

Contents

1	How to Make a Decision	1
1.1	Introduction	1
1.2	How to Structure a Decision Problem	2
1.3	Philosophy, Procedure and Practice of the AHP	3
1.4	Absolute and Relative Measurement and Structural Information	4
1.5	The Fundamental Scale	5
1.6	Comments on Benefit/Cost Analysis	7
1.7	The Eigenvector Solution for Weights and Consistency	7
1.8	How to Structure a Hierarchy	9
1.9	Hierarchic Synthesis and Rank	10
1.10	Normative: Descriptive	10
1.11	Rationality	12
1.12	Examples	12
1.13	Absolute Measurement	16
	1.13.1 Evaluating Employees for Raises	16
	1.13.2 Organ Transplantation	17
1.14	Applications in Industry and Government	18
	Bibliography	20
2	The Seven Pillars of the Analytic Hierarchy Process	23
2.1	Introduction	23
2.2	Ratio Scales	26
2.3	Paired Comparisons and the Fundamental Scale	29
2.4	Sensitivity of the Principal Eigenvector Places a Limit on the Number of Elements and Their Homogeneity	31
2.5	Clustering and Using Pivots to Extend the Scale from 1–9 to 1– ∞	31
2.6	Synthesis: How to Combine Tangibles With Intangibles—Additive Versus Multiplicative	33

2.7	Rank Preservation and Reversal	35
2.7.1	Guidelines for Selecting the Distributive or Ideal Mode	37
2.8	Group Decision Making	38
2.8.1	How to Aggregate Individual Judgments	38
2.8.2	On the Construction of Group Choice from Individual Choices	39
	Bibliography	40
3	Architectural Design	41
3.1	Introduction	41
3.2	Architectural Needs	42
3.3	Allocation of the Budget, Property and Architectural Spaces	44
3.4	Dimensions	45
3.5	Contiguity of Architectural Spaces	51
3.6	Conclusion.	60
	Bibliography	61
4	Why is the Principal Eigenvector Necessary?	63
4.1	Introduction	63
4.2	What is a Priority Vector?	64
4.3	Some Observations on Positive Reciprocal Matrices and their Perturbation	65
4.4	The General Case: How to Transform a Positive Reciprocal Matrix to a Near Consistent Matrix	66
4.5	Conclusions	69
	Bibliography	70
5	Designing a Mousetrap	71
5.1	Introduction	71
5.2	Effectiveness Criteria	71
5.3	Attracting the Mouse	74
5.4	The Trap Shape	75
5.5	The Cost and Benefits of the Trap	75
5.6	A Marketing Model	77
5.7	The Design	79
5.8	Conclusions	82
	Bibliography	82
6	Designing the Best Catamaran	83
6.1	Introduction	83
6.2	Basic Design	84

6.3	The Best Combination of Catamaran and Sloop: <i>A New Alternative</i>	85
6.4	The Keel	86
6.5	The Rudder	88
6.6	The Overall Mhm-Maran Structure	89
6.7	Conclusion.	93
	Bibliography	93
7	The Selection of a Bridge	95
7.1	Introduction	95
7.2	Three Alternative Bridge Types	96
7.2.1	Cable-Stayed Bridges	96
7.2.2	Truss Bridges.	98
7.2.3	Tied-Arch Bridges	99
7.3	The Decision Making Process	100
7.3.1	Stakeholders	100
7.3.2	Criteria	102
7.4	Judgements and Decisions	102
7.5	Bridge Selection Revisited.	103
7.6	Conclusion.	104
	Bibliography	105
8	Measuring Dependence Between Activities: Input–Output Application to the Sudan	107
8.1	Introduction	107
8.2	Application	108
	Bibliography	113
9	Technological Choice in Less Developed Countries	115
9.1	Introduction	115
9.2	Applications to Technology Transfer	116
9.3	An Example: Technology Transfer Using the AHP.	120
9.3.1	Prioritizing the Assessment Criteria with Sectors	121
9.3.2	Assessment of Candidate Technologies	124
	Bibliography	127
10	Market Attractiveness of Developing Countries	129
10.1	Introduction	129
10.2	Representation of the Problem	131
10.3	Priorities	132
10.4	Country Ratings	137
10.5	Positions of Countries	143
10.6	Conclusion.	146
	Bibliography	146

