<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Introduction	1
1.2	The Queuing System	1
1.3	Early Literature	2
1.4	Some Applications	3
1.5	Chapter Summaries	6
	Bibliography	8
<b>2</b>	<b>Preliminary Concepts</b>	<b>9</b>
2.1	Introduction	9
2.2	Some Useful Relations	9
2.3	Exponential Distribution	10
2.4	Poisson Distribution	10
2.5	Relation Between the Exponential and Poisson Distributions	11
2.6	Convolution of Two Poisson Variables	12
2.7	Erlang Distribution	12
2.8	Memory-Less Property of the Exponential Distribution	12
2.9	Cumulative Distribution for a Small Increment $h$	13
2.10	Probability Postulates	14
2.11	Difference Equations	14
2.12	Differential Equations	14
2.13	Equilibrium Equations	15
2.14	Reduced Equations	15
2.15	Probability of $n$ Units in the System ( $P_n$ )	16
2.16	Performance Measures	16
2.17	Wait Time in Queue Given a Delay ( $Wq'$ )	16
2.18	Little's Law	17
2.19	Kendall's Notation	17
	Bibliography	18

<b>3</b>	<b>One Server, Infinite Queue (M/M/1)</b>	19
3.1	Introduction	19
3.2	Difference Equations	20
3.3	Equilibrium Equations	20
3.4	Reduced Equations	20
3.5	Probability on $n$ Units in the System	20
3.6	Probability the System is Idle	21
3.7	Expected Units in the Service Facility ( $L_s$ )	21
3.8	Expected Units in the Queue ( $L_q$ )	21
3.9	Expected Units in the System ( $L$ )	22
3.10	Expected Time in Service ( $W_s$ ), Queue ( $W_q$ ) and System ( $W$ )	22
3.11	Expected Time in the Queue Given a Delay ( $W_q'$ )	22
3.12	Service Level	23
<b>4</b>	<b>One Server, Finite Queue (M/M/1/N)</b>	27
4.1	Introduction	27
4.2	Difference Equations	28
4.3	Equilibrium Equations	28
4.4	Reduced Equations	28
4.5	Probability on $n$ Units in the System	28
4.6	Probability the System is Idle	29
4.7	Expected Units in the Service Facility ( $L_s$ )	29
4.8	Lambda and Rho Effective	29
4.9	Expected Units in the Queue ( $L_q$ )	30
4.10	Expected Units in the System ( $L$ )	30
4.11	Expected Time in Service ( $W_s$ ), Queue ( $W_q$ ) and System ( $W$ )	30
4.12	Expected Time in the Queue Given a Delay ( $W_q'$ )	31
4.13	Service Level (SL) and Loss Probability (Ploss)	31
<b>5</b>	<b>One Server, No Queue (M/M/1/1)</b>	35
5.1	Introduction	35
5.2	Difference Equations	36
5.3	Equilibrium Equations	36
5.4	Reduced Equation	36
5.5	Probability on $n$ Units in the System	36
5.6	Probability the System is Empty	37
5.7	Expected Units in the Service Facility ( $L_s$ )	37
5.8	Lambda and Rho Effective	37
5.9	Expected Units in the Queue ( $L_q$ )	38
5.10	Expected Units in the System ( $L$ )	38

