and Measures of Biopsychosocial Issues	113
Identifying and Locating Standardized Tests and Measures.	113
Identifying the Specific Properties of Tests and Measures.	114
Validity of Measures	115
Reliability of Measures	116
Reporting Validity and Reliability Assessments.	116
Interpreting Reports of Clinical Standardized Tests and Measures	117
Defining Treatments.	120

Treatment Manuals	122
Statistics	125
Levels of Measure	126
Parametric and Nonparametric Statistics: Differences in Population Distributions	127
The Five Uses for Statistical Tests.	128
Choosing a Statistical Test	130
The Misuse and Misinterpretation of Statistics in Published Reports	131
Reporting Statistics	131
Chapter Summary	135
8 Meta-Analysis and Systematic Reviews: Aggregating	
Research Results	137
Meta-Analyses as a Method of Research Synthesis	137
Meta-Analysis as a Statistical Technique	138
Systematic Reviews	139
Specifying the Systematic Review Topic	140
Locating Research Studies for a Systematic Review	141
Evaluating the Methodological Quality of Research Reports in Systematic Reviews	144
Coding Study Components and Results	145
Statistical Meta-Analysis.	145
Statistics Used in Meta-Analysis	146
Integrating Results and Identifying Limitations and Cautions . . .	148
An Example of a Cochrane Collaboration Systematic Review. . .	149
Evaluating Systematic Reviews	151
Chapter Summary	152
9 Shared Decision-Making with the Client	155
Reasons to Include the Client in the Decision-Making Process	156
Consistency with the <i>Code of Ethics</i>	156
The Importance of a Shared Approach.	156
Including the Client Strengthens the Alliance	156
The Shared Decision-Making Model	157
Differences in Client Approaches to Healthcare Decision Making	157
Mental Healthcare Providers Support Shared Decision Making	159
Factors to Consider During the Conversation	160
Key Dimensions of Client Input in Clinical Decision Making	161
Client Preferences and Goals	161
Safety Concerns	163

What if the Client Refuses all the Interventions with Strong Research Support?	163
Conclusion	164
10 Finalizing the Treatment Plan and Practice Evaluation	165
Discussing Treatment Options with the Client and Finalizing the Treatment Plan.	165
Documenting the Treatment Plan.	166
Implementing the Treatment	167
Practice Evaluation	168
Models of Practice Evaluation.	169
Single Case Evaluation and Evidence-Based Practice.	170
Instruments and Procedures for Practice Evaluation	172
Summary	175
Part II Case Examples of Evidence-Based Practice	
11 Sam: An Older, Gay Man Who Appears Depressed.	179
Applying Steps of Evidence-Based Practice to Case.	180
12 Ray: A Man Fearful of Panic Attacks	187
13 Sally: A 12-Year-Old Who has Reactive Attachment Disorder . . .	195
14 Newman and Loretta: Parents of Arthur, a Man Who has Schizophrenia.	203
15 Jin: A 16-Year-Old Korean–American Male with Drinking Issues	209
Applying Steps of EBP to Jin’s Needs	211
16 Jennifer: A Young Homeless Woman Who has Borderline Personality Disorder.	219
Part III Evidence-Based Practice in Clinical Social Work Education and Ongoing Issues	
17 Evidence-Based Practice: Teaching and Supervision	229
Teaching EBP	229
Defining EBP	230
Modeling the Complexity of Evidence-Based Practice in Teaching.	231
Examining the Social Work Curriculum.	233
Coordinating Social Work Professional Organizations	235

Shifting the Culture of Social Work.	236
Supervision and EBP	237
Summary	238
18 Continuing Issues Regarding Evidence-Based Practice	
in Practice	241
Challenges to Evidence-Based Practice in Practice.	242
Social Justice and Evidence-Based Practice.	242
Limitations to Available Research	242
Realities of Real-World Practice	243
Accessibility of Research	244
Ignores the Expertise of the Clinician.	245
Logistics and Realities of Evidence-Based Practice	
Implementation	246
Questions Related to Modifying the Intervention	247
Social Workers Compared to Other Professionals in the	
Evidence-Based Practice Movement.	248
Chapter Summary	249
19 Conclusion	251
Other Perspectives on Evidence-Based Practice	253
Evidence-Based Practice as a Shaping Influence on Research	
and Education	253
Evidence-Based Practice as a Public Idea that Shapes Policy	
and Practice Funding	254
Making the Most of Professional Expertise	255
Staying Close to Cases and to the Realities of Clinical	
Social Work Practice	255
Is Evidence-Based Practice Effective?	257
Appendix A: An Outline for a Biopsychosocial Assessment	
and Intervention Plan	259
Appendix B: A Bullet Point Summary of the Merits	
and the Limitations of Evidence-Based Practice	263
Glossary	271
References	281
Index	303

Evidence-Based Practice in Clinical Social Work

Drisko, J.W.; Grady, M.D.

2012, XVIII, 310 p. 3 illus., Hardcover

ISBN: 978-1-4614-3469-6
