

# Contents

<b>1</b>	<b>Basics</b>	1
1.1	Introduction	1
1.2	Upper Semicontinuous Functions	2
1.3	Inverse Limits	4
1.4	Some Basic Examples	5
1.5	A Fundamental Existence Theorem	9
1.6	Some Elementary Basic Theorems	10
	References	11
<b>2</b>	<b>Connectedness</b>	13
2.1	Introduction	13
2.2	A Characterization of Connectedness	14
2.3	A Basic Connectedness Theorem	16
2.4	Examples	18
2.5	Topological Conjugacy	20
2.6	Connectedness from Bonding Functions Without Connected Values	22
2.7	Union Theorems	25
2.8	Examples from Eight Similar Functions	30
2.8.1	Four More Similar Graphs	36
2.9	Additional Examples	38
2.10	Nonconnected Inverse Limits	41
	References	46
<b>3</b>	<b>Mappings versus Set-Valued Functions</b>	47
3.1	Introduction	47
3.2	The Subsequence Theorem	47
3.3	Bonding Functions Vis-À-Vis Projections	50
3.4	The Closed Subset Theorem	50
3.5	The Full Projection Property	51
3.6	Indecomposability and the Two-Pass Condition	55

3.7	Bennett's Theorem.....	57
	References .....	58
<b>4</b>	<b>Mapping Theorems</b> .....	59
4.1	Introduction .....	59
4.2	A Subsequence Mapping Theorem .....	59
4.3	Shift Mappings.....	62
4.4	Other Maps Between Inverse Limits.....	64
	References .....	65
<b>5</b>	<b>Dimension</b> .....	67
5.1	Introduction .....	67
5.2	Dimension 1 .....	68
5.3	Examples with Finite Dimension Greater Than 1 .....	70
5.4	Incommensurate Continua .....	73
	References .....	76
<b>6</b>	<b>Problems</b> .....	77
6.1	Introduction .....	77
6.2	Connectedness .....	77
6.3	The Subsequence Theorem.....	78
6.4	The Closed Subset Theorem .....	78
6.5	The Full Projection Property .....	79
6.6	Indecomposability .....	79
6.7	Ray with Remainder .....	80
6.8	Bonding Functions Vis-À-Vis Projections.....	80
6.9	Mapping Theorems .....	80
6.10	Hyperspaces.....	80
6.11	Miscellaneous Problems.....	81
	Bibliography .....	82
	<b>Index</b> .....	85

An Introduction to Inverse Limits with Set-valued  
Functions

Ingram, W.T.

2012, XII, 86 p. 51 illus., 41 illus. in color., Softcover

ISBN: 978-1-4614-4486-2
