
Preface

This volume of MiMB aims at describing techniques used by worldwide experts of the S1P field in an array of cell types and with various physiological relevance, hence showcasing the important effects of S1P in development and in physiopathology.

We would like to thank all the authors of this volume who have shared their expertise and protocols.

We also wish to thank Dr. John Walker for his support during the process of compiling this book.

Our thanks also go to Patrick Marton for his encouragements and help.

Finally, a special thank you goes to David Casey for his tremendous help in the production of the volume.
