

Contents

1	Soft Computing Approach to Pattern Classification and Object Recognition	1
1.1	Introduction	2
1.2	Passage Between Conventional Approach to Pattern Classification (Object Recognition) and Soft Computing Approach to Pattern Classification (Object Recognition)	5
	References	14
2	Pattern Classification Based on Conventional Interpretation of MFI	15
2.1	Introduction	15
2.2	Statement of the Problem	17
2.3	Existing Method to Solve Fuzzy Relation Equation	18
2.4	Modified Approach to Solve Fuzzy Relational Equation	22
2.4.1	Derivative of Max-Function	22
2.4.2	Derivative of Min-Function	23
2.4.3	Modified Approach to the Computation of Derivative of Fuzzy-Max and Fuzzy-Min Functions	24
2.4.4	Algorithm for the Estimation of \mathfrak{R}	26
2.4.5	Illustration of the Modified Approach to the Estimation of \mathfrak{R}	27
2.5	Design of the Classifier Based on Fuzzy Relational Calculus	27
2.6	Effectiveness of the Proposed Method	32
2.6.1	Classification of First Synthetic Data	33
2.6.2	Classification of Second Synthetic Data	35
2.7	Applications	35
2.7.1	Experimental Results	36
2.8	Comparative Study	38
2.9	Conclusion	38
	References	39

3	Pattern Classification Based on New Interpretation of MFI	43
3.1	Introduction	44
3.2	Statement of the Problem	44
3.3	Design of the Multidimensional Classifier Based on Fuzzy Relational Calculus (FRC)	46
3.4	Effectiveness of the Proposed Method	48
3.4.1	Classification of First Synthetic Data.	49
3.4.2	Classification of Second Synthetic Data.	49
3.5	Applications	51
3.5.1	Experiment on the Classification of the Telugu Vowels	51
3.5.2	Experiment on the Classification of Bengali Vowels	57
3.6	Conclusion	58
	References	59
4	Pattern Classification Based on New Interpretation of MFI and Floating Point Genetic Algorithm	61
4.1	Introduction	62
4.2	Solution of Fuzzy Relational Equation by GA	63
4.2.1	Computational Details to Solve Eq. (4.4) Using Floating Point GA	64
4.2.2	Algorithm for the Estimation of \mathfrak{R}	66
4.3	Designing of the Classifier Based on the Fuzzy Relational Calculus and Genetic Algorithms	67
4.4	Effectiveness of the Proposed Method	68
4.4.1	Classification of First Synthetic Data.	68
4.4.2	Classification of Second Synthetic Data.	68
4.5	Application of the Proposed Method for Vowel Classification Problem	71
4.5.1	Experiment on the Classification of the Telugu Vowels	71
4.6	Comparative Study	71
4.7	Benchmark Study	73
4.8	Conclusion	75
	References	76
5	Neuro-Genetic Approach to Pattern Classification Based on the New Interpretation of MFI	77
5.1	Introduction	77
5.2	Implementation of the New Interpretation of MFI on MLP Type Neural Network	78
5.3	Genetic-Algorithm-Based Learning Environment.	79
5.3.1	Genetic Algorithm for Global Optimization	79
5.3.2	Backpropagation Versus GA	80

5.3.3	Four Basic Features of GA.	80
5.3.4	Algorithm	82
5.4	Improvement of the Network Performance Using Regularization.	83
5.5	Formulation of the Problem	83
5.6	Numerical Examples	87
5.6.1	Classification of Synthetic Data	87
5.6.2	Classification of Vowels	98
5.6.3	Classification with Regularization.	99
5.7	Conclusion	99
	References	100
6	Knowledge-Based Occluded Object Recognition Based on New Interpretation of MFI and Floating Point Genetic Algorithm	101
6.1	Introduction	102
6.2	Statement of the Problem	105
6.3	Design of Knowledge-Based Occluded Object Recognizer	105
6.3.1	Local Feature Extraction	106
6.3.2	Training Phase	108
6.3.3	Testing Phase	111
6.3.4	Condition of Recognition.	111
6.4	Control Scheme of the Vision Process	113
6.5	Effectiveness of the Proposed Classifier.	116
6.5.1	Recognition of the Scene Consist of Model Objects M_1 and M_2	116
6.5.2	Recognition of the Scene Consist of Model Objects M_1 , M_2 , and M_3	118
6.6	Conclusion	119
	References	119
7	Neuro-Fuzzy Approach to Occluded Object Recognition Based on New Interpretation of MFI	121
7.1	Introduction	121
7.2	Implementation of the New Interpretation of MFI on Back Propagation-Type Neural Network.	122
7.3	Formulation of the Problem	123
7.3.1	Local Feature Extraction	123
7.3.2	Process of Fuzzification.	125
7.3.3	Assignment of the Membership Function to the Consequent Part of the If-Then Rules	125
7.3.4	Process of Defuzzification	126
7.3.5	Generation of the Model-Based Object Recognition Scheme	127

7.4	Experimental Results	129
7.4.1	Case Study 1	129
7.4.2	Case Study 2	137
7.5	Conclusion	142
	References	146
Appendix A:	Multidimensional Fuzzy Implication and Fuzzy Pattern Vector	147
Appendix B:	Good Function	159
Appendix C:	Operators of Fuzzy Equation	163
Appendix D:	Genetic Operators on the Floating Point Chromosomes	169

Soft Computing Approach to Pattern Classification and
Object Recognition

A Unified Concept

Ray, K.S.

2012, XII, 176 p., Hardcover

ISBN: 978-1-4614-5347-5
