Contents

Preface ..... *v*
Contributors ..... *xiii*

1 Predictive Models for Cellular Signaling Networks 1
Dagmar Iber and Georgios Fengos

2 Analyzing and Constraining Signaling Networks: Parameter Estimation for the User 23
Florian Geier, Georgios Fengos, Federico Felizzi, and Dagmar Iber

3 A Tutorial on Mathematical Modeling of Biological Signaling Pathways 41
Zhike Zi

4 Bistability in One Equation or Fewer 53
Graham A. Anderson, Xuedong Liu, and James E. Ferrell, Jr.

5 Mathematical Investigation of How Oncogenic Ras Mutants Promote Ras Signaling 69
Edward C. Stites and Kodi S. Ravichandran

6 Modeling miRNA Regulation in Cancer Signaling Systems: miR-34a Regulation of the p53/Sirt1 Signaling Module 87
Xin Lai, Olaf Wolkenhauer, and Julio Vera

7 Design of Experiments to Investigate Dynamic Cell Signaling Models 109
Samuel Bandara and Tobias Meyer

8 Mathematical Modeling of Biochemical Systems with PottersWheel 119
Thomas Maiwald, Oliver Eberhardt, and Julie Blumberg

9 Rule-Based Modeling of Signal Transduction: A Primer 139
John A.P. Sekar and James R. Faeder

10 Computational Modeling of Signal Transduction Networks: A Pedagogical Exposition 219
Ashok Prasad

11 Modeling Spatiotemporal Dynamics of Bacterial Populations 243
Hao Song and Lingchong You

12 Discrete Dynamic Modeling of Signal Transduction Networks 255
Assieh Saadatpour and Réka Albert

13 Analytic Methods for Modeling Stochastic Regulatory Networks 273
Aleksandra M. Walczak, Andrew Mugler, and Chris H. Wiggins