5.11	Expected Time in Service ( $W_s$ ), Queue ( $W_q$ ) and System ( $W$ ) . . . . .	38
5.12	Service Level and Loss Probability . . . . .	38
<b>6</b>	<b>Multi Servers, Infinite Queue (M/M/k)</b> . . . . .	41
6.1	Introduction . . . . .	41
6.2	Difference Equations . . . . .	42
6.3	Equilibrium Equations . . . . .	42
6.4	Reduced Equations . . . . .	42
6.5	Probability on $n$ Units in the System . . . . .	42
6.6	Expected Units in the Service Facility ( $L_s$ ) . . . . .	43
6.7	Expected Units in the Queue ( $L_q$ ) . . . . .	44
6.8	Expected Units in the System ( $L$ ) . . . . .	44
6.9	Expected Time in Service ( $W_s$ ), Queue ( $W_q$ ) and System ( $W$ ) . . . . .	44
6.10	Expected Time in the Queue Given a Delay ( $W_q'$ ) . . . . .	44
6.11	Service Level . . . . .	45
<b>7</b>	<b>Multi Servers, Finite Queue (M/M/k/N)</b> . . . . .	49
7.1	Introduction . . . . .	49
7.2	Difference Equations . . . . .	50
7.3	Equilibrium Equations . . . . .	50
7.4	Reduced Equations . . . . .	50
7.5	Probability on $n$ Units in the System . . . . .	50
7.6	Expected Units in the Service Facility ( $L_s$ ) . . . . .	51
7.7	Lambda and Rho Effective . . . . .	52
7.8	Expected Units in the Queue ( $L_q$ ) . . . . .	52
7.9	Expected Units in the System ( $L$ ) . . . . .	52
7.10	Expected Time in Service ( $W_s$ ), Queue ( $W_q$ ) and System ( $W$ ) . . . . .	53
7.11	Expected Time in the Queue Given a Delay ( $W_q'$ ) . . . . .	53
7.12	Service Level and Loss Probability . . . . .	53
<b>8</b>	<b>Multi Servers, No Queue (M/M/k/k)</b> . . . . .	57
8.1	Introduction . . . . .	57
8.2	Difference Equations . . . . .	58
8.3	Equilibrium Equations . . . . .	58
8.4	Reduced Equations . . . . .	58
8.5	Probability of $n$ Units in the System . . . . .	58
8.6	Expected Units in the Service Facility ( $L_s$ ) . . . . .	59
8.7	Lambda and Rho Effective . . . . .	59
8.8	Expected Units in the Queue ( $L_q$ ) . . . . .	60
8.9	Expected Units in the System ( $L$ ) . . . . .	60

8.10	Expected Time in Service ( $W_s$ ), Queue ( $W_q$ ) and System ( $W$ ) . . . . .	60
8.11	Loss Probability . . . . .	60
<b>9</b>	<b>One Server, Arbitrary Service (M/G/1)</b> . . . . .	<b>65</b>
9.1	Introduction . . . . .	65
9.2	Expected Units in the Service Facility ( $L_s$ ) and Probability the System is Empty ( $P_0$ ) . . . . .	66
9.3	Three Events . . . . .	66
9.4	Expected Value of $n'$ , $E(n')$ . . . . .	66
9.5	Expected Value of $n'^2$ , $E(n'^2)$ . . . . .	67
9.6	Expected Number of Units in the System ( $L$ ) . . . . .	68
9.7	Expected Number of Units in the Queue ( $L_q$ ) . . . . .	68
9.8	Expected Time in Service ( $W_s$ ), Queue ( $W_q$ ) and System ( $W$ ) . . . . .	69
9.9	Expected Time in the Queue Given a Delay ( $W_q'$ ) . . . . .	69
9.10	Service Level . . . . .	69
9.11	Summary of the Statistical Measures . . . . .	70
<b>10</b>	<b>2 Populations, One Server, Arbitrary Service (M/G/1/2)</b> . . . . .	<b>73</b>
10.1	Introduction . . . . .	73
10.2	Expected Time for an Arbitrary Arrival ( $1/\lambda$ ) . . . . .	74
10.3	Expected Time and Variance of Time in Service ( $1/\mu$ ) and $\sigma^2$ . . . . .	74
10.4	Statistics for an Arbitrary Unit in the System . . . . .	75
10.5	Expected Number of Units in Service ( $L_s$ , $L_{s1}$ , $L_{s2}$ ) . . . . .	75
10.6	Expected Number of Units in Queue ( $L_q$ , $L_{q1}$ , $L_{q2}$ ) . . . . .	76
10.7	Expected Number of Units in the System ( $L$ , $L_1$ , $L_2$ ) . . . . .	76
10.8	Expected Time in Service ( $W_s$ , $W_{s1}$ , $W_{s2}$ ) . . . . .	76
10.9	Expected Time in Queue ( $W_q$ , $W_{q1}$ , $W_{q2}$ ) . . . . .	76
10.10	Expected Time in the System ( $W$ , $W_1$ , $W_2$ ) . . . . .	77
10.11	Expected Time in Queue Given a Delay ( $W_q'$ , $W_{q'1}$ , $W_{q'2}$ ) . . . . .	77
10.12	Service Level ( $SL$ , $SL_1$ , $SL_2$ ) . . . . .	77
<b>11</b>	<b>M Machines, One Repairman (M/M/1/M)</b> . . . . .	<b>79</b>
11.1	Introduction . . . . .	79
11.2	Difference Equations . . . . .	80
11.3	Equilibrium Equations . . . . .	80
11.4	Reduced Equations . . . . .	80
11.5	Probability on $n$ Units in the System . . . . .	80
11.6	Probability the System is Empty . . . . .	81
11.7	Expected Units in the Service Facility ( $L_s$ ) . . . . .	81
11.8	Expected Units in the System ( $L$ ) . . . . .	81