11	An Analytic Hierarchy Process Based Approach to the Design and Evaluation of a Marketing Driven Business and Corporate Strategy	149
11.1	Introduction	149
11.2	The Building Blocks of Strategy	149
11.3	An AHP Formulation of a Marketing Driven Business and Corporate Strategy	152
11.4	Applications.	153
11.4.1	Key Conclusions from the Applications	154
11.4.2	Specific Modifications	155
11.4.3	Areas Requiring Further Development	157
11.5	Conclusions	157
	Bibliography	158
12	New Product Pricing Strategy	159
12.1	Introduction	159
12.2	The Analytic Hierarchy Model.	161
12.2.1	Time Horizon Scenarios	162
12.2.2	Criteria	163
12.2.3	Alternative Strategies	165
12.3	Model Application	166
12.3.1	Reference Case	166
12.4	Sensitivity Analysis	167
12.5	Conclusions	168
13	Incorporating Expert Judgment in Economic Forecasts: The Case of the U.S. Economy in 1992	171
13.1	Introduction	171
13.2	On the Role of Judgment in Economic Forecasting	171
13.3	The Setting: A Sluggish Recovery/Structural Change	172
13.4	Application of AHP to the Macroeconomic Forecasting Problem	174
13.4.1	Decomposition of the Problem Hierarchically	174
13.4.2	Pairwise Comparison	177
13.4.3	Synthesis/Results	179
13.5	Conclusion.	183
	Bibliography	185
14	A New Macroeconomic Forecasting and Policy Evaluation Method	187
14.1	Introduction	187
14.2	A Few Words about Existing Econometric Models.	187
14.2.1	First Stage Problem	189
14.2.2	Second Stage Problem.	189

14.2.3	Quantitative Forecasts	191
14.3	Application of the AHP to Macroeconomic Policy	193
14.4	Conclusion.	197
	Bibliography	201
15	A New Approach to the Middle East Conflict:	
	The Analytic Hierarchy Process	203
15.1	Introduction	203
15.2	Developing a Comprehensive Approach	205
15.3	The Process	206
15.4	Implementing the process	207
15.5	The Retributive Function.	212
15.6	Discussion: The Gain to Loss Ratios of Concessions Made by Both Sides Need to be Close to One Another	232
15.7	Equalizing Concession Trade-Offs	233
15.8	Problems of Implementation: Some Skeptical Observations	235
15.9	Conclusions	236
	Bibliography	247
16	Legalization of Euthanasia	249
16.1	Introduction	249
16.2	The Analytic Hierarchy Model.	251
	16.2.1 Key Players	251
	16.2.2 Key Issues	252
16.3	Results	255
16.4	Sensitivity Analysis	258
16.5	Conclusions	262
	Bibliography	262
17	How Should Congress Address the Medicare Crisis?	263
17.1	Introduction	263
17.2	The Analytic Hierarchy Model.	265
17.3	Analysis of Benefits, Risks, Costs and Opportunities Components.	267
17.4	Ethical Considerations.	269
17.5	Results	269
17.6	Conclusions	272
18	Ethics in International Business	275
18.1	Introduction	275
18.2	The Analytic Hierarchy Model.	276
18.3	Model Application	277
18.4	Conclusions	279
	Bibliography	279

19	Abortion and the States: How will the Supreme Court Rule on the Upcoming Pennsylvania Abortion Issue?	281
19.1	Introduction	281
19.2	Subcriteria	282
19.3	Alternatives	283
19.4	Criteria	284
19.5	Conclusions	288
	Bibliography	289
20	The Benefits and Costs of Authorizing Riverboat Gambling	291
20.1	Introduction	291
20.1.1	Pending Legislation on Riverboat Gambling	291
20.1.2	Positions of Supporting and Opposing Parties	292
20.2	Problem Analysis	292
20.2.1	Judgement of Decision-Makers	294
20.2.2	Judgement of Groups Affected	295
20.2.3	Additional Judgements	297
20.3	Findings and Discussion	300
	Bibliography	301
21	To Drill or Not to Drill: A Synthesis of Expert Judgments	303
21.1	Introduction	303
21.2	Model for Estimating the Volume of Recoverable Oil	304
21.2.1	Definitions of Geologic Terms	304
21.3	Computation Process	306
21.4	Conclusions	310
	Bibliography	311
22	Modeling the Graduate Business School Admissions Process	313
22.1	Introduction	313
22.2	The Selection Process at the University of Pittsburgh	314
22.3	Admissions Selection Model	315
22.4	Implementing the Model	319
22.5	Conclusions	319
	Bibliography	321
23	Infertility Decision Making	323
23.1	Introduction	323
23.2	The Alternatives	324
23.2.1	Adoption	324
23.2.2	Artificial Insemination (AIH and AID)	325
23.2.3	In Vitro Fertilization	325
23.2.4	Surrogacy	326

23.3	Procedure	326
23.3.1	Benefit (Success)	326
23.3.2	Costs.	327
23.3.3	Risk	329
23.4	Results	329
	Bibliography	330
24	Deciding Between Angioplasty and Coronary Artery	
	Bypass Surgery	331
24.1	Problem.	331
24.2	The Model.	333
24.2.1	Benefit Analysis.	333
24.2.2	Risk Analysis.	337
24.3	Patients for Model	340
24.4	Conclusion.	340
Index	343

Models, Methods, Concepts & Applications of the
Analytic Hierarchy Process

Saaty, Th.L.; Vargas, L.G.

2012, XIV, 346 p., Hardcover

ISBN: 978-1-4614-3596-9
