

Contents

1	Optical Methods: An Overview	1
1.1	Introduction	1
1.2	Background	1
1.3	Optical Methods	3
1.4	Light Sources	4
1.4.1	Introduction to Lasers	4
1.4.2	Characteristics of Lasers	6
1.5	Interference Phenomenon	8
1.5.1	Temperature Measurement	12
1.5.2	Dual Wavelength Interferometry	15
1.5.3	Mach–Zehnder Interferometer	16
1.5.4	Fringe Analysis	17
1.5.5	Refraction Errors	18
	References	22
2	Laser Schlieren and Shadowgraph	23
2.1	Introduction	23
2.2	Laser Schlieren	24
2.2.1	Positioning the Knife-Edge	25
2.2.2	Analysis of Schlieren Images	26
2.2.3	Gray-Scale Filter	35
2.3	Background Oriented Schlieren	36
2.3.1	Experimental Details	36
2.3.2	Data Analysis	37
2.4	Shadowgraph Technique	39
2.4.1	Governing Equation and Approximations	40
2.4.2	Numerical Solution of the Poisson Equation	44
2.5	Closure	45
	References	46

3	Rainbow Schlieren	47
3.1	Introduction	47
3.2	Optical Layout	48
3.3	Filter Design	49
3.3.1	1D Rainbow Filter	49
3.3.2	2D Rainbow Filter	50
3.4	HSI Parameters	52
3.4.1	Calibration of 1D Filter	55
3.5	Image Formation in Color Schlieren	55
3.5.1	Analysis of an Axisymmetric Field	58
3.6	Color Versus Monochrome Schlieren	60
	References	61
4	Principles of Tomography	63
4.1	Introduction	63
4.2	Overview	63
4.3	Convolution Backprojection	66
4.4	Iterative Techniques	67
4.4.1	ART	70
4.4.2	MART	74
4.4.3	Maximum Entropy	77
4.5	Testing of Tomographic Algorithms	79
4.5.1	Reconstruction of a Circular Disk with Holes	79
4.5.2	Reconstruction of a Numerically Generated Thermal Field	82
4.6	Extrapolation Scheme	87
4.7	Validation of Reconstruction Procedure with Simulated Data	89
4.7.1	Comparison of ART and CBP for Experimental Data	93
4.8	Jet Interactions	94
4.9	Treatment of Unsteady Data	95
	References	99
5	Validation Studies	101
5.1	Introduction	101
5.2	Convection in a Differentially Heated Fluid Layer	102
5.2.1	Nusselt Number Calculation	102
5.2.2	Interferometry, Schlieren, and Shadowgraph	104
5.2.3	Rainbow Schlieren Technique	104
5.3	Convection Patterns in a Crystal Growth Process	110
5.3.1	Convective Patterns	110
5.4	Steady Two-Layer Convection	115
5.4.1	Temperature Variation in Silicone Oil	116
5.4.2	Shadowgraph Analysis	117
5.5	Buoyant Jets	121

5.6	Wake of a Heated Cylinder	122
5.6.1	Comparison of Hotwire and Schlieren Signals	125
	References	126
6	Closure	127
6.1	Introduction	127
6.2	Comparison of Interferometry, Schlieren, and Shadowgraph	127
6.3	Applications	128

Schlieren and Shadowgraph Methods in Heat and Mass
Transfer

Panigrahi, P.K.; krishnamurthy, m.

2012, XI, 128 p. 69 illus., 17 illus. in color., Softcover

ISBN: 978-1-4614-4534-0