11.9	Expected Units in the Queue ( $L_q$ ) . . . . .	81
11.10	Expected Time in Service ( $W_s$ ) . . . . .	81
11.11	Service Level . . . . .	82
<b>12</b>	<b>M Machines, R Repairmen (<math>M/M/R/M</math>) . . . . .</b>	<b>85</b>
12.1	Introduction . . . . .	85
12.2	Difference Equations . . . . .	86
12.3	Equilibrium Equations . . . . .	86
12.4	Reduced Equations . . . . .	86
12.5	Probability on $n$ Units in the System . . . . .	86
12.6	Expected Units in the Service Facility ( $L_s$ ) . . . . .	87
12.7	Expected Units in the Queue ( $L_q$ ) . . . . .	87
12.8	Expected Units in the System ( $L$ ) . . . . .	88
12.9	Expected Time in Service ( $W_s$ ) . . . . .	88
12.10	Service Level . . . . .	88
<b>13</b>	<b>One Server, Repeat Service (<math>M/M/1/\theta</math>) . . . . .</b>	<b>93</b>
13.1	Introduction . . . . .	93
13.2	Difference Equations . . . . .	94
13.3	Equilibrium Equations . . . . .	94
13.4	Reduced Equations $\theta$ . . . . .	94
13.5	Probability on $n$ Units in the System . . . . .	94
13.6	Expected Runs . . . . .	95
<b>14</b>	<b>Multi Servers, Repeat Service (<math>M/M/k/\theta</math>) . . . . .</b>	<b>97</b>
14.1	Introduction . . . . .	97
14.2	Difference Equations . . . . .	98
14.3	Equilibrium Equations . . . . .	98
14.4	Reduced Equations . . . . .	98
14.5	Probability on $n$ Units in the System . . . . .	98
14.6	Expected Runs . . . . .	99
<b>15</b>	<b>Tandem Queues (<math>M/M/1: M/M/1</math>) . . . . .</b>	<b>103</b>
15.1	Introduction . . . . .	103
15.2	Statistics for System 1 . . . . .	104
15.3	Output from System 1 . . . . .	104
15.4	Statistics for System 2 . . . . .	104
15.5	Number of Units in Both Systems . . . . .	105
15.6	Statistics for the Total System . . . . .	105
<b>16</b>	<b>Priority System, One Server, Infinite Queue (<math>M/M/1/P</math>) . . . . .</b>	<b>109</b>
16.1	Introduction . . . . .	109
16.2	Statistics for the Total System . . . . .	110
16.3	Statistics for the Top Priority Units . . . . .	111

16.4	Statistics for the Low Priority Units . . . . .	111
16.5	Expected Units in Service (Ls), Queue (Lq) and System (L). . . . .	111
16.6	Expected Time in Service (Ws), Queue (Wq) and System (W) . . . . .	112
16.7	Expected Time in Queue (Wq') for a Delayed Item . . . . .	112
<b>17</b>	<b>Priority, One Server, Arbitrary Service (M/G/1/P)</b> . . . . .	<b>115</b>
17.1	Introduction . . . . .	115
17.2	Statistics for the Total System . . . . .	116
17.3	Expected Time and Variance of Time in Service ( $1/\mu$ ) and $\sigma^2$ . . . . .	116
17.4	Statistics for an Arbitrary Unit in the System. . . . .	117
17.5	Statistics for the Top Priority Units. . . . .	117
17.6	Statistics for the Low Priority Units . . . . .	118
17.7	Expected Units in Service (Ls), Queue (Lq) and System (L). . . . .	118
17.8	Expected Time in Service (Ws), Queue (Wq) and System (W) . . . . .	119
17.9	Expected Time in Queue (Wq') for a Delayed Item . . . . .	119
<b>18</b>	<b>One Server, Constant Service (M/D/1).</b> . . . . .	<b>123</b>
18.1	Introduction . . . . .	123
18.2	Summary of the Statistical Measures. . . . .	124
18.3	The Probability Distribution of n . . . . .	125
<b>19</b>	<b>Exponential Arrivals, Erlang Service (M/E2/1)</b> . . . . .	<b>129</b>
19.1	Introduction . . . . .	129
19.2	Connection Between the Exponential and Erlang Distributions . . . . .	129
19.3	Measuring the Summary Statistics . . . . .	130
19.4	Finding the Probability of n Units in the System . . . . .	131
19.5	Difference Equations. . . . .	132
19.6	Equilibrium Equations. . . . .	132
19.7	Matrix Solution . . . . .	132
19.8	Zero = Zero . . . . .	132
