## Author biographies

vii

<b>1</b>	<b>Introduction</b>	<b>1</b>
	Terminology	1
	Etiologic classification of diabetes	4
	Epidemiology	4
	Diagnosis	9
	Screening for diabetes mellitus	14
	References	16
<b>2</b>	<b>Management strategies for diabetes</b>	<b>19</b>
	Glycemic goals of treatment	20
	Importance of lifestyle issues and patient education	20
	What determines treatment choice?	22
	Current guidelines for treatment	23
	References	31
<b>3</b>	<b>Insulin therapies</b>	<b>35</b>
	Mode of action	35
	Types of insulin preparations	35
	Pharmacokinetics of insulin	41
	Types of insulin regimens	42
	Determining whether insulin is needed	44
	Insulin initiation: choosing a regimen	47
	Recommendations	51
	Revisiting hypoglycemia	52
	Revisiting continuous glucose monitoring	56
	References	57

<b>4</b>	<b>Non-insulin agents for diabetes</b>	<b>61</b>
	Metformin	61
	Sulfonylureas	66
	Thiazolidinediones	68
	Prandial glucose regulators (meglitinides)	72
	Alpha-glucosidase inhibitors	73
	Incretin-based therapies	74
	Diabetes treatments: cancer risk and prognosis	81
	References	85
<b>5</b>	<b>New and future therapies</b>	<b>91</b>
	Inhaled insulins	91
	Oral hypoglycemic agents	93
	Horizon scanning	100
	Conclusions	103
	References	104
<b>6</b>	<b>Managing the complications of diabetes</b>	<b>105</b>
	Pathogenesis	105
	Microvascular complications of diabetes	106
	Macrovascular complications of diabetes	116
	Glycemic goals and complications of diabetes	122
	References	123
